EXECUTIVE SUMMARYXIII

CHAPTER ONE: BUSIA COUNTY OVERVIEW 1

1.1 Background..... 1

1.2 Position and Size..... 1

1.3 Physiographic and Natural Conditions2

1.3.1 Physical and Topographic Features2

1.3.2 Climatic Conditions.....2

1.3.3 Ecological Conditions.....2

1.4 Administrative and Political Units3

1.4.1 Administrative Units3

1.4.2 County Government Administrative Wards by Constituency.....3

1.4.3 Political Units (Constituencies and Wards)4

1.5 Demographic Features.....4

1.5.1 Population Size, Composition and Distribution.....4

1.5.2 Busia County Population Age Structure4

1.5.3 Population Projections by Age Cohorts.....5

1.5.4 Population Projection by Urban Centers7

1.5.5 Population Density and Distribution7

1.5.6 Population Projection by Broad Age Groups.....8

1.5.7 Population of Persons with Disability..... 10

1.5.8 Demographic Dividends Potential for Busia County 11

1.6 Human Development Index 12

1.7 Busia County Poverty Profiles 12

CHAPTER TWO: PERFORMANCE REVIEW OF PREVIOUS CIDP PERIOD (2018 – 2022) 15

2 Overview 15

2.1 Analysis of County Revenue Sources 15

2.1.1 Own Source Revenue 15

2.1.2 Equitable Share 16

2.1.3 Conditional Grants 16

2.2 County Budget Expenditure Analysis 17

2.3 Sector Programmes’ Performance Review 18

2.3.1 Agriculture, Livestock and Fisheries 18

2.3.2 Trade, Investment, Industry and Co-operatives 19

2.3.3 Education and Vocational Training 20

2.3.4 Finance and Economic Planning 20

2.3.5 Sports, Culture and Social Services..... 21

2.3.6 Public Works, Transport, Roads and Energy..... 21

2.3.7	Lands, Housing and Urban Development	22
2.3.8	Water Irrigation, Environment and Natural Resources	22
2.3.9	Health and Sanitation.....	23
2.3.10	The Governorship.....	24
2.3.11	Public Service Board.....	24
2.3.12	Public Service and Administration and Management.....	25
2.3.13	The County Assembly	25
2.4	Challenges.....	25
2.5	Emerging issues	26
2.6	Lessons Learnt.....	26
2.7	Natural Resources	27
2.8	Development Issues.....	27
CHAPTER THREE: SPATIAL DEVELOPMENT FRAMEWORK		44
3	Spatial Development Framework	44
CHAPTER 4: DEVELOPMENT PRIORITIES, STRATEGIES AND PROGRAMMES		47
4.1	Development Priorities, Strategies	47
4.1.1	Trade, Industry, Investment and Cooperatives	73
4.1.2	Education and Vocational Training	81
4.1.3	Finance, ICT and Economic Planning	90
4.1.4	Sports, Culture and Social Services.....	94
4.1.5	Transport, Public Works and Energy.....	106
4.1.6	Public Service Administration and Gender	115
4.1.7	Lands, Housing and Urban Development	119
4.1.8	Water, Irrigation and Natural Resources	125
4.1.9	Health and Sanitation.....	137
4.1.10	County Public Service Board	154
4.1.11	Governorship	158
4.1.12	The County Assembly	164
4.2	CIDP Linkages with National Development Agenda, Regional and International Development Frameworks.....	165
4.2.1	Linkage of CIDP with Kenya Vision 2030 and Medium Term Plans.....	166
4.2.2	Linkage CIDP with ‘The Big Four’ Agenda	166
4.2.3	Linkage CIDP with EAC Cross Border Trade & EAC Vision 2050	167
4.2.4	Linkage of CIDP to African Continental Free Trade Area	167
4.2.5	CIDP Linkage with Sustainable Development Goals	167
4.2.6	CIDP Linkage with Sendai Framework for Disaster Risk Reduction 2015 to 2030 168	
4.2.7	CIDP Linkage with AU’s Agenda 2063.....	169
CHAPTER FIVE: IMPLEMENTATION FRAMEWORK		171
5	Overview	171
5.2	Institutional Framework.....	171
5.2.1	Administration and County CIDP Implementation	172
5.3	Resource Mobilization and Management Framework.....	179
5.3.1	Resource Requirements by Sector	179

5.3.2	Revenue Projections.....	180
5.3.3	Estimated Resource Gap.....	180
5.3.4	Resource Mobilization and Management Strategies	181
5.4	Asset Management	181
5.5	Risk Management.....	181
5.6	Key Sources of Revenue	182
5.6.1	Transfers from National Government	182
5.6.2	Locally Generated Revenue.....	182
5.7	Strategies for Revenue Collection	182
5.7.1	Automation of Revenue Collection Processes.....	182
5.7.2	Expanding Own Source Revenue Generation Mechanisms	182
5.7.3	Formulation of Relevant Policies and Laws.....	184
5.7.4	Mainstreaming Resource Mobilization Across the County Departments	184
5.7.5	Expanding External Sources of Revenue	184
5.8	Measures to Address Resources Gaps.....	185
CHAPTER SIX: MONITORING, EVALUATION AND LEARNING.....		187
6.1	Overview.....	187
6.2	County Monitoring and Evaluation Structure.....	188
6.3	M&E Capacity	188
6.4	M&E Outcome Indicators	188
6.5	Data Collection, Analysis and Reporting.....	199
6.6	Dissemination, Feedback Mechanism, Citizen Engagement and Learning	200
6.7	Evaluation Plan.....	200
ANNEX 1: COUNTY FACTSHEET		202
ANNEX 2: BUSIA CIDP PREPARATION STEPS & PROPOSED TIMELINES		209

FOREWORD

The Constitution 2010 ushered Kenya into a devolved system of governance consisting of national and the 47 county governments. It assigned exclusive and concurrent functions to the two tiers of government as provided for in Article 186 and the Fourth Schedule. The National Government is assigned national economic policy and planning as well as capacity building and technical assistance to counties, among others functions. The National Treasury and Economic Planning developed guidelines for preparation of the Third-Generation County Integrated Development Plans, 2023 – 2027, in order to provide requisite norms and standards for preparation of CIDPs and ensure uniformity across all the counties. The guidelines were expected to strengthen mechanisms for linking the county policies, planning and budgeting processes.

The CIDP 2023-2027 preparation guidelines took into account lessons learnt from implementation of the previous 2nd generation of CIDPs as well as emerging issues and challenges. The process of developing the 3rd generation CIDP for Busia County therefore largely adhered to requisite steps and timelines stipulated in the guidelines. In addition, the CIDP attempts to ensure in the best of circumstances integration of national development frameworks through inclusion of key Programmes and projects to be implemented in the medium term. The process further integrated the tone and spirit of our People’s Manifesto in which I sought to provide leadership that is focused on inclusive economic growth and development, social empowerment and political inclusivity to spur meaningful growth and development. Therein, the intent and purpose is to exercise tolerance based responsive, transparent and servant leadership guided by need for accountability, equity and rule of law.

Article 186 and 220(2)(a) of the Constitution assigns national government the role of prescribing the structure of county development plans and offering support to the counties on economic policy and planning. Sections 102(h), 104(1) and 108 of the County Government Act 2012, require the county governments to prepare 5-years County Integrated Development Plans that are the basis for appropriation of public funds. Further, Section 104 (1) of the Act obligates county governments to plan for the counties and no public funds shall be appropriated without the CIDP planning framework. CIDPs support the following county’s corporate objectives:

- The 2023-2027 CIDP aims to align county government ‘s projects and programmes with the national plans (Kenya Vision 2030, the Big 4 Agenda) as well as international and or global development goals (SDGs, the AU’s Agenda 2063, etc.); as integral process that ensures that duplication of roles and wanton wastage of resources are eliminated when various entities attempt to solve one issue separately or in a fragmented manner.
- The 2023-2027 CIDP ensures effectiveness through collaborative efforts by the different entities thereby unleashing positive synergies that is required are to realize the key results for sustainable development.
- The 2023-2027 CIDP is designed to capture and reflect on the county’s citizens’ voices and priorities and forms the first important stage in participatory budgeting and planning at county level; and,
- The 2023-2027 CIDP is the primary anchor of the County Budget and Economic Forum (CBEF), Budget Review and Outlook Papers and County Fiscal Strategy Papers (CFSPs) that link policy, planning and budgeting at all levels of the county government.

From analysis of the previous county’s performance, there are apparent modest to minimal achievements on the progress made. This is because implementation of the preceding CIDPs (2013-2022) was derailed by financial resource constraints and human resource shortages among other challenges that my government is actively address through proactive engagements with the development partners and fixing the human resource gaps to ensure successful future implementation. Moving forward, there is urgent need to reposition inclusive socio-economic development in Busia County.

The bold interventions proposed call for concerted efforts by all actors for them to be achieved. It calls upon all the government entities, the people of Busia and development actors to effectively play their respective and collective roles towards realization of development aspirations. Concerted efforts are urgently required and are necessary for Busia County to achieve desired results for sustainable development. I accordingly do expect all development players to help scale up the level and extent of county's development momentum & progress in order to enable us catch up on devolution agenda. Busia County aspires to improve on the socio-economic conditions and standards of her people and therefore I do commit my support and that of the county’s top leadership commitments to support implementation of this plan (CIDP 2023-2027).

Hon. (Dr.) Paul Nyongesa Otuoma; EGH.
H.E. The Governor

ACKNOWLEDGEMENT

The Busia County Integrated Development Plan for 2023-2027 is summary of achievements realized during implementation of the previous CIDP for 2018-2022. The CIDP presents key highlights of development priorities and strategies for the county during the plan period (2023-2027). It further discusses linkages of CIDP with other development plans that include, among others: Kenya Vision 2030 and its successive Medium-Term Plans, National Spatial Plan, County Sectoral Plans, Africa’s Union Agenda 2063, and Sustainable Development Goals (SDGs) among others. The process of developing the 3rd Generation CIDP for Busia was spearheaded by the County Department for Finance, ICT and Economic Planning and was highly consultative and participatory.

The Kenya National Chamber of Commerce and Industry (KNCCI) Busia Chapter played significant lead roles by offering consultancy advisory services through reviews of the 2nd generation CIDP, referencing of policy and legal documents and incorporating inputs from the county directors and key stakeholders including the National Council for Population and Development (NCPD), Kenya National Bureau of Statistics (KNBS) and the National Treasury and the State Department for Economic Planning. Some methodologies that teams used included: documentation, group discussions, power-point presentations and plenary validation meetings and or workshops. The consultants ensured that all approaches addressed objectives and results to be derived from assignments that were carried out in line with necessary phases.

Further during the 2023-2027 CIDP preparation, the county government’s directorates and departments were required by both the Constitution 2010 and various devolution laws and statutes to provide easy and timely access to information that is held by public officers, coordinate and provide mechanisms for public participation including establishing dedicated officers for public participation, provision of vehicles, coordination of security during public participation and providing budgetary provisions and facilitation of CIDP preparation processes. In addition, the county government was required by the County Governments Act, the Urban Areas and Cities Act and the Public Finance Management Act to provide for citizen participation in: planning and budgeting; management of cities and urban areas; and evaluation of their performance(s) as well as sharing performance progress reports with the public.

The Department of Finance and Economic Planning established CIDP Technical Teams and Secretariat that included nominees from all identified sectors in addition to the county planning team. The KNCCI on the other hand prepared and aligned the CIDP road-map and work plan in line with the county timelines; reviewed resources mobilization strategies and human resources capacities that are required for undertaking necessary development assignments. A team of qualified experts were assigned to work to deliver this CIDP under the leadership of Chief Officer for Finance and Economic Planning and the County Director of Planning.

The consultants were responsible for making available logistics including computers, printers, scanners, photocopier as was stipulated in the TORs and provision of bid forms for use in the field during public participation fora. The consultants held a series of consultations and planning meetings with the leadership of the County Department for Finance, ICT and Economic Planning who significantly played lead roles in coordination and development of the CIDP through planning, resource mobilization and ensuring effective accountability for use of resources earmarked for CIDP preparatory exercise. The role of consultants was to provide technical backstopping advisory services to complement the work of the economic planning and technical support teams who continuously and tirelessly provided requisite expertise throughout the CIDP preparation phases.

In a very special way I would like to specifically acknowledge the following persons who collectively and individually contributed to this CIDP delivery; Mr. Stephen Odhiambo, the Lead Consultant, Mr. Samuel Abungu and Mr. Raphael Emusala, Chairperson and CEO of KNCII Busia Chapter respectively, who provided leadership & necessary advisory support and guidance to the CIDP delivery. I further wish to acknowledge Mr. Korir Kelong, County Director of Planning

and the dedicated team of Economists & Statisticians comprising of Joselyn Chepkwony, Andrew O. Werambo, Maurine Barasa, Cynthia Amaase, Getrude Nabwire, Evans Tangara, Eric Oloo, Protus Makokha, Bruno Were Mbalwe, Marion Tata, Peris Chepngetich, Bubolu Milton and Winny Omollo and the County Directors/HoDs who worked tirelessly and provided necessary information and data, and who wholeheartedly supported the CIDP 2023-2027 delivery at all levels. I am equally indebted to Mr. Benard Onunga; Ag. Director TVT who supported CIDP Secretariat on many aspects of data entry and analysis. I

I wish to thank Chief Officer, Finance & Economic Planning Mr. Gypson Wafula who coordinated and facilitated the entire process. Special thanks go to all the Sub County Administrators and all 35 Ward Administrators and the village administrators, all the MCAs and all other county officials who played their individual and collective roles and responsibilities to ensure seamless delivery of CIDP 2023-2027 on time. I also acknowledge all those who were involved in the CIDP 2023-2027 preparation processes.

The roles played by various stakeholders including the county and National Government actors and development partners who supported the process of developing this CIDP 2023-2027 for Busia are highly appreciated. The roles of the public in general and particularly the ones who participated in ward based Public Participation Forums and the many leaders who submitted written memorandum are all highly appreciated and acknowledged. Overall, I acknowledge all those who were involved in the 2023-2027 CIDP preparation processes.

Topister N. Wanyama
County Executive Committee Member; Finance, ICT & Economic Planning

EXECUTIVE SUMMARY

The County Government Act, 2012, Section 104 and 108, obligates counties to develop a County Integrated Development Plan (CIDP) setting up planning units at all county administrative levels. It further seeks to promote public participation and engagement by non-state actors in county planning processes. In fulfillment of aforementioned requirements, the County Government of Busia has developed its 3rd generation CIDP for 2023- 2027 that is instrumental in linking policy, planning and budgeting as required by the Constitution 2010 and other legislation. This County Integrated Development Plan (CIDP) outlines processes through which various efforts at national and devolved levels of government and other relevant public institutions are coordinated at local level to bring economic, social, environmental, legal and spatial aspects of development together to meet the needs and targets set for the benefit of local communities.

The guidelines for preparation of the Third-Generation County Integrated Development Plans, 2023 – 2027 provided requisite norms and standards for preparation of the 3rd generation CIDPs to ensure uniformity across all counties. The guidelines were expected to strengthen mechanisms for linking county policies, planning and budgeting processes. The CIDP 2023-2027 preparation guidelines also considered lessons learnt from implementation of previous 2nd generations of CIDPs as well as emerging issues and challenges. The county development priorities, strategies and Programmes and projects were identified by the stakeholders in the county. The process was carried out in a participatory manner and entailed extensive stakeholder consultations, receipt of written memoranda and involvement of key stakeholders. The projects and programmes will be implemented during 2023-2027 period. The CIDP has six chapters, as outlined below:

Chapter 1 – Background of Busia County: This chapter provides description of the county in terms of its location, size, physiographic and environmental conditions and demographic features and outlines poverty profiles of Busia County moving into 3rd phase of CIDP Planning.

Chapter 2– Review of implementation of 2018-2022 CIDP: This Chapter provides a brief review on implementation progress of the previous County Integrated Development Plan. More specifically, the review provides information and analysis of the status, achievements and challenges that were experienced between 2018 and 2022 with respect to set targets, priorities, policies and programmes of the county government as highlighted in the 2nd Generation County Integrated Development Plan. The challenges identified and lessons learnt are highlighted in the End Term Review Report that largely informed preparation of this 3rd Generation CIDP. Generally, the County Government of Busia was able to achieve between minimal to modest progress on quite a number of its planned objectives and set targets and has a few success stories on projects and programmes that had widespread greatest impacts and potential for replication in the 3rd generation CIDP;

Chapter 3 – Spatial development framework. It is appreciated that the National Spatial Plan (NSP) 2015-2045 was identified as a foundation for social and economic transformation and captured as a key flagship project under the Kenya Vision 2030. The plan provides the national spatial structure and defines general trend and directions of spatial developments for the country, covering entire Forty-Seven (47) Counties and the Exclusive Economic Zones (EEZs). The Plan provides strategies and policies to deal with national challenges including urbanization, regional imbalances/inequalities, rural development, environmental degradation, transportation and under-utilization of massive resources available in the country.

To align with the provisions of NSP 2015- 2045, Busia CIDP 2023-2027 adopted thematic areas and elements as outlined in national spatial framework. Busia County Government initiated development of its Spatial Plan during implementation of the 2018-2022 CIDP but this was not done. This will be done during 2023-2027 to help in providing physical planning policies to support county’s economic and sectoral planning and aid in the preparation of county and local physical development plans.

Chapter 4 – 2023-2027 key county development priorities, strategies and programmes as identified by stakeholders and sectors through all-inclusive and participatory consultative processes and provides CIDP’s linkages with other Plans and development frameworks. The plans include Kenya Vision 2030 and its Medium-Term Plans, the “Big 4” Agenda, Global Development Goals also known as the 2030 Agenda for sustainable development etc. The chapter captures how economic planning at county level links with policy; planning and budgets and how emerging international obligations and development concepts/agenda that are meant to spur economic development will be embraced.

Chapter 5 – Implementation Framework. The chapter presents a framework through which the County Integrated Development Plan (CIDP) 2022- 2027 will be implemented. It discusses institutions responsible for actualization of plans, resource requirements, resource mobilization strategies, resource gaps and the measures and steps that the county will take and put in place to address human and financial resources gaps. It also captures disaster risks and their mitigation strategies and plans.

Chapter 6 – Monitoring and Evaluation: outlines the monitoring and evaluation frameworks that will be used at national and county level to track progress on implementation of projects and programmes. It further shows the proposed monitoring and evaluation structure(s) to be used in the county detailing the projects’ and programmes’ output and outcome indicators. An evaluation plan is provided for key policies and programmes.

CHAPTER ONE: BUSIA COUNTY OVERVIEW

1.1 Background

Busia is one of the 47 Counties in Kenya located in the western part of Kenya. Its headquarters is located in Busia town along Busia-Kisumu Road. Busia is a cosmopolitan county whose residents are predominantly of Luhya and Teso ethnicities. Others include Luo, Somali, Kisii, Kikuyu, among others. Abakhayo, Abamarachi, Abasamia and Abanyala are the major Luhya sub-tribes in Busia while the Teso community is a mono-tribe.

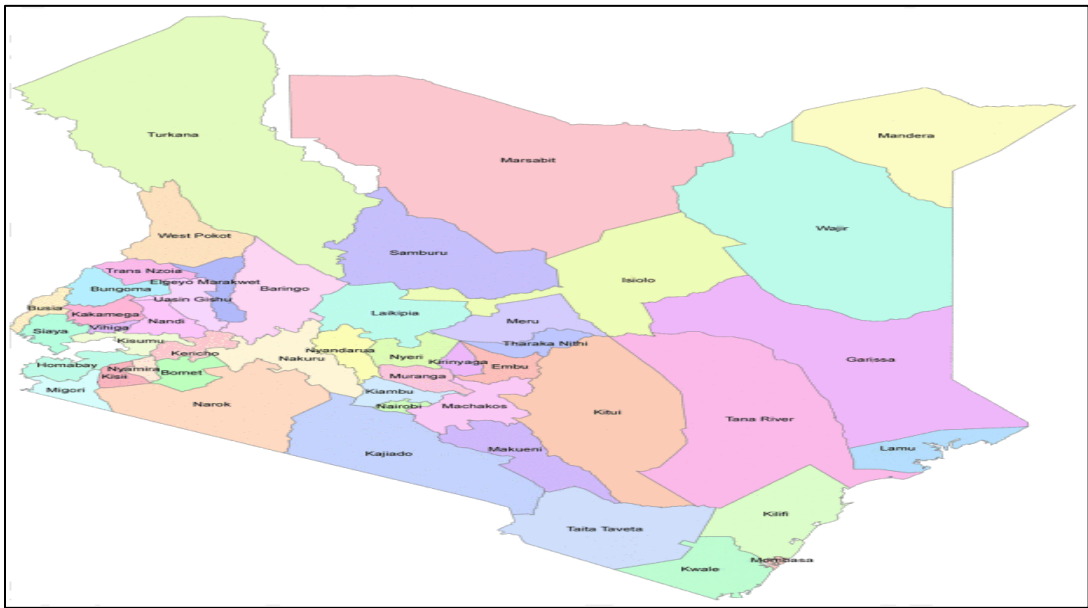

The main economic activities in Busia County are agriculture, fishing and trade. Agriculture being the backbone of economy of Busia County is done majorly on small scale. Sugarcane farming is done for commercial purposes and to a lesser extend cotton and tobacco crops are planted as cash crops. Other crops like maize, beans, sweet potatoes, millet and cassava are grown for subsistence use. Livestock farming is also done to some extent. Fishing is majorly done along the southern part of the county courtesy of Lake Victoria being the main source of both Nile and Tilapia. With produce from both fish and agriculture, and building of a transshipment market, the county enjoys cross border trade along Busia and Malaba borders.

Busia County is a member of the 14 counties of the Lake Region Economic Bloc (LREB) situated around Lake Victoria and its environs. Other members are; Kisumu, Kericho, Siaya, Nandi, Kisii, Bomet, Kakamega, Bungoma, Trans Nzoia, Homabay, Nyamira, Vihiga and Migori. The main objective of the regional bloc is to leverage on economies of scale in the region thus promoting cross county trade. The Lake Region Economic Bloc (LREB) presents the socioeconomic aspirations of 14 counties in the Lake Basin Region and seeks to boldly secure and shape the region’s destiny.

1.2 Position and Size

Busia County is one of the counties in the former Western province. It shares a border with Uganda to the west, Bungoma county to the North, Kakamega county to the East and Siaya County to the West. Moreover, it’s bordered by Lake Victoria to the South West. Based on its strategic location, Busia County is the gateway to Kenya’s regional neighbors in the East African Community – Uganda, Burundi, Rwanda, DRC Congo and Southern Sudan with Busia and Malaba towns serving as designated crossing points. The county covers 1,694.5 square kilometers (km2) at latitudes 0° and 0° 45 N and longitude 34° 25 east. The county can be accessed both by the Lake Victoria from the counties of Siaya and Kisumu. Also, it can be accessed through the road.

Figure 1: Location of Busia County in Kenya

1.3 Physiographic and Natural Conditions

1.3.1 Physical and Topographic Features

The County falls under the Lake Victoria Basin that supports over 25 million livelihoods. The County's altitude varies from about 1,130 metres (m) above sea level at the shores of Lake Victoria to a maximum of about 1,500metres (m) in the Samia and North Teso Hills. The central part of the county, particularly Butula and Nambale Sub - Counties, is marked by low flat divides of approximately uniform height, often capped by lateritic and a shallowly incised swampy drainage system. The Funyula and Samia Hills consist of acid and sub acid lavas, tuffs, and agglomerates, banded quartzite and iron stones. The *Kavirondo* series rocks are developed around Busia, Nambale and Butula while the granites dominate the Northern parts of the county.

The Northern part of the central region features granitic outcrops, which are essentially part of the pen plain and is characterized by the presence of large granitic hills and tors such as Amukura and Chelelemuk. The hills which run from the North East to the South West culminating at Port Victoria, forms a very conspicuous topographic feature. The Southern part of the county is partially covered by the Yala Swamp which is a down warped area associated with the formation of Lake Victoria. The area forms a colony of papyrus growth and is broken by irregular water channels and occasional small dams with grassy islands. This area is covered with lacustrine and alluvial deposits of recent and Pleistocene times. The county is served by four major Rivers namely; Malakisi to the extreme North, Malaba in the Northern entry of the Central Region, River Sio which sneaks through Nambale, Matayos and Funyula Sub – Counties and River Nzoia which drains into Lake Victoria through Budalang'i Sub-county.

1.3.2 Climatic Conditions

Busia County is fairly hot and moist. The mean temperatures in the County is about 21-27° C whereas the annual rainfall is about 750-2000mm. There is a strong precipitation gradient with the northern areas receiving the most precipitation greater than 1750 mm, and the southern areas closer to Lake Victoria receiving between 760 and 1,250 mm of precipitation. The temperature is fairly consistently warm through the year. The Precipitation is consistent throughout the year, although the first half of the year known as first season (January-June) receives a slightly greater amount of precipitation than in the second season (July-December). 50% of the rainfall falls in the long rain season which is at its peak between late March and late May, while 25% falls during the short rains between August and October. The dry season with scattered rains falls from December to February. Intense precipitation and heat stress are both hazards that contribute to agricultural risk in the county throughout the year, whereas dry spells are more an issue in the second season.

1.3.3 Ecological Conditions

The County is categorized into four Agro-ecological zones (AEZs) Namely;

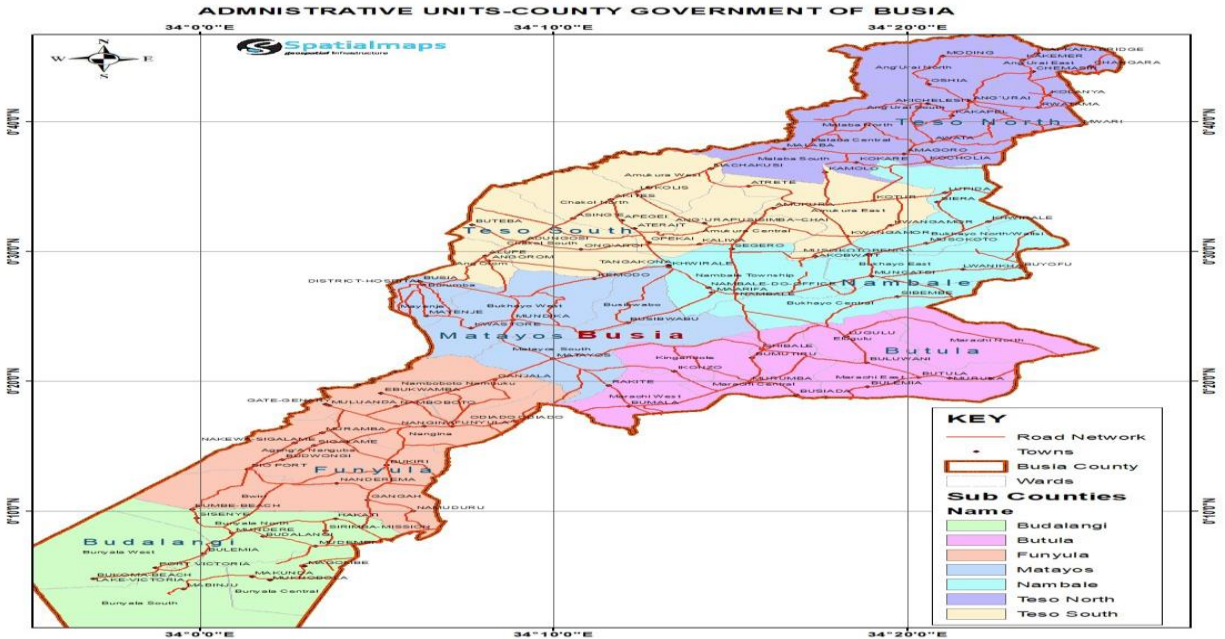

- LM1, also known as Lower Midland Sugar Cane Zone, is at altitude of 1200-1440 meters above sea level and receives annual rainfall of about 1800-2000mm. (in Nambale, Matayos and Butula sub-counties)
- LM2, also known as Marginal Sugar Cane Zone, is at altitude of 1,200-1,350 meters above sea level and receives annual rainfall of about 1,550-1,800mm (Budalangi, Funyula and Teso North sub-counties)
- LM3 also known as Lower Midland Cotton Zone, is at an altitude of 1,140-1,500 meters above sea level and receives annual rainfall of about 1,015-1,420mm (Budalangi and Funyula sub counties)
- LM4 also known as Marginal Cotton Zone, is at altitude of 1,135-1,200 meters above sea level and receives an annual rainfall of about 900-1,100mm (Budalangi sub-county)

1.4 Administrative and Political Units

1.4.1 Administrative Units

The map of Busia County and its administrative units is shown below:

Figure 2: County’s Administrative and Political Units

Source: Independent Electoral Boundaries Commission (IEBC)

The administrative units of Busia County are the managerial and decision-making structures of the county that are used in handling socio-economic development issues affecting county residents. Busia County is divided into seven Sub – Counties namely Bunyala, Butula, Matayos, Nambale, Samia, Teso North and Teso South. These sub - Counties are further divided into 10 divisions, 60 locations, 181 sub-locations and 120 villages. The largest administrative unit is Teso South lying on 299.6 sq. km while the county headquarters is domiciled in Busia Town, Matayos Sub-County. Below is a table of the administrative units within the county:

Table 1: Area (KM2) by Sub County

Sub - County	County Wards	Assembly	Divisions	Locations	Sub-locations	Area (sq.km)
Teso North	6		2	17	44	261.0
Teso South	6		2	13	38	299.6
Matayos	5		2	6	17	196.2
Nambale	4		1	5	14	237.8
Butula	6		1	6	21	247.1
Samia	4		1	7	19	265.1
Bunyala	4		1	6	18	188.3
Total	35		10	60	181	1695.1

1.4.2 County Government Administrative Wards by Constituency

Table 2: County Government Administrative Wards

Sub – County	No. of wards	No of villages
Teso North	6	18
Teso South	6	21
Matayos	5	17
Nambale	4	16
Butula	6	19
Samia	4	17
Bunyala	4	12
TOTAL	35	120

Source: County Government of Busia

1.4.3 Political Units (Constituencies and Wards)

The county has seven (7) constituencies namely: Teso North, Teso South, Funyula, Nambale, Matayos, Budalang’i and Butula and 35 electoral wards

Table 3: County’s Electoral Wards by Constituency

Constituency	County Wards
Teso North	Malaba Central, Malaba North, Angurai South, Angurai North, Angurai East, Malaba South
Teso South	Amukura West, Ang’orom, Chakol South, Amukura Central, Chakol North, Amukura East
Matayos	Burumba, Mayenje, Matayos South, Busibwabo, Bukhayo West
Nambale	Nambale Township, Bukhayo North/Walatsi, Bukhayo East, Bukhayo Central
Butula	Marachi Central, Marachi East, Marachi North, Elugulu, Marachi West, Kingandole
Funyula	Ageng’a/Nanguba, Nangina, Bwiri, Namboboto/Nambuku
Budalang’i	Bunyala Central, Bunyala North, Bunyala West, Bunyala South

1.5 Demographic Features

1.5.1 Population Size, Composition and Distribution

The County population’s demographic information is distributed in terms of age, sex, settlement and projection up to the Year 2027 which are discussed in this section. The 2019 Kenya Population and Housing Census statistics forms the basis for the population projections. The county’s annual population growth rate is estimated at 2.2%.

1.5.2 Busia County Population Age Structure

Table 4: Population Projections (by Sub-County and Sex)

Sub-county	Census (2019)			Projection (2022)			Projection (2025)			Projection (2027)		
	M	F	T	M	F	T	M	F	T	M	F	T
Busia	69,034	73,373	142,407	73,358	77,970	151,328	77,683	82,566	160,249	79,237	84,217	163,454
Teso North	66,142	71,619	138,031	70,286	76,107	146,680	74,430	80,897	155,327	75,849	82,584	158,433
Teso South	80,484	87,630	168,114	86,602	92,045	178,647	90,568	98,610	189,178	92,379	100,582	192,961
Nambale	52,900	58,732	111,632	56,216	62,413	118,629	59,530	66,092	125,622	60,720	67,414	128,134
Butula	65,136	75,195	140,331	69,217	79,907	149,124	73,298	84,617	157,915	74,764	86,309	161,073
Samia	50,821	56,341	107,162	54,011	59,878	113,889	57195	63,408	120,603	58,339	64,676	123,015
Bunyala	41,465	44,511	85,976	44,063	47,300	91,363	46,660	50,088	96,748	47,593	51,090	98,683
TOTAL	425,982	467,401	893,653	453,889	495,772	949,661	479,517	526,124	1,005,641	494,922	530,832	1,025,754

According to the 2019 Kenya Population housing and census estimate shows that Teso South sub county has a higher population of 168,114 with 80,484 male and 87,630 female. Bunyala sub county has lower population estimate of 41,465 with the population of male and female estimate is 41,465 and 44,511 respectively. Population projection estimate at the end of the 2027 year still shows Teso South has the highest population because of external migration into the sub-county, establishment of schools in the area and increased birth rate.

1.5.3 Population Projections by Age Cohorts

The 2019 population estimate of Busia County was 893,653 with 467,401 (52.30%) female and 426,252 (47.70%) male. By the Year 2025, the population is projected to grow to a total of 1,005,542 that is, male (496,361) and female (509,181). The table below presents the county’s population projection by gender and age per cohorts.

Table 5: Population Projections Age by Age Cohort

Age Cohort	Census (2019)			Projection (2022)			Projection (2025)			Projection (2027)		
	M	F	T	M	F	T	M	F	T	M	F	T
0-4	56,315	56,989	113,304	65,576	66,242	131,818	64,252	65,114	129,366	64,340	65,217	129,557

Figure 3: Population Pyramids

1.5.4 Population Projection by Urban Centers

The County has various urban centres that is: Busia, Bumala, Nambale, Port Victoria and Malaba. For an urban Centre as per the Urban Areas and Cities Act 2011, the minimum population threshold is 10,000 people.

Table 6: Population Projections by Urban Area

Urban Area	Census (2019)			Projection (2022)			Projection (2025)			Projection (2027)		
	M	F	T	M	F	T	M	F	T	M	F	T
Busia	22,774	23,640	46,414	25,392	26,357	51,749	28,311	29,387	57,698	31,565	32,765	64,330
Bumala	5,439	6,442	11,881	6,064	7,183	13,247	6,761	8,009	14,770	7,538	8,930	16,468
Nambale	9,875	10,989	20,864	11,010	12,252	23,262	12,276	13,660	25,936	13,687	15,230	28,917
Port Victoria	8,987	9,505	18,492	10,020	10,598	20,618	11,172	11,816	22,988	12,456	13,174	25,630
Malaba	7,220	7,696	14,916	8,050	8,581	16,631	8,975	9,568	18,543	10,007	10,668	20,675
Total	54,295	58,272	112,567	60,536	64,971	125,507	67,495	72,440	139,935	75,253	80,767	156,020

Source: KNBS

From table 6 above, there has been increase in the population in urban centers in Busia County as compared to the previous 2009 census. Busia town has the largest number of population with a total of 46,414 while Bumala town has the lowest population level of 11,881. Migration to urban centers is one of the causes of increased population in urban centers the reason being in search of better standards of living, employment opportunities, and better education among others.

1.5.5 Population Density and Distribution

Table 7: Population distribution and density by Sub-County

Sub County	2019 Census			2022 (Projections)			2025 (Projections)			2027 (Projections)		
	Area (KM2)	Population	Density	Area (KM2)	Population	Density	Area (KM2)	Population	Density	Area (KM2)	Population	Density
Bunyala	192.2	85,977	447	192.2	91,363	475	192.2	96,748	503	192.2	98,683	513
Matayos	196.0	142,408	727	196.0	151,328	772	196.0	160,249	818	196.0	163,454	834
Nambale	238.1	111,636	469	238.1	118,629	498	238.1	125,622	528	238.1	128,134	538
Samia	262.4	107,176	408	262.4	113,889	434	262.4	120,603	460	262.4	123,015	469
Teso North	261.0	138,034	529	261.0	146,680	562	261.0	155,327	595	261.0	158,433	607
Teso South	302.9	168,116	555	302.9	178,647	590	302.9	189,178	625	302.9	192,961	637
Butula	243.6	140,334	576	243.6	149,124	612	243.6	157,915	648	243.6	161,073	661
Total		893,681			949,661			1,005,641			1,025,754	

Source: KNBS

As shown in table 7 above, Teso South will continue being the most populous Sub - County with 192,961 persons while Bunyala will have the least number with 98,683 persons by 2027. All the sub counties are expected to grow, and that none of them is expected to experience population decline at any point during the medium term. According to 2019 Census report, the densely populated Sub County was Matayos Sub County with 727 persons per Square Km while the less densely populated Sub County was Samia Sub County with 408 persons per Square Km. The high population density in Matayos Sub County could be attributed to Matayos being the Head Quarters for Busia County hosting Busia town.

There is need to allocate more resources for WASH programmes to ensure good sanitation and hygiene conditions. This will consequently reduce the risks of break-out of communicable diseases. Samia is less densely populated as compared to all the other sub counties which implies that there is potential to tap agriculture development due to availability of surface space and being a semi-arid area, irrigation-based farming is highly encouraged.

The population density is important determining factor for business and marketing planning as it allows planners to choose location for a business that is accessible to the largest amount of people. In planning, population density is a critical factor, if it is too sparse, the efficiency is lost and when it's too dense then it becomes an impossible and uncomfortable habitat to live in resulting in squatters and traffic and human jams.

1.5.6 Population Projection by Broad Age Groups

Table 8 presents population projections by broad age groups, namely; under 1 year, under 5 years, pre-school age (as per 8-4-4 education system), primary school age (6-13), secondary school age (13-19), the youth (15- 29), the female child-bearing age (15-49), the Labour force (15-64) and the aged, 65+.

Table 8: Population Projections by Broad Age Groups

Age Group	2019 (Census)			2022 (Projection)			2025 (Projection)			2027 (Projection)		
	M	F	TOTAL	M	F	TOTAL	M	F	TOTAL	M	F	TOTAL

Source: KNBS

Population projections are done for many reasons among them; Planning for development- which is the most obvious and frequent use, Advocacy- especially where there is a negative impact of a particular phenomenon on population or vice versa, Research- researchers use projections to try and answer questions that relate to the future economic and social development and lastly, Monitoring and evaluation- the county governments can use the projections to keep track of achieving development targets which they are committed to.

Under 1 population.

As per the 2019 census, Busia County had 21,194 under ones, constituting 2.4% of the total population. This was estimated to grow to 22,530 in 2022, 47,698 in 2025 and decline to 24,729 in 2027. The infant mortality rate for Busia currently stands at 98 deaths per 1000 live births. For Busia County to achieve SDGs target of 12 deaths per 1000 live births by 2030, it is imperative that the government of the day plans for better neo-natal services by improving health services across the county.

Under 5 population

In 2019 census, under 5 population stood at 113,304 accounting for 12.7% of total population. This was expected to rise to 131,818 in 2022 and reduce to 129,366 in 2025 and slightly increase to 129,557 in 2027. Although numbers are projected to reduce, they are still relatively high accounting for over 12 % of the population. The county government has to plan for sufficient immunization, allocate resources for malaria alleviation programmes, for the under 5s are still very vulnerable and plan for ECDE by putting up more infrastructure and employing more ECDE teachers.

Pre-school (3-5 years)

Busia County had 71,058 (8.0%) persons in this age bracket according to 2019 census. This was estimated to increase to 77,909 in 2022 and 78,034 in 2025 and 77,726 in 2027. The county has to plan for more infrastructure in ECDE and recruitment of more teachers in readiness for increased enrollments. The county needs to enhance nutrition programmes for this age group because existing evidence shows that malnutrition is one of the contributors of multi-dimensional poverty among children in Busia County.

Primary school (6-13 years)

This cohort accounted for 24.1% of the population standing at 215,517 persons. It is estimated that this will grow to 197,649 in 2022, to 202,258 in 2025 and eventually 203,239 in 2027. There is a likelihood of straining on resources in primary schools. Going forward, the county has to invest more in primary education by planning for more learning infrastructure and better water, hygiene and sanitation (WASH) facilities in schools and public utilities and markets.

Secondary school (13-19 years)

This population age bracket stood at 215,517 in 2019 Census. This was projected to drop to 197,649 in 2022, grow to 202,258 in 2025 and 203,239 in 2027. This has implications on the county planning in the sense that resources have to be allocated to programmes affecting persons under this age group which is a very vital stage of a person’s life. In this age group, there is likely to be an increase; in cases of school dropouts, early pregnancy and early marriages among girls, substance and alcohol abuse.

To ameliorate the situation, the governments have to invest in programmes such as; improving secondary school infrastructure to accommodate more youths in schools, putting up social amenities such as sports stadia to tap on talents and engage them more during leisure time, carrying out awareness on sexuality through sex education and undertake campaigns on alcohol, drug and substance abuse and distribution of sanitary towels to curb cases of *sex for pads*.

Female Reproductive Age Group (15-49):

This age cohort stood at 217,027 as per the 2019 census and was predicted to grow to 237,495 in 2022 and 276,017 in 2027. With a relatively high fertility rate of 3.5 live births per 1000 women, in 2019 slightly higher than the national rate of 3.4 live births per 1000 women, Busia County is likely to witness a substantively high population growth. This will yield more pressure on the available resources in the county.

To curb this, the county government will put in place sufficient mitigating measures that may include but are not limited to; carrying out advocacy on teenage pregnancy and investing more in birth control mechanisms for all women in the child bearing ages. Further, the government will proactively pursue girl-child empowerment specifically through education. Measures will also be should put in place to encourage the girl child to pursue education to higher levels. This is because there is evidence to show that the higher a woman’s level of education the smaller the number of kids she gives birth to.

Economically Active Population (15-64 years)

Economically active persons, otherwise known as the labour force, in Busia County was at 475,800 (53.2%) in 2019. This cohort was estimated to balloon to 534,706 in 2022. The county labour force is estimated to grow to 582,317(57.9%) and 613,511 (58.9%) in 2025 and 2027 respectively. The county government has to leverage on this large proportion of economically active population. This will particularly be achieved through, diversification of agricultural activities to engage as many people as possible especially those who are not in formal employment. The same will be achieved through labour intensive industrialization that will create both formal and informal employment and expansion of the services sector. Currently, there are only a few major industries in Busia County that include; Busia sugar, Olepito Sugar Company and Deluxe maize flour milling company among others and retail and wholesale trade.

The aged (65 and above)

Persons in this age cohort were 38,323 in 2019. This was estimated to grow to 36,473 in 2022 and to 40,669 in 2025. It was projected that persons in this age group will be 43,985 in number in 2027. Majority of the people in this age category are either retired from employment or can’t actively participate in meaningful economic activities. This has implications of increasing the dependency ratio. Higher dependency ratios pile pressure on economically active population for they have to fend for the aged persons’ basic needs and settle hospital bills. To blunt effects of this, the county government will put in place measures such as social protection programmes such as cash transfers and homes for the aged and affordable health insurance cover and age related services for the elderly.

1.5.7 Population of Persons with Disability

Disability has been identified as a cross cutting issue that needs to be mainstreamed in the national and County government policies, plans and programmes. Furthermore, the Bill of Rights anchored under Chapter Four of the Constitution 2010 recognizes the fundamental human rights and freedoms of all persons without discrimination of any kind. The objective of disability mainstreaming is to ensure that institutions embrace the Principal of Universal Design, Reasonable Accommodation and setting up an atmosphere that accelerates needs and aspirations of Persons with Disability (PWD).

Table 9: Population of Persons with Disability by Type and Sex

Disability Type	Bunyala		Matayos		Butula		Nambale		Samia		Teso North		Teso South		Total

Source: KNBS

The total number of PWDs in Busia County as per the KNBS 2019 Census shown above is 29,389 constituting 3.3% of the county population. This is a reduction from 39,196 reported in 2009 Census. The reduction may be attributed to improvement in human welfare brought about by increased awareness and provision of better medical services. The county will put in place the following measures and programmes to ensure inclusion of the needs and interests of PWDs; Establishment and operationalization of Disability Mainstreaming Committee, Establishment of structures and systems that ensure PWDs access information and services, ensuring there is no discrimination in opportunities, formulation of Disability Mainstreaming Action Plan to ensure staff are informed on disability related aspects and empowering of PWDs.

1.5.8 Demographic Dividends Potential for Busia County

The demographic dividend is a temporary opportunity for faster economic growth that begins when fertility rates fall, leading to a larger proportion of working-age adults and fewer younger dependents. It occurs when a falling birth rate changes the age distribution so that fewer investments are needed to meet the needs of youngest age groups and resources are released for investment in economic development and family welfare.

Table 10: Demographic Dividend Potential

Category	2019	2023	2024	2025	2026	2027
Population size		625,765	631,045	636,325	641,126	645,928
Population below 15(%)	39.06	33.53	33.32	33.12	32.81	32.50
Population 15-64 (%)	53.44	58.31	58.58	58.85	59.19	59.52
Population above 65 (%)	7.51	8.16	8.10	8.04	8.00	7.97
Dependency Ratio	87.14	71.49	70.70	69.93	68.95	68.00
Fertility Rate	3.5	3.3	3.3	3.3	3.2	3.2

Source: KNBS

Busia county has a relatively youthful population as shown in table above. In 2019, about two (2) in five (5) people in the county is child less than 15 years. This has a huge burden on the county resources because a considerable proportion has to be invested in child education, health, nutrition leaving little for investments into agriculture, business and industry. This does not provide opportunity for harnessing the demographic dividend. However, it is worth noting that by 2027, the county shall have increased its working age population to about 60%. Although this is good progress in reducing dependency, more still needs to be done in reducing fertility so that more people fall within working age. To successfully achieve demographic dividend, Kenya and by extension Busia County need to invest in the following areas:

- 1. Family planning
- 2. Health
- 3. Education, training, and skills
- 4. Economic empowerment
- 5. Good governance

The transition from high fertility to low fertility offers policymakers a window of opportunity to transform the county’s economic performance through appropriate policies. The demographic window for Busia County is expected to open in between 2041-2045. This is a period when the county can achieve maximum pace of economic growth as a result of huge labour force relative to dependent population.

1.6 Human Development Index

The HDI is a summary measure of average achievement in key dimensions of human development: **a long and healthy life, access to knowledge and a decent standard of living**. A long and healthy life is measured by life expectancy. Knowledge level is measured by mean years of schooling among the adult population, which is the average number of years of schooling received in a life-time by the people aged 25 years and above; and access to learning and knowledge by expected years of schooling for children of school-entry age. Standard of living is measured by the Gross National Income (GNI) per capita expressed in constant 2017 international dollars converted using purchasing power parity (PPP) conversion rates. Kenya’s HDI value for 2019 is 0.601— which puts the country in the medium human development category.

Table 11: Kenya’s HDI trends based on consistent time series data and new goalposts

Year	Life expectancy at birth	Expected years of schooling	Mean years of schooling	GNI per capita(2017 PPP\$)	HDI Value
1990	57.4	9.1	3.7	3,096	0.482
1995	53.5	8.7	4.5	2,867	0.468
2000	50.9	8.3	5.3	2,991	0.461
2005	54.7	9.4	5.8	2,839	0.500
2010	61.0	10.7	6.1	3,317	0.551
2015	64.8	11.7	6.3	3,776	0.587
2016	65.4	11.6	6.4	3,895	0.591
2017	65.9	11.5	6.5	3,969	0.595
2018	66.3	11.4	6.6	4,135	0.599
2019	66.7	11.3	6.6	4,244	0.601

The Busia County HDI is at 0.43 which is below national average of 0.60. It is still the lowest Compared to the neighbouring counties; Bungoma, Siaya, Kakamega and Vihiga, which stand at 0.48, 0.44, 0.48 and 0.50 respectively. Appreciating that HDI in the county has to be improved to reflect on improved welfare of the people; the County Government will continue to put in place measures especially in health, education, poverty reduction and wealth creation. Busia County critical Human Development Indicators are: life expectancy, infant mortality, adult literacy, school enrollment, retention, performance, and transition in primary, secondary and tertiary levels, gender parity and GDP per capita.

According to the latest WHO data, National life expectancy is 66.7 years which gives Kenya a World Life expectancy ranking of 140. The County’s life expectancy is 64.3 years. The infant mortality in the county is estimated at 84/1000 against a national average of 31/1000. The County literacy level stands at 75.3% of population aged 15 years and above as compared to 81.5% at national level. Further, 19.9% of male and 18.4% of female aged 3 years and above have completed secondary education in Busia county as compared to 25.0% for male and 24.1 % for female at national level. Also, 55.3% of male and 58.7 % of female aged 3 years and above have completed primary education as compared to 48.7% of male and 50.9 % for female at national level.

1.7 Busia County Poverty Profiles

The most recent estimates from KNBS Kenya Poverty Report 2021 shows that poverty level in Busia County has dropped to 58.3 from 69.3 in 2015/2016 survey. However, the monetary poverty rate for Busia is slightly high at 68.2% which is nearly twice the national rate of 35.7% with approximately 609,070 people in Busia being monetarily poor. Busia has a multidimensional poverty rate of 70%, which is 2-percentage point higher than the monetary poverty rate of 68.2% with a total of 625,114 people being multi dimensionally poor. When disaggregated by age groups, 63.8% of children in Busia are multi dimensionally poor. This is

11-percentage points higher than the national average of 52.5%. Among the youths, 74% are multi dimensionally poor compared to a national average of 48.1% while for the elderly population, 68% are multi dimensionally poor compared to a national average of 55.7%. Among children aged 0-17, the core drivers of multidimensional poverty are housing (89%), nutrition (66.8%), information (55.3%) and sanitation (40.2%). For youths aged 18-34, the core drivers of multidimensional poverty are housing (84%), education (70%), nutrition (66%) and economic activity (43%). Among adults aged 35-59, the core drivers of multidimensional poverty are economic activity (89%), housing (87.5%), education (84%), and nutrition (62.5%). Among the elderly aged 60+, the core drivers of multidimensional poverty are housing (89.1%), nutrition (81.4%), education (57.7%) and sanitation (40.7). According to KIHBS report for 2015/2016, Busia county poverty level stood at 69.3%.

In KNBS' policy brief on Busia County poverty profile conducted in 2020, analysis of two-wellbeing measures on monetary and multi-dimensional poverty that were carried out using KIDHS 2015-2016 and data measuring monetary and multi-dimensional poverty among children aged below 5 years and aged between 5 and 17 years using age specific indicators across 7 dimensions of wellbeing: nutrition, health, physical development, education, child protection, sanitation and housing account for children's differing life cycle needs. Multi-dimensional poverty conducted among women between ages 18-59 years was also measured using indicators in dimensions of nutrition, education, sanitation and housing. Monetary poverty for women was further measured using absolute or overall poverty line of monthly adult equivalent of consumption of below Kshs. 3,252 in rural and peri-urban areas and below Kshs. 5,995 in urban areas. Based on analysis of results, around 6 out of 10 children in Busia County are multi-dimensionally poor compared to national average of 5 out of 10 children. The rate for Busia County is 9 times higher than Nairobi County with the lowest poverty rate.

Multidimensional poor children are also deprived on average of 3.8 out of 7 basic needs and services which is lower than national average of 4.1. The monetary child poverty rate was estimated at 73% that is above national average of 42%. Further, poverty overlaps in Busia County are quite high as almost 5 out of 10 children are both monetary and multi-dimensionally poor. Only 12.8% are multi dimensionally poor but not monetary poor pointing to challenges with basic services accessibility and availability or lack of awareness on the importance of certain basic services. Around 22.1% of children are monetary poor but not multi dimensionally poor suggesting that parents prioritize children's basic needs or some basic services are free of charge.

Only 14.1% of children are neither monetary nor multi-dimensionally poor. This is however below the national average of 35%. Further deprivation rates are higher than national average for dimensions of nutrition, housing and education. More than 9 out of 10 children are deprived from adequate housing, and 7 out of 10 children suffer from deprivation in nutrition (74%) for children between 5 and 17 years. The highest deprivation rates are observed in dimensions of housing (89%), Nutrition (67%), and information (55%). Overall Busia County records significantly highest deprivation rates in the respective dimensions of children in both age brackets.

With respect to women, multi-dimensional poverty incidences are higher than national average. Almost 8 out of 10 women (79%) are multi dimensionally poor representing more than 4 times the rate of the best performing county (Nairobi). The multidimensional poor women are deprived of 4.5 basic needs and services out of 7, which is higher than national average of 4.3. The Monetary poverty rate among women stands at 63% (higher than national average) and more than 4 times that of Nairobi (15%). Around 55% of women in Busia County are both monetary and multi- dimension-ally poor. Another 23.7% are only multi-dimensionally poor but not monetary poor, implying that financial means alone do not ensure access to basic services. Only 8% are monetary poor but not multi dimensionally poor.

Only around 1 out of 10 women are neither poor in monetary and multi-dimensional terms. This is lower than the national average of 30%. Deprivation rates in dimensions of women rights and fulfillment of basic needs are high in Busia County than the national average from housing,

education and nutrition. The deprivation rates are significantly higher than the top performing counties of Nairobi, Nyandarua, Nyeri and Taita Taveta. The highest deprivation is recorded in dimension of housing where more than 8 out of 10 women are deprived. The deprivation rate in education (78%) is significantly higher in Busia than elsewhere in the country. The foregoing call for policy implications to inform planning, budgeting and monitoring to improve the wellbeing the people. There is overall need for the county Government to put in place measures to reduce multi-dimensional and monetary poverty rates by considering the following;

- Improving access to adequate nutrition, among women and children by investing in priority sectors of housing, sanitation, education and health and intervening to improve child protection outcomes and expanding access to information,
- Improving women's labour market outcomes (participation and income generation) through adult literacy, numeracy, and skills enhancement programmes especially considering the spillover effects on the children's wellbeing,
- Diversifying livelihoods opportunities and strengthening women access to markets to support women's economic empowerment and simultaneously tackle poverty,
- Adopting integrated approaches towards tackling multi-dimensional and monetary poverty among women and children through multi sectoral interventions with involvement of non-state actors;
- Scaling up children and gender sensitive social-protection programmes given the high rates of monetary and multi-dimensional poverty among women and children; and,
- Investing in improving accessibility, availability and affordability of basic services that enhance human capital development and reduce risks of inter-generational poverty.

2 Overview

This chapter provides a review on implementation of the previous CIDP for 2018-22. It presents analysis of the county’s performance in terms of revenues, expenditures and key development projects and programmes outcomes as well as highlighting major challenges and emerging situations that were faced during implementation of CIDP for 2018-2022.

2.1 Analysis of County Revenue Sources

Table 12: Analysis of the County Revenue Sources

Revenue Sources	Revenue Projections (Ksh. Million)					Actual Revenue (Kshs. Million)				
	FY 2017/2018	FY 2018/2019	FY 2019/2020	FY 2020/2021	FY 2021/2022	FY 2017/2018	FY 2018/2019	FY 2019/2020	FY 2020/2021	FY 2021/2022
Equitable Share	5,828.6	5,966.0	6,013.50	6,108.45	7,172.16	5,871.38	5,966.0	6,013.50	6,013.50	6,598.39
Conditional Grants (GoK and Development Partners	1,146.95	728.80	795.57	989.58	695.31	961.52	580.59	756.43	761.84	244.90

County Treasury

2.1.1 Own Source Revenue

This is money that is derived by or on behalf of the County Government from the levies, rates, fees, charges or any other source as authorized by Article 209 (3) of the Constitution of Kenya, 2010. The county heavily relied on the levy rates on entertainment taxes and other charges and single permits for its services. During the period 2017-2022, the County Government adopted electronic payment mechanisms and improved monitoring systems for charges, permits and fees.

The County Government projected to collect a total of Kshs 3.5 Billion from local sources that were planned to support priority programmes and projects identified for implementation over the plan period. The actual own source revenue collected amounted to Kshs 1.4 Billion for the period under review which fell short of target by 60%. This shortfall is attributed to; the huge untapped revenue streams potential like Trailer Park fees and valuation roll, overstatement of the local revenues; non performing revenue streams and revenue leakages and outright theft of revenue arising due to weak internal controls.

Figure 4: Own Source Revenue

Source: County Treasury

2.1.2 Equitable Share

These are transfers from the National Government of revenues collected nationally and allocated to County Governments. It forms the main source of revenue that finances both recurrent and capital development expenditures of the County Government. The county receives direct transfers to the County Revenue Fund (CRF) Account from National Government in each financial year. By the end of the period under review (2017/2018-2021/2022), the total equitable share received by Busia County Government amounted to Kshs 30.5 Billion

Figure 5: Equitable Share FY 2017-2022

Source: County Treasury

2.1.3 Conditional Grants

These are funds received in form of grants or donations from development partners/donors in collaboration with GoK and are spent in accordance with Articles 221 and 223 of the Constitution and PFM Act regulations and approved by Parliament. During the period under review, Busia County government budgeted for Kshs 4.4 Billion as grants but received Kshs 3.3 Billion.

Figure 6: Conditional Grants FY 2017-2022

2.2 County Budget Expenditure Analysis

Table 13: County Expenditure Analysis

Sector	Total Budget Allocation (Ksh in millions)	Total Actual Expenditure (Ksh in millions)	Variance	Absorption rate (%)	Remarks
Agriculture, Livestock and Fisheries	4,529.95	2900.69	1,532.92	64.3	Low absorption rates partially attributed to delays in disbursement of funds from the National Treasury
Trade, Investment, Industry and Co-operatives	1,256.38	507.57	749.83	39.24	On average, the sectors absorption rate was below planned target majorly contributed by delays in disbursement of funds
Education and Vocational Training	3,464.2	2261.4	1202.8	65.2	Delay in disbursement of capitation and inadequate resources to implement departmental programmes and project
Finance and Economic Planning	5,320.44	5,026.28	294.16	94.47	High absorption of over 95% of the budget was largely on recurrent expenditure
Sports, Culture and Social Services	879.73	660.52	219.20	75	On average, absorption rate was below the target but above average. This was caused by delays in disbursement of funds.
Infrastructure and Energy	5,874.52	3,645.88	2,228.63	62.06	Absorption rate on average below planned target caused by delays in disbursement of funds.
Public Service and Administration	1,349.13	1,115.82	233.31	82.71%	Absorption rate on average below planned target caused by delays in disbursement of funds.

Sector	Total Budget Allocation (Ksh in millions)	Total Actual Expenditure (Ksh in millions)	Variance	Absorption rate (%)	Remarks
Lands, Housing and Urban Development	2176.78	792.71	1384.07	36.41	Long procurement processes, delays in disbursement of funds and Covid-19 Pandemic measures led to low absorption of funds.
Water Irrigation, Environment and Natural Resources	3,033.28	2,056.23	977.05	71.27	Absorption rate was below planned target due to; delays in disbursement of funds to execute development budget and long procurement processes
Health and Sanitation	11,494.34	9,166.55	2,164.68	79.75	Absorption below target mainly attributed to low absorption on development budget. This was due to delays in disbursement of funds and slow procurement processes leading to delays in execution of budgets
County Public Service Board	357.18	316.89	40.29	88.72%	Absorption rate on average was below target caused by delays in disbursement of funds.
The Governorship	2,212.61	1,731.35	481.26	78.25%	Absorption rate on average was below target caused by delays in disbursement of funds.
	840	715.5	124.5	85.18	All key projects budgeted for were undertaken and completed.
Total	41,948.54	30,181.89	11,508.20	71.95%	

2.3 Sector Programmes’ Performance Review

2.3.1 Agriculture, Livestock and Fisheries

During the period under review, there was an increase in production of the following major crops; Maize, sorghum, cassava and sweet potatoes. Maize increased by 111% from 31,723 tons to 67,137 tons against a target of 57,313 tons, sorghum by 1.8% from 7,227 tons to 7,354 tons against a target of 14,665 tons, Cassava by 172% from 55,410 tons to 150,694 tons against a target of 162,879 tons and Sweet Potatoes from 23,280 tons to 72,122 tons against a target of 71,569 tons.

The increase in production was attributed to the following interventions implemented by the sector; input subsidy programme that targeted vulnerable farmers where over 21,500 farmers benefited from certified maize seeds, fertilizer, cassava cuttings, Robusta coffee seedlings and fruit seedlings (avocado, mangoes and tissue culture bananas); promotion of agricultural value chains by the county government and development partners such as KCSAP; subsidized Agriculture mechanization services where ploughing was done at subsidized rates of Kshs 2,000 per acre; acquisition of five additional tractors to aid in mechanization that led to increase in the proportion of land cultivated by 27% from 155,990 acres to 188,240 acres; additionally, various technologies were adopted that enhanced crop production where 6 new technologies were promoted that included; Cassava Harvester, BT Cotton, Aflasafe, Polymer, Mechanical weeder and mechanical chipper; provision of credit facilities where a total of 1,830 farmers benefited from agricultural credit; enhanced extension services and collaboration with development

partners in implementation of Agricultural projects like ASDP, KCSAP, Nutrition in City Ecosystem

During the period under review, there was increase in production of the following livestock products; Milk, Pork, poultry meat and eggs. Milk increased by 78% from 17.1 Million litres to 30.4 Million litres against a target of 20.8 Million litres, Pork increased by 85% from 1,249 tons to 2,310 tons against a target of 1,511 tons, Poultry meat increased by 108% from 913 tons to 1900 tons against a target of 1,105 tons and Eggs increased by 46% from 0.96 million trays to 1.4 million trays against a target of 1.2million trays. The increase in livestock production was attributed to the following interventions; the County heifers Programme that facilitated supply of 1265 dairy heifers that supported 1886 farmers, supply of 765kg of fodder seeds to beneficiaries that enabled establishment of 234 acres of fodder, training of over 40,000 farmers on adoption of improved livestock husbandry practices, upgrading of indigenous cattle through breed improvement Programme in partnership with RTI/KCDMS, ILRI and FIPS Africa that contributed to improved quality of the dairy herd, distribution of 1,172 improved pig breeds to farmers and pig feeds, existence of a pig cooperative that supports pig farmers in accessing pig feeds and marketing of their products, operationalization of 20,000 egg capacity Poultry Hatchery in Bunyala and Teso South Sub Counties, stakeholders' support including KCSAP, FAO, USAID4TheCHILD, and NGAAF that supplied breeding stocks and incubators to the farmers in the respective sub counties and the county vector control initiatives in partnership with Kenya Tsetse and Trypanosomiasis Council (KENTEC) and Public Private Partnerships with the private AI service providers like Orion Farm-care Enterprises Ltd in breeding service delivery.

During the period under review, the volume of fish produced increased from 5,738 tons to 16,097 tons against a target of 6,857 tons for landed fish and from 71 tons to 312 for Aquaculture against a target of 90 tons. The increase in volume of fish produced was attributed to several interventions by the county government; among them being adoption of cage fishing with 243 cages currently operating at Lake Victoria whose returns have not only attributed to increase in volume of fish produced but has also supported over 428 fisher folk children to secondary schools; establishment of 290 cluster production ponds across the county; establishment of four (4) aqua parks in Bunyala, Samia, Butula and Teso South sub counties with a total of 270 production ponds, support from development partners such as KCSAP that helped in upgrading of the Wakhungu Fish Hatchery which has an annual production capacity of 1.5 million fingerlings and distribution of over 180 fish harvesting nets to small holder farmers; Aquaculture Business Development Programme (ABDP) that supported the small holder farmers with inputs such as predator nets and pond liners hence reducing fish mortality rates by 50%.

2.3.2 Trade, Investment, Industry and Co-operatives

The department realized improvements in business environment due to the following aspects; increased market development from 5 to 40 markets. The markets include Port Victoria market, Nambale Market Shed, Muruka market, Amukura market, Moding Market, Soko Posta, etc. Further, an improved business environment has been necessitated by increase in the number of business enterprises accessing credit from 0 to 196. There were significant improvements in creation of vibrant and sustainable cooperative movement for improved incomes. The improvements were influenced by development of 105 cooperative societies, from initial baseline of 0, disbursement of Kshs. 107,212,357 loans from an initial baseline of 0, and the provision of loans to 92 cooperative societies that included Farm-view Sacco, Bunotsa Sacco, Tangakona Commercial Village, Adungosi Dairy Farmers Cooperatives, etc., and the county's ability to contact 120 audits on cooperative loans. Increased consumer protection was enhanced due to improvement in the number of legal metrology equipment examined, tested and approved from a baseline of 890 to 1800.

2.3.3 Education and Vocational Training

In 2018, the county's gross enrollment rate in early childhood education was 62.24%. At the end of plan period, the rate stood at 77.50% against a target of 74%. This achievement can be attributed to various initiative that have been undertaken by the sector including construction of 282 child-friendly ECDE classrooms across the county, distribution of ECDE learning materials to 461 schools, Implementing ECDE Capitation program, promotional campaign encouraging parents to enroll their children to school once they reach the age and training ECDE teachers.

In 2018, the teacher-pupil ratio was 1:100, At the end of plan period, the ratio stood at 1:52 against a target ratio of 1:70. This was attributed to additional 575 ECDE teachers that were hired and deployed on permanent and pensionable terms hence bringing the total number of teachers in ECDE centers to 981.

Gross enrollment in Vocational training centers increased from 3328 students in year 2018 to 4171 students in the year 2022 against the target of 3379 students, this increment from the baseline can be attributed to subsidized tuition fees to trainees, enhancement of Busia County Education Support Scheme and subsidized vocational training support grant that was disbursed to 24 public vocational training centers across the county to support the purchase of learning materials, tools and equipment.

In 2018, the Teacher-student ratio in the county's vocational training centers was 1:60. At the end of plan period, the ratio stood at 1:30 against a target ratio of 1:40. This can be attributed to the recruitment of 142 instructors to bridge the training gap and boost service delivery and quality of training in the VTCs.

At the beginning of planned period the completion rate in our VTCs center was 42.62% at the end of the planned period the rate stood at 56.94% hence percentage increment of 14.32% this is attributed to; construction of workshop centers, equipping and purchasing of relevant tools to all VTCs and other infrastructural development has played a vital role in empowering our youths with relevant skills to be self-reliant.

2.3.4 Finance and Economic Planning

Under the review period of 2018-2022, Department of Finance Economic Planning and ICT committed to prudent financial management, enhanced formulation of sound economic policies and improved access to quality ICT services in the county.

The county total allocation for the 5-year period was Ksh 41.9 billion while expenditure stood at 30.1billion. This represented a 72% absorption rate. Health, Infrastructure and public works and agriculture were the departments with the highest allocation with Ksh 11.4 billion, 5.9Billion and 4.5 billion respectively. Lands, sports culture had the lowest allocation of Ksh 217 million and Ksh 879 million over the 5-year period.

In terms of absorption, health had the highest at Ksh 9.2 billion representing 79% while Infrastructure and roads sector had the lowest absorption rate of 62%; thus being able to utilize only Ksh 3.6 Billion of its allocation

Equitable share is the main source of financing to Busia County operations. From 2018 to 2022, this share steadily increased across the years rising from Ksh 5.8 billion in 2018 to Ksh 7.1 billion in 2022. Loans and conditional grants come in second with a total of Ksh 3.3 billion in the 5-year period under review.

Own source revenue increased from Ksh 176.4 million at the beginning of review period to Ksh 292.7 million representing a 39.7 % increase. This improvement is attributed to automation of revenue collection as well employment of additional revenue collection officers. However, this improvement reflects 11% of the county potential of Ksh. 853 million annually.

The county has continued to exercise prudent financial management. The county had adverse audit report in 2019/21 and improved to qualified report in 21/22, and is working towards unqualified audit report.

Pending bills significantly increased from 2018 to 2022. The county pending bills steadily increased over the period. At 2022, the pending bills had increased to KSh1.7 billion. Delays in disbursement of funds from the national treasury and unmet local revenue targets were pointed out as the main cause for the steep increase in pending bills. Asset management has remained in manual form for the past 5 years

Planning in the county improved significantly. Planning documents were prepared and approved on time as per public finance management act 2012. This included CIDP, ADP, CBROP, CFSP, Budget Estimates as well as medium and end term evaluation of CIDP.

The county also enhanced monitoring and evaluation of its projects through adoption of electronic County Integrated Monitoring and Evaluation Systems and passing of the Monitoring and Evaluation policy.

A statistical abstract was to be developed in the period under review. There was however no statistical abstract developed as there was no budget provided for the same.

Proportion of county officials using internet dropped from baseline of 9% to 2% this represents a 5 % decrease. This is attributed to limited budgetary allocation to facilitate rollout. The county had envisioned to automate 95% its operations by the end of the CIDP implementation period. This was however not achieved. Inadequate ICT infrastructure, outdated ICT software are the reasons behind the non-achievement of the set targets.

2.3.5 Sports, Culture and Social Services

Various activities, events and exhibitions were held that have led to cultural promotions and development. Some of the events include; KICOSCA/EALASCA, Hero's and Heroes, JAMAFEST, National day celebrations, Mr./Miss world contests, cultural festival, music festival, extravaganza etc. Busia County participated in Kenya music festival in 2018 in Meru County and won 2 trophies. This facilitated development of artistic potentials and talent among Kenyans for holistic growth attributing to cultural promotions.

In the plan period the Sports sector targeted to support 6 teams but was able to identify and only trained 3 teams for KSA games that include football, basketball and volleyball leading to sports promotion. There is percentage increase of PLWDs benefiting from grants from 20% to 50% thus increase PLWDs participating in economic activities and development leading to social development. The percentage of cases of child abuse has reduced from 80% to 65%. The number of children who access justice increased from 4,320 to 5,421 while the target was 8,354, where the cases have been handled and dealt with hence a reduction in cases of child abuse.

2.3.6 Public Works, Transport, Roads and Energy

The proportion of population with access to renewable energy stands at 78% up from a baseline of baseline 0.3 % against a target of 10%. This is largely attributed to setting up of 11 solar field generation plants by KUDURA Power East Africa, a renewable energy company in collaboration with the county government that has given birth to 41 micro grids across the county connecting 4350 households. The proportion of population with access to electricity stands at 56% up from a baseline of 0.2%. This is as a result of connections to the grid through collaboration with REA under the *matching fund* arrangements, which has enabled connection of 4600 households in the period under review. The national government has also played a major role in electricity connectivity through the *last mile* initiative. There has been substantive increase in proportion of rural populations who live within 2 km of an all-season road with Busia County having the road access index (RAI) of 89-97 % up from 50% in 2017.

The above is tied to a number of interventions among them; the county government has done approximately 700km of new roads up from the 500km at the beginning of the plan period (surpassing the target of 500km). Also, 10.491km of roads have been upgraded to bitumen standards adding to 8.8km done as at 2017 but falling short of the target of 95km. The county further graveled approximately 590.1 km of roads as compared to the 377 km that had been done at the beginning of the period under review. This was achievable largely, due to the availability of the Road Maintenance Levy Fund (RMLF). Further, the above interventions have instigated a consequential reduction in the rate of occurrence of road accidents resulting from road traffic and substantively reduced the cost of transport and time spent traveling.

2.3.7 Lands, Housing and Urban Development

During the plan period, the level of equitable and sustainable land use has risen to approximately 46% up from 30% in 2018. This is attributed to: purchase of 166.6 acres amounting to 38 parcels of land for the county development projects that include building of 4 polytechnics, 4 dispensaries, 6 markets, 2 milk parks, 2 water projects, 2 secondary schools and 18 land-banks in the various wards totaling to 25 acres. Thirty (30) market disputes were solved through completion of land survey processes like cases in, Sagania, Ganjala and Buloma markets and protection of 40 parcels of land from encroachment through fencing and installation of signages, a case in Musoma in Kingandole ward. These achievements have helped reduce distances travelled by residents to seek medical, school and water services, reduced boundary conflicts and secured interests in county land. In 2018, the standards of affordable and conducive living conditions in urban areas were very low (approximately 20%).

Various intervention measures have seen the level improve to approximately 40% over the 2nd CIDP period. The measures included among others: Installation of 80 solar lights across the county for instance at Siekunya and Maduwa in Nambale Township and six(6) high mass lights within the Municipality of Busia at Ojamii primary, Stadium, YMCA, Public works, Bus park area and Bulanda Primary; upgrading 2.6km gravel roads to bituminous standards along YMCA, police line and Alupe road 800m long which is in progress; construction of Malaba bus park which serves about 150 matatus every day; construction of 36 parking slots within the Municipality of Busia along Huduma Centre area-16 slots and around Bungoma line-20 slots and management of solid waste across the county through purchase of 2 tractors, 7 skip bins, 2 skip loaders and 300 bins and contracting 22 firms. These intervention measures have helped improve security in urban living environments, promoted safe, clean, resilient and sustainable urban areas for business and improved the livelihoods of urban residents by creating over new 2000 jobs.

2.3.8 Water Irrigation, Environment and Natural Resources

During the period under review, The County realized increased access to clean and safe water in both rural and urban areas. On average, the County water coverage stands at 60%. Urban water access increased from 19% to 47% against a target of 50% while rural water coverage increased from 56% to 76.4% against a target of 70%. Average distance covered by households to the nearest water point reduced from 1.2km to 0.5km against a target of 0.5km. This achievement is attributed to, utilization of drilling rig to develop water points across the county, development and operationalization of 189 solar powered boreholes, drilling and equipping 112 more boreholes with hand pumps and upgrading 48 boreholes to solar powered boreholes.

653 storage facilities were constructed with a cumulative 18,830M³ capacity and an estimated 400km of pipe network developed connecting approximately 3,000 households. In rural settlement, 132 alternative water sources such as springs and shallow wells, dams and pans were developed. In a move to cut electricity cost by 40%, Solar Tie Grid System in Mundika Treatment works was implemented. This has enabled access to water by 7,500 households in Matayos and Teso South Sub Counties within Busia Municipality.

The sector realized a 0.56% forest cover against a target of 4% and national forest cover of 10%. The tree cover increased from 8% to 8.4% against a county target of 10% and national level 12.13 %. This was as a result of; Increased afforestation through bamboo promotion and school greening programs targeting education centers, Re-afforestation of hill tops e.g., Odiado hills. Establishment of a tree Nursery at Headquarter which has ensured supply of tree seedling.

To create an enabling environment to mainstream climate change and ensure environmental protection, the sector formulated The County Climate Change Act, 2021, The County Forest Management Bill and The County Environment Policy. The Climate Change directorate was established and prepared the following bills and regulations; County Climate Change Fund Regulation, and Development of Busia County Climate Change Finance Policy which is in progress. The sector further developed an environmental social safeguards checklist to provide procedures to be complied with during implementation of the projects in various departments

Increase in Ha of rehabilitated and reclaimed wetlands increased from 10Ha to 16Ha against a target of 20Ha. This was achieved through bamboo planting in fragile ecosystems, establishing terraces and building gabions in Osipata, Odioi and Bunyala South.

2.3.9 Health and Sanitation

During the period under review, the health and sanitation sector had planned to improve the doctor to population ratio from the previous 1: 41,200 to 1: 25,000. At the end of the period, the sector managed to achieve an improvement of 1: 15,524 and a Nurse to population ratio of 1:1621 from 1:1706. Even though the sector’s doctor to population ratio is still way below the recommended WHO ratio of 1:1000 by 2020, there is a noticeable positive trajectory. The above achievements are attributed to the engagement of 63 doctors and 603 nurses whose main objective is to enhance access to health care and services. Among the 63 serving doctors are 14 medical officers who completed studies in various fields of medical specializations including pediatrics, gynecology, radiology, anesthesia, dermatology, clinical pharmacy among others.

Access to health services by residents has been enhanced by the increase in population enrolled in health insurance. As per NHIF data, 72,521 persons are enrolled as principals NHIF card holders in Busia county with a further 117,625 dependents. This translates to an improvement from 11% to 19.44% against a target of 40% between 2017-2022. This was achieved due to implementation of UHC agenda by the county government and Partners. Furthermore, the total number of health facilities increased from 82 (62 County government and 20 private facilities) in 2017 to 114 in 2022. This was contributed by construction of additional 32 facilities and upgrading of 17.

In reducing morbidity and mortality due to preventable diseases, there was a decrease in maternal mortality from 307/100,000 to 100 per 100,000 facility based MMR as compared to a national figure of 335 per 100,000. Proportion of births attended by skilled health personnel increased from 38.8% to 88 % as per KDHS 2022. This was achieved by recruiting and training of 2190 CHVs and training and deploying more nurse midwives, doctors, commodities and equipment to deliver maternity services. Under- five mortality rates at the beginning of the period was 149 per 1,000. At the end of the plan period the department managed to achieve an improved under-five mortality rate of 16 per 1,000 as per the KHIS data. This is due to interventions by the department including capacity building, level one intervention, community awareness creation and behavior change strategies with support from the partners.

In 2018, Malaria incidence per 1,000 populations was at 782/1,000. At the end of the plan period, the incidence stood at 448/1,000. This improvement was attributed to improved diagnosis as 44 of the 94 county health facilities undertake microscopy while the rest do rapid malaria diagnostic tests. Also 1800 CHVs are involved in malaria treatment at the community level and the

commodities have been provided across all the facilities. Furthermore, mass net distribution was undertaken in the months of May & June 2021 whereby 620,000 NETs were issued that have contributed to this great improvement.

Malnutrition aspects of stunting and wasting in children under 5 years of age was mitigated through nutrition programmes. Stunting prevalence level was reported at 15% (KDHS 2022) which is an improvement from the rate of 22% in 2014. However, the present rate of 15% still remains below the County target of 10% by 2022. Furthermore, while the present rate is slightly lower than the national stunting rate of 18% (KDHS 2022), the rate still remains undesirable. Wasting prevalence was at 2.8% (KDHS 2022) surpassing a target of 5% and national level of 4.9% (KDHS 2022). Underweight was reported at 6.3% against a national rate of 10.1%.

The sector undertook the following measures that led to this positive trend in nutrition status; through outreaches activities it enhanced capacity of health care workers and the CHVs in providing quality Maternal Infant and Young Child Nutrition (MIYCN) services, Baby Friendly Community Initiatives and promoted increased uptake of Vitamin A Supplementation (VAS); iron folic acid supplements among the pregnant women. Notable though, most of these activities were implemented through partners financial and technical support, a factor that is not sustainable and hence the need for sufficient county budgetary allocation to nutrition.

2.3.10 The Governorship

There has been percentage reduction of death due from disaster related incidences and insecurity from 80% to 20% caused by reduction in the number of deaths from 30 to less than 10 due to construction of 6 high mast lightning arrestors at Kakapel and Korisai primary schools with coverage of 3Kms² where 3,000 Pupils and 4,000 members of the public are covered and safe from lightning strikes. There is also reduction in economic losses as result of issuance of fire compliance certificates to businesses and purchase of two fire engines for Malaba and Busia towns.

The percentage of automation of the county processes has increased by 45% from 20% which has led by Installed IP surveillance (CCTV) and access control system at the county headquarter, installed internet within the Busia county referral hospital and automation of revenue collection to seal existing revenue leakages and loopholes. At the review period the percentage of citizen participation increased to 40% from 20% due to videos produced, broadcasting of radio and TV programmes and social media that contributed to increased awareness and access to information among the stakeholders

2.3.11 Public Service Board

In the period under review 2018-2022, the Board endeavored to promote sound labor relations in the work place by depicting consistency, transparency and fairness in discharging its mandate by enhancing good governance. Compliance Evaluation and Organizational Reviews enhanced the delivery of services to the public, it made the county staff more responsible and prudent in discharging of their duties. More staff were recruited and availed for training opportunities.

The board participated in the signing of performance contracts with His Excellency the Governor, cascaded the contracts to the board committees and to the secretariat. The board, also, advised the executive on various governance and human resource issues and monitored the implementation of the performance contracts. In partnership with the department of Public Service Management, the board generated regular quarterly returns, tracked number of people retiring and issued retirement notices. The board also ensured enlisting of all staff in welfare and pension schemes.

2.3.12 Public Service and Administration and Management

In the plan period 2018-2022, Public service management planned to provide strategic leadership to the County Public Service. The department was able to establish Human Resource Information Management System which is intended to improve access to information and make management of human resource data easy and efficient. Various staff undertook training hence reducing the relevant skills gap identified and thus improved their work productivity.

2.3.13 The County Assembly

During the period under review the County Assembly undertook more than eighty percent (85%) of the projects earmarked to be done. The newly constructed office block has substantially enhanced effective service delivery through creation of ample and conducive office space for MCAs and Staff. The time for production of Hansard reports has been considerably reduced due to the installed multimedia digital conference system. The assembly also endeavored to construct to completion the Speaker's residence in compliance with the directive of the Committee on Revenue Allocation.

2.4 Challenges

- ❖ Inadequate financial resources and delayed disbursement of funds to support sector's projects and programmes
- ❖ Limited opportunities for refresher training for technical staff across the sectors
- ❖ Porous borders promoting illegal movement of goods across the border hence affecting trading activities
- ❖ Poor road network that affect movement from one place to another and transportation of farm produce
- ❖ Inadequate ICT facilities to enhance digital learning in ECDE centers and Vocational Training Centers hampering digitization prospects.
- ❖ Inadequate human capital and basic utilities across the sectors
- ❖ Inadequate infrastructure to harness and maximize own source revenue generation from the various streams among them being Malaba and Busia Trailer Parks, Bus Parks, Private Vehicles Parking bays for side parking etc.
- ❖ Weak multi-sectoral linkages and cooperation in executing projects and programmes
- ❖ Lack of material testing laboratory for quality control and to enforce compliance with the standards for all works within the county.
- ❖ Encroachment of public land and delays in acquisition of land due to prolonged succession processes.
- ❖ Inadequate digital planning data and information.
- ❖ Lack of spatial plan that delays topographic, ecological and demographic planning.
- ❖ Dependence on hydro-electric power to automate water transfer which is very expensive hence reliability is reduced drastically due to frequent breakdowns and non-affordability of electricity bills (high costs of electricity)
- ❖ Unsustainable utilization of resources by the community e.g sand harvesting.
- ❖ Gaps in critical Health Workforce leading to low healthcare worker – patient ratio. In spite of heavy investments in infrastructure, including Intensive Care Unit and High Dependency Unit, their operations have been hampered by lack of the requisite number of staff to effectively run them. This has hindered provision of more specialized services by these units.
- ❖ Poor referral system leading to poor health outcomes including maternal deaths.
- ❖ Inadequate supply of health commodities (drugs and non-pharmaceuticals)
- ❖ High dependency on donors and partners to fund critical projects and programmes which creates uncertainty and affects sustainability in implementation of such programmes when donors pull out

- ❖ Competing interests by political players in prioritizing and distributing projects across the county,
- ❖ Inadequate Policy and Legal framework across the sectors

2.5 Emerging issues

1. **Covid -19 Pandemic;** The emergence of Covid 19 Pandemic greatly affected Kenya and the global economy. Lives were lost and various sectors' activities were disrupted hence affecting the implementation of various planned projects
2. **Abrupt changes in climatic conditions;** Prolonged droughts leading to low water levels in irrigation water storage reservoirs, reduced productivity in rain fed agriculture, drying of rivers, pasture and forage depletion among others which negatively affected crop production and productivity
3. **Competency-Based Curriculum (CBC) and Competency-Based Education and Training (CBET);** Kenya's education system is changing from 8-4-4 curriculum to CBC curriculum in basic education and CBET in technical education. The sector is actively participating at implementing these curriculums at both ECDE and VTC centers through provision of relevant learning training materials and training of teaching and training staff that attracted challenges such as minimal training of teachers on curriculum's content and teaching methods, inadequate instructional materials and lack of participation by parents.
4. **International dispute on fish trade (Kenya and Uganda);** During the period under review, an international dispute between Kenya and Uganda arose on fish exports that led to disruptions of cross border fish business and high losses reported. The Kenyan authorities through State Department for Fisheries and Busia County Agriculture Department lead by Director Fisheries and the Ugandan Authorities had bilateral talks and the matter was resolved.
5. **Ebola Pandemic;** In September 2022, the neighboring country of Uganda reported incidences of the disease posing a risk to the county residents as Busia County borders Uganda at Malaba and Busia towns. To curb and mitigate the disease, there was need to Strengthen Risk Communication and Community Engagement.

2.6 Lessons Learnt

- Strong intergovernmental relations and collaboration between the national and county government is necessary for efficient and effective development and implementation of sector policies, strategies, programmes and projects.
- A multi sectoral approach is essential for successful implementation of various sectors programmes and projects; especially the social sectors
- Evidence based planning and strengthening of monitoring and evaluation is vital for transformative development
- Capacity building is critical for successful implementation of county projects and programmes
- Public participation is essential in Project Cycle Management and effective service delivery to the public
- Partnerships with stakeholders lead to realization of sector goals and increased outputs through significantly contributing to the county resource basket thus bridging the gap of funding
- Adequate financial and political support is key towards realization of county development goals and objectives

- Quality and reliable statistical data for sectors is important in making informed decisions hence there is need to develop and support county statistical unit to establish a county repository center for effective planning and budgeting for the county.

2.7 Natural Resources

Table 14: Natural Resources Assessment

Name of Natural Resource	Dependent Sectors	Status, Level of Utilization; Scenarios for Future	Opportunities for optimal utilization	Constraints to optimal utilization	Existing Sustainable Management strategies
Lake Victoria	Fisheries Tourism/hospitality Irrigation Agriculture Transport Sports Trade	Declining fish stocks due to overfishing Water quality expected to deteriorate due to increased waste dumping and farming activities along the lake. Increased income and revenue generation due to increased trading activities	Encourage use of standard fishing gear Protect fish breeding sites Regulate fishing activities Best practices in waste water management Lake shores protection and conservation	Weak enforcement of laws and regulations Water levels declined Water quality deteriorated due to pollution Weak revenue collection streams	County Fisheries bill Monitoring of water levels and quality Regulated waste water and effluents. Extension services to cover waste water treatment management Integrated solid waste management Bill
Rivers (Malakisi, Nzoia, Sio, Walatsi)	Irrigation Transport Fisheries Trade Roads and infrastructure Mining	Encroachment on riparian land Pollution as result of solid waste dumping River bank degradation due to sand harvesting activities Reduction in water volume due to over utilization of streams on irrigation	Can support more food production through irrigation; Fish farming Riparian vegetation restoration hence conserving the water bodies Best practices in waste water management Regulating sand harvesting activities.	Siltation; deforestation along the river banks Reduced water volumes Increased volume of waste effluents to the river. Reduction of water volume due papyrus encroachment	Legal and policy enforcement River rehabilitation programme Sand harvesting and environment conservation Bill Integrated solid waste management Bill Busia county environment policy
Wetlands (Yala Swamp, Sio Siteko)	Irrigation Agriculture Tourism	wetland degradation due to farming activities Encroachment on riparian lands Reduction in biodiversity	Introducing suitable species such as bamboo Mapping and Gazette of wetlands to prevent encroachment Protection of the existing biodiversity	Reduced water volumes and Encroachment	Gazetting of wetlands RAMSA convention Sensitization on wetland managements
Hills Samia hill Odiado hill Amukura hill	Agriculture Tourism Trade Mining	Loss of biodiversity due to extraction and crushing of rocks Reduced vegetation cover due to clearing for farming activities Soil erosion	Afforestation and Reforestation Restricted anthropogenic activities	Encroachment Change in weather patterns Human-animal conflict	Forest Conservation and Management Bill Busia county environment policy Afforestation programs

2.8 Development Issues

Table 15: Sector Development Issues

Sector	Development Issue	Causes	Constraints	Opportunities
Agriculture, Livestock, Fisheries, Climate Change, Blue Economy and Agribusiness	Low Crop production and Productivity	Declining soil fertility	Unsustainable land use	Availability of input subsidies and credit institutions
		Inadequate access to quality and affordable farm inputs	Inadequate financial resources	Availability of public and private extension service providers
		Low uptake of certified seeds	Inadequate technical staff	Climate smart Agriculture Technologies
		Inadequate Agricultural Extension services	Inadequate policy framework	Existence of diverse climate change adaptation strategies
		Over reliance on traditional farming practices		Existence of climate change fund (GCF, FLOCA)
		Over reliance on rain-fed agriculture		Existence of Agriculture cooperatives
		High post - harvest losses		
		Emerging pests and diseases		
		Negative Effects of climate change		
	Low Fish production and productivity	Inadequate access to quality and affordable inputs (feeds and fingerlings)	Inadequate financing for the sector	Availability of development partners and non-state actors to support aquaculture
		Inadequate access to extension services	Inadequate technical capacity	Availability of climate smart technologies
		Negative effects of climate change (floods and drought)	High costs of inputs and raw materials	Favorable weather conditions to support culture of tilapia and catfish
		Use of tradition aquaculture technologies		Existence of fish Input Subsidy program
		High fish post-harvest loses		Availability of land for development of aquaculture
		Inadequate access to market for fish and fish products		Availability of water resources ie Lake Victoria, River Nzoia and River Sio development of open water (cages) and on land aquaculture parks

Sector	Development Issue	Causes	Constraints	Opportunities
		Inadequate access to affordable credit		Existence of fisheries cooperatives and BMUs
		Emerging fish parasites and diseases		
	Low Livestock Production/Production activity	High prevalence of Livestock pests and Diseases	Inadequate policy and legal framework	Existence of development partners to collaboratively establish livestock feeds infrastructure
		Inadequate pasture and fodder	Weak livestock statistics database	Availability Livestock research institutions in the County e.g. KALRO
		Over reliance on Indigenous breeds	High cost of breed improvement technologies e.g. Artificial Insemination	Existence of livestock cooperatives
		Inadequate farmers capacities(knowledge, technical skills, financial skills)	Inadequate financial resources	
		Inadequate livestock extension services	Weak linkage between research and extension services	
		Low value addition and processing		
		Inadequate market access for livestock and livestock products		
		Over reliance on tradition livestock keeping practices		
Water, Irrigation, Environment ,Natural Resources and Climate Change	Inadequate Access to clean and safe water	Inadequate water Infrastructure	Inadequate Technical Capacity	Presence of water resources
		Weak water Governance	Destruction of infrastructure by other actors	Existence of solar technology in the market

Sector	Development Issue	Causes	Constraints	Opportunities
		Water quality concerns	Inadequate resource allocation	Existence of stakeholders/collaborators/partners
		Non functionality of water systems	Capacity and unwillingness of consumers to pay for water services	Implementation of WASREB guidelines for rural and underserved areas
				WASREB sector benchmarks
				Water gravity flow systems as alternative to pumping
	Inadequate access to sewerage services	Inadequate sewerage infrastructure	Inadequate resources for Sewer development	Existence of stakeholders/collaborators/partners
	Environmental conservation and management	Inadequate environmental awareness	Inadequate funding to enforce the law	Existing of County Environment policy
		Increased environmental pollution control	Inadequate Technical Capacity	Advanced technology in waste management i.e., waste recycling.
		Weak environmental governance	Unreliable weather pattern	Established tree nurseries
		Catchment & watershed degradation	Invasion of parasitic species	Existing Partners/Collaborators
		Climate related hazards	Emissions from transport sector(tracks)	Existence of County Forest Bill
		Deforestation		Nature based enterprises
		Low locally led climate action		Climate resilient technology
	Inadequate access to irrigation water	Inadequate irrigation infrastructure	Inadequate Technical Capacity	Existence of water resources
		Weak governance structures	Inadequate funding	Existence of Partners/Collaborators
		Inadequate extension services on irrigation		Availability of irrigation schemes
Education and Vocational Training	Access to equitable and quality early childhood education	Inadequate ECDE infrastructure	Inadequate Financial resources	Existing Primary Schools;
		High cost of accessing education	inaccessibility to schools	Existence of Development partners

Sector	Development Issue	Causes	Constraints	Opportunities
			during rainy season	
		Inadequate teaching and learning materials	High poverty and illiteracy level among parents and guardians	Public private partnership
		Inadequate human resource	Lack of quality Assurance and standards officers (QUASO) and Ward Education Officers	Enabling environment
		Lack of school feeding program	Under developed digital learning in ECDE	National government funds
			Shortage of teachers including SNEs	Collaboration with MOE, Kenya institute of Curriculum Development (KICD) for in-servicing of teachers
			Inadequate engagement of parents and guardians in ECD	Availability of trained teachers who are unemployed
				CBC Curriculum designs available
				Existing colleges offering CBC Diploma courses
	Low access to equitable and quality VTCs Training	Inadequate VTCs infrastructure	Inadequate Financial resources	Existing VTCS and TTI institutions in all sub-county
		Inadequate human resource	High poverty , illiteracy level and ignorance among parents and guardians	Existence of Development partners
		Inadequate training and learning material	Lack of in-service training for instructors	Public private partnership
		High cost of Education	Limited land space for expansion of VTCs	Enabling environment

Sector	Development Issue	Causes	Constraints	Opportunities
		Mismatch between courses offered and labor market demands		National government funds
		Inadequate student financing		Availability of trained instructors who are unemployed
		Teenage pregnancy		Existing community driven home-craft centres
				Availability of youth funds and Social protection schemes: Afya Elimu, County HELB Revolving Fund for Colleges
				National and County government Support
Health and Sanitation	Inadequate access to quality curative and rehabilitative services	Inadequate capacity of emergency and referral services	Inadequate funds	Availability of specialized Health care workers
		Inadequate Rehabilitative Services (palliative, horse piece, physiotherapy and occupational therapy units)	Centralized procurement	Availability of policies and guidelines
		Inadequate diagnostic services (radiology, imaging, pathology and laboratory services)	Poor state of access roads	Decentralized decision making for health with devolution
		Low capacity to deliver Mental Health services	Inaccurate costing of projects leading to variations	Availability of Partners
		Inadequate specialized services (CT scan, Renal Units, Dental units, Eye clinics)	Lack of capacity by the contractors awarded tenders	
		High prevalence of injuries and Road Traffic accidents		

Sector	Development Issue	Causes	Constraints	Opportunities
		Inadequate quality standard of care		
		Limited infrastructure in tier 3 facilities as per the requirements for the relevant health facilities categorization e.g. laboratories, maternity wings, operating theaters, general wards, incinerators		
	Inadequate access and utilization of preventive and Promotive health services	Inadequate sanitation and hygiene in communities, public places, institutions and healthcare facilities	High levels of poverty	Availability of partner support
		High burden of HIV,TB Malaria and other Infectious diseases		
		Inadequate coverage of environmental, food, vector and vermin, disease surveillance, Jigger control, school health, Health promotion and water safety services	Low health and nutrition literacy in the community	Governor as a MHM champion
		Low access and utilization of immunization and vaccination services	Inadequate funding	Presence of trained community health volunteers
		Inadequate integration and functionality of community health services	Emergencies and disasters	Existence of School health education programmes

Sector	Development Issue	Causes	Constraints	Opportunities
		Weak primary health care networks	Poor quality data (untimely, outdated, not disaggregated)	Existence of RMNCAH investment case for Kenya
		Weak multisectoral linkages and coordination	National commodity stock outs	
		Limited roll out of High Impact Nutrition interventions (HINI) and high levels of malnutrition among under 5, adolescents and pregnant		
		Low standards of quality and information among community on RMNCAH services and child health, Inadequate focus on Newborn Health at Health facility and community and Inadequate implementation of adolescent and youth services		
		Inadequate coverage and quality of integrated child health interventions	Poverty	
		Limited infrastructure in tier 2 facilities as per the requirements for the relevant health facilities categorization e.g. laboratories, maternity wings, operating		

Sector	Development Issue	Causes	Constraints	Opportunities
		theaters, general wards, incinerators		
	Inadequate administration and support services for health sector	Weak human Resource Management (Deployment, distribution, capacity building, discipline)	Lack of implementation of FIF Act	Capacity building and short term courses
		Inadequate implementation of County Health Services Act that granted autonomy to Hospitals to plan and spend FIF	Limited funds for development projects	-Budget allocation and frameworks
		Weak governance systems (Policies, legal frameworks, and SOPs, facility management and Oversight)	Weak collaboration and coordination across sectors	-Partnerships and multisectoral collaboration
		Weak HMIS and M&E Unit(Health repository, ICT infrastructure, data production and use)		Untapped revenue sources/streams
		Inadequate drugs and non-pharmaceuticals in health facilities		Health insurance
		Low coverage to health insurance		NHIF cover
		Low access to safe blood and blood products for transfusion		
		Inadequate supply and maintenance of medical equipment and Transport		
Governance, and Administration	Access to public services	Inadequate office infrastructure	Limited land for county to construct offices	Busia County Public Service Board

Sector	Development Issue	Causes	Constraints	Opportunities
		Inadequate policies and guidelines on service delivery	Low level of infrastructure development	National guidelines, policies and executive orders
		Inadequate capacity building and training for personnel		Technical Colleges and Universities ie Alupe University
		Limited human resources capacities		
		Inadequate technical personnel	Inadequate resources	County secretary's office
		Weak Partnerships and collaborations		Devolved administrative units to the village level
		Weak Public participation		National government structures
				Public Private Partnerships
	Weak disaster preparedness	Inadequate technical personnel	Limited technical capacity	Multi-sectoral Busia County Disaster Management Committee
		Inadequate policies and guidelines	Inadequate disaster risk management units	National Disaster Management Bill
		Inadequate tools, machinery and funding		Public Private Partnership
		Weak coordination frameworks		
	Poor communication and engagement with the public			Enhanced ICT and Communication technology
				Partnerships with other partners/communication service providers
	Weak enforcement			Devolved administrative units to the village level
				National government structures
				Public Private Partnerships
Sports, Culture and Social Services	Inadequate cultural Promotion and Development	Inadequate cultural promotion and infrastructure	Inadequate policy development and review	Existing cultural sites
			Inadequate Human resource	

Sector	Development Issue	Causes	Constraints	Opportunities
			capacity built	
			Inadequate infrastructure	rich and diverse cultural practices
			Encroachment of Gazetted cultural sites.	
	Inadequate access to child care, right and protection	Inadequate access to rehabilitation and custody services	Cultural inclinations	Collaboration between County and National Government Existing of disability Act
		Weak functional structures	Lack of a child protection policy	Existing of Busia children's policy which is in process.
		Inadequate child social support services	Inadequate access to education OVCs	Existence of many partners in child protection
		Inadequate child development and growth		Development of Busia Gender Policy is in process
			Inadequate child framework	
			Uncoordinated data on child protection	
			Teenage pregnancy	
			Inadequate policy development and review	
	Limited access to youth empowerment and development services	Inadequate youth Enterprises and empowerment	Low uptake of Credit services	Existence of Youth Enterprise fund, Uwezo Fund
			Weak governance	30% procurement policy
			Inadequate County youth policies	
			Lack of internet connectivity	
			Inadequate entrepreneurial skills;	
	Inadequate promotion and	Inadequate sports	Weak sports governance	Existing federation association

Sector	Development Issue	Causes	Constraints	Opportunities
	development of Sports	promotion and infrastructure		
		Inadequate sports promotion	Insufficient funding	Existing sports acts
			inadequate sports policy framework	Availability of Sports sponsors
			Inadequate sports personnel	
			Untapped talents	
	Inadequate promotion and development of Local Tourism	Inadequate tourism promotion and infrastructure development	Limited resources	Availability of tourism attractions
			Underutilized attraction sites	Existence of e – platforms
			Inadequate tourism policies	Existence of Busia and Malaba border
			Inadequate human resource	
	Alcoholic Drinks and Drug Abuse	Limited liquor regulation, licensing and infrastructure	Inadequate financial resources.	Existence of collaborators like NACADA.
			Increased cross border alcohol and illegal drug trade	Availability of liquor and drug abuse ACT and relevant regulations.
				Existence of alcoholic and drug abuse committees within the sub counties.
				Collaboration between County and National Government
	Inadequate access to social support services and justice for vulnerable population	Inadequate social support services	Weak coordination framework	collaboration between County and National Government
			Inadequate policies	
			High poverty level and inadequate resources	
Transport, Public Works and Energy	Inadequate Road network	Inadequate road infrastructure	Destruction of drainage ways by road users & Sand	Existing infrastructure for storm water management

Sector	Development Issue	Causes	Constraints	Opportunities
			harvesting along roads	
		limited area connectivity	land disputes	Designated road ways
		Inadequate all-season road network	high cost of constructing bridges and box culverts	Existing roads to be connected
		Inadequate road construction equipment	Inadequate funds to maintain existing roads and upgrade to Bitumen standards	Existing earth roads
		Inadequate storm water management infrastructure		
		Weak collaboration with other stakeholders		
	Inadequate transport network	Inconsistent maintenance of water ways	Inadequate funding	Existing water ways
		Undeveloped airstrip	Poor collaboration between the national agencies and county government	Existing airstrip
		low access to rail transport		Feasibility study for airstrip already done
				Existing railway line
	Inadequate Standardization of building materials and poor working environment	Inadequate office space	Inadequate funding	Existing space for improvement
		Poor sanitation facility		Vibrant construction industry
		Porous fence		Existing technical staff
		lack of material testing laboratory		
	low share of renewable energy consumption	Inadequate renewable energy sources	Ignorance about renewable energy	Existing power supply network
			Inadequate funding	
Finance, ICT and Economic Planning	Imprudent financial management	Low Own Source Revenue collection	Manual and outdated taxpayers' data base	Development partners

Sector	Development Issue	Causes	Constraints	Opportunities
		Low budget absorption rate	Inadequate Policy on revenue collection and administration	Untapped revenue streams
		High Pending bills	Limited staff capacities in understanding finance management	ICT
		Weak internal controls		National government institutions
		Weak Procurement system		
		Weak asset management		
	Weak Policy formulation and planning	Weak linkage between plans and budgets	Political interests	development partners
		Weak Monitoring and evaluation	Inadequate technical skills in Program based budgeting and statistics	Existence of national M & E policies
			Lack of policy on records management	Private sector innovations in data management
		Weak county statistical system	Limited capacity on programme based budgeting and reporting	National statistics and data institutions
			Weak coordination with directorates	
			Inadequate baseline data	
			Limited budget	
	Inadequate access to ICT Services	Inadequate ICT infrastructure and connectivity	Inadequate Budget allocation	Development partners
		Inadequate human capacity		Private sector
				Youth
Department of Public Service	Inadequate human resource	Inadequate human resource policies	Inadequate funding for staff training	A vibrant workforce Functional PSB

Sector	Development Issue	Causes	Constraints	Opportunities
Administration and Gender Affairs	management systems	Weak human resource management programs		
	Low gender parity	Low gender mainstreaming		
Trade, Industry, Investment and Cooperatives	Inadequate access to trade and investment	Inadequate MSME Promotion	Inadequate resources	Existence of Trans-shipment market
		Inadequate market infrastructure	Presence of many unregistered MSMEs	Existence of EAC market
		Inadequate Investment promotion	Inadequate policies	Presence of development partners
	Inadequate access to fair trade practices	Insufficient verification of weighing and measuring equipment	Inadequate modern equipment and skilled staff	Development of weights and measures policy to guide the operations in the county
			Inadequate Policy & regulatory framework to counter fake scales	Sensitize more traders to avail machines for calibration
				Existence of rover tank
	Inadequate industrialization	Inadequate promotion and development of industries	Lack of county industrialization policy	Development of industrialization policy
			Lack of human resource development	
	Inadequate access to cooperative services	Inadequate investment in cooperatives	Insufficient funds	Existence of Cooperative enterprise act
			Weak governance	Collaboration with ministry of Investments, Trade and Industry
			Weak cooperative policy framework	
			Low repayment of loans	

Sector	Development Issue	Causes	Constraints	Opportunities
Lands, housing and urban development	Weak physical planning and land use management.	Uncontrolled developments	Absence of an approved Development Control and Land Use policy.	Delineation and Classification of 2 Municipalities (Busia and Malaba)- charters issued.
		Unplanned land use management	Inadequate funding	Presence of county physical planning and land survey officers.
			Inadequate Human resource capacity	Existence of a Land Registry (administered by the National Government)
			Unresolved boundary disputes	Existence of a partial valuation roll
	Weak urban management system	Uncoordinated Urban management units	Inadequate human resource capacity (expertise in urban development)	Presence of management boards for the classified Municipalities
		Inadequate urban infrastructure	Inadequate funding	Presence of solid waste management equipment
				Presence of a County Urban Institutional Development Strategy (CUIDS)
	Inadequate affordable/low-cost housing	Inadequate houses	Inadequate research for building materials	Presence of few Government Houses inherited from the National Government
		Ineffective management of Government Houses	Inadequate technical capacity	Public private partnerships
			inadequate housing policies	
County Assembly	Legislation, representation and oversight	<p>Inadequate infrastructure</p> <p>Weak structures for public participation and civic education</p> <p>Limited public awareness on the distinct roles of county assembly and executive</p>	Insufficient financial resources	<p>Fairly knowledgeable crop of MCAs</p> <p>Existence of long-serving technical staff</p> <p>Multi media conference system</p> <p>Incentives to Members</p>

Sector	Development Issue	Causes	Constraints	Opportunities
		Inadequate capacity of the MCAs and technical staff to effectively legislate, oversight and represent		

3 Spatial Development Framework

The National Spatial Plan (NSP) 2015-2045 was identified as a foundation for social and economic transformation and captured as a key flagship project under the Kenya Vision 2030. The plan provides national spatial structures and defines the general trend and directions of spatial development for the country, covering entire Forty-Seven (47) Counties and the Exclusive Economic Zones (EEZs). The Plan provides strategies and policies to deal with national challenges including urbanization, regional imbalances/inequalities, rural development, environmental degradation, transportation and under-utilization of massive resources available in the country.

Being a broad physical planning framework, NSP was developed with the aim of providing physical planning policies to support economic and sectoral planning and guide in preparation of regional, county and local physical development plans. NSP further provides a platform for integration of social, economic and political policies with the aim to:

- i. Strengthen national economic planning by anchoring and grounding national economic policies;
- ii. Coordinate sectoral agencies by providing spatial expressions to sector policies; to mitigate duplication and reduce wastage of limited resources;
- iii. Formulate physical/spatial planning policies to support socio-economic and sectoral planning; and
- iv. Guide the preparation of regional, county and local spatial plans.

To align with the provisions of NSP 2015- 2045, Busia CIDP 2023-2027 has adopted thematic areas and elements as outlined in the national spatial framework. Busia County Government initiated development of its County Spatial Plan to be actualized during implementation of 2018-2022 CIDP. However, this was not done. This will be done during 2023-2027 to help in providing physical planning policies to support economic and sectoral planning and in preparation of county and local physical development plans. It will revolve around the following thematic areas/elements in line with National Spatial Plan 2015 – 2045:

- Enhancing county competitiveness;
- Modernizing Agriculture;
- Diversifying Tourism;
- Managing human settlement;
- Conserving the natural environment;
- Improving transportation networks;
- Providing appropriate infrastructure; and
- Industrialization of the economy of the county.

This chapter provides spatial framework within which development projects and programmes will be implemented in the medium term. It should further be appreciated that the Spatial Plan provides a spatial structure that defines how the county's space is utilized to ensure optimal and sustainable use of land. The county spatial plans are vital in facilitating achievement of land policy principles of efficiency, equity, sustainability and productivity. The plan provides strategies and policies to deal with challenges including urbanization, regional imbalances/inequalities, rural development, environmental degradation, transportation and underutilization of resources available in the county. Moving ahead, the spatial plan will provide a framework upon which the CIDP is anchored. The County Government will fast-track the development of its long term spatial plan to promote attainment of county's social, economic and environmental goals and objectives through:

- Creating spatial planning contexts that enhance economic efficiency and strengthen the county's competitiveness;
- Optimizing utilization of land and natural resources for sustainable development;
- Creating livable and functional human/urban settlements in both urban and rural areas;

- Securing natural environment for high quality of life; and,
- Establishing integrated transportation networks and sustainable infrastructure systems.

The following thematic areas as outlined in the National Spatial Plan 2015–2045 will be outlined in Busia County Spatial Plan:

1. The county will continue to identify resource potential growth areas.
2. Enhancing competitiveness – the county will leverage on its strengths and opportunities, strategic geographical locations, existing natural resources, existing and proposed infrastructure projects and emerging technologies in ICT enabled services.
3. Modernizing agriculture – the county will continue to develop strategies for transforming agriculture into a modern and commercially viable sector through intensification and diversification.
4. Diversifying tourism – the county will develop strategies for offering diverse tourist products for respective tourism circuits and niche tourism products
5. Managing human settlement – the county will seek to plan for decent and high-quality urban livelihoods as well as rationalization of existing rural growth centers and human settlements.
6. Conserving natural environment – the county will prioritize protection, conservation and sustainable management of environmentally sensitive areas and fragile ecological ecosystems
7. Transportation network – the county will maximize efficiency and sustainability of the transport sector through enhanced links and connectivity beyond its borders.
8. Providing appropriate infrastructure – the county will encourage development of interconnected, efficient, reliable, adequate, accessible, safe, sustainable and environmentally-friendly systems of infrastructure (water; energy; education, training and research facilities; health; ICT; sewer lines; sports etc.); and,
9. Industrialization – the county will continue to exploit existing potential and location to steer economic growth.

Table 16: County Spatial Development Strategies by Thematic Areas

Thematic Area	Overview/ Current Status	Policy Strategy	Geographical Areas	Lead Agencies/ Departments
Developing Busia County Spatial Plan	Busia CSP is yet to be done yet it is necessary	Conduct resource surveys and mapping to identify resource potential growth areas.	Countywide	Department of lands for physical planning
Industrialization	The county is home agro-processing industries	Establish industrial zones/parks with supporting infrastructures (water electricity, road networks) etc.	Nasewa SEZs, Malaba SEZ & Industrial Park and Mundika Special Industrial Park/Estate	Physical Planning, Water, Energy
Appropriate transport, commutations, energy, water, health, built up environments and ICT infrastructure	SDG 11 calls for sustainable cities and human settlements	Build interconnected, efficient, reliable, adequate, accessible, safe, sustainable and environmentally-friendly systems of infrastructure (water; energy; education, training and research facilities; health; ICT; sewer lines; sports etc.).	Countywide	Transport, Public works & water &. Energy, ICT etc.
Climate proofing of transportation networks & infrastructure		Maximize on efficiency & sustainability of the transport sector through enhanced	Countywide	Transport, Public works & water &. Energy, ICT etc

Thematic Area	Overview/ Current Status	Policy Strategy	Geographical Areas	Lead Agencies/ Departments
		links & connectivity of transport networks & infrastructure		
Conservation of natural environment & nature based ecosystems	SDG 15 calls for conservation & sustainable management of terrestrial and fragile marine ecosystems	prioritize protection, conservation and sustainable management of environmentally sensitive areas & fragile ecological zones	Land reclamation and zoning of wetlands & Yala swamp as nature based ecosystems & regulation of sand harvesting	Irrigation, Land reclamation, Transport, Public works & water & Energy, ICT etc.
Sustainable urban/ human settlements & communities	SDG 11 calls for development of sustainable urban & human settlements	planning for decent & high-quality urban livelihoods and rationalization of rural growth centers	Develop SDPs for major towns of Busia, Malaba, Port Victoria, Funyula, Sio Port, Bumala, Amagoro, Nambale, & Amukura.	Lands, Housing, Urban development, Transport, Public works, water & Energy, ICT etc.
Diversification of tourism in the county	There exists untapped tourism potentials & rich cultural heritage to be exploited	development of strategies offering diverse tourist products for respective tourism circuits & niche tourism products plus rich cultural heritage	Countywide	Sports, culture, tourism etc
Modernization of agriculture	agricultural activities comprise the backbone of the county's economy	develop strategies for transforming agriculture into a commercially viable sector through intensification and diversification	In all 4 agro ecological zones	Agriculture, Livestock, Blue Economy, climate change and agribusiness development
Enhanced competitiveness of the county	County enjoys unique geographical location as gateway to Eastern & Central African regions with abundant human & natural resources, stable infrastructure, communication structures & financial institutions to support businesses & fair trade	leverage on strengths & opportunities, county's strategic geographical locations, existing natural resources, existing & proposed infrastructure projects emerging technologies in ICT services.	Countywide	Transport, Public works & water & Energy, ICT etc

CHAPTER 4: DEVELOPMENT PRIORITIES, STRATEGIES AND PROGRAMMES

4.1 Development Priorities, Strategies

The summary of development priorities identified in the sectors from departmental plans and during stakeholders' consultative fora are discussed. The development priorities, programmes and projects are linked to Kenya Vision 2030, MTP IV, the County's Transformative Agenda and H.E the Governors Manifesto, as well as the strategies that are identified in draft County Spatial Development Framework. The County Government has given emphasis to programmes and projects that are aimed at achieving:

- ✓ The aspirations of Sustainable Development Goals (SDGs);
- ✓ The African Union Agenda 2063;
- ✓ Mainstreaming of cross-cutting issues such as climate change; HIV/AIDs; Gender, Youth and Persons with Disability (PWD); Greening the Economy; Environmental degradation
- ✓ Sendai Framework on Disaster Risk Management (DRM); and,
- ✓ Ending Drought Emergencies (EDE) among others.

During the planning period, the County Government's programmes and projects will be implemented through the following Sectors:

1. Agriculture, Livestock, Fisheries, Climate Change, Blue Economy and Agribusiness
2. Trade, Industry, Investments and Cooperatives;
3. Education and Vocational Training;
4. Finance, ICT and Economic Planning;
5. Sports, Culture and Social Services;
6. Transport, Public Works and Energy
7. Public Service Administration and Gender
8. Lands, Housing and Urban Development;
9. Water, Irrigation and Natural Resources;
10. Health and Sanitation;
11. Public Service Board; and
12. The Governorship;

Agriculture, Livestock, Fisheries, Climate Change, Blue Economy and Agribusiness

The sector encompasses of Crops, Fisheries, Livestock production and Veterinary Services sub sectors. The institutions under the Sector are; Agricultural Training Centre in Busia, Agricultural Mechanization Services in Butula, Wakhungu Fisheries Training Centre in Samia Sub County, Kamarinyang Aqua park in Teso South, Siunga Aqua Park in Butula, Bukani Aqua Park in Samia and Nasewa Fish feeds factory in Matayos.

The sector is competent authority over entire agricultural value chains of crop husbandry, livestock production and fisheries as a fully devolved functions under Schedule 4 of the Constitution of Kenya 2010 whose mandate covers; Primary production, Input supply, Value addition and agro processing, product and market development and marketing, extension and infrastructure development and disease surveillance and control.

The sector contributes substantially towards the overall development and transformation ensuring food security and improved human health and nutritional status. In the year 2020, the sector contributed 36.5% of the County Gross Product with major crops grown and traded within the county being maize, beans, sweet potatoes, millet, cassava, rice, cotton and sugar cane. The advent of devolution has seen concerted efforts to diversify crops with significant introduction of crops that include bananas, mangoes, groundnuts, macadamia nuts, as the major nuts and oil Crops.

Fisheries is a major economic activity in Busia, and its majorly due to Lake Victoria that supports a huge population of fish including the Nile Perch, Tilapia and Omena, and emerging introduction of alternative sources of fish that include cage farming, land based ponds and backyard ponds. The main livestock economic activities are driven by production and trade in local poultry, goat, beef cattle, pigs and dairy with veterinary services providing lead support to the county trade in animal products through inspections, disease surveillance and control and routine vaccinations.

Vision:

A leading county in food security and sufficiency for sustained livelihoods

Mission:

To improve the livelihoods of Busia County residents through the promotion of competitive agriculture, provision of support services while ensuring a sustainable natural resource base.

Sector Goals

The overall goal of the sector is to attain food security and sustainable management of land and blue economy while focusing on ending hunger, reducing multidimensional poverty, harnessing the blue economy, adaptation and mitigation against climate change, agribusiness development and business incubation, as well as improving nutrition and promoting sustainable agriculture in Busia County. The proposed programmes in CIDP 2023-2027 are aimed at addressing the following strategic issues over the Medium term.

- 1) Multidimensional Poverty
- 2) Blue Economy and Climate Change
- 3) Agribusiness Development and Business Incubation
- 4) Governance Arrangement and extension services delivery
- 5) Creating enabling environment for Agricultural development;
- 6) Increasing productivity and outputs in the agricultural sector;
- 7) Enhancing County food and nutrition security;
- 8) Improving market access and trade;
- 9) Strengthening agricultural sector institutional capacity; and,
- 10)Enhancing the role of the youth in agriculture?

Table 17: Sector Priorities and Strategies- Agriculture, Livestock, Fisheries, Climate Change, Blue Economy and Agribusiness

Sector Priorities	Strategies
To improve Agricultural production and productivity	Enhanced agricultural input services
	Diversified crop production
	Strengthening Agricultural extension services
	Irrigation development
	Enhancing Agricultural mechanization
	Agricultural market access
	Enhance farmers access to affordable credit facilities
To improve fish production and productivity	Enhance fisheries input services
	Strengthening fisheries extension services
	Aquaculture development
	Strengthening fish market access
	Strengthening fisheries policies/strategies and regulations
To improve Livestock production and productivity	Animal vector disease control
	Strengthening Livestock and veterinary extension services
	Enhance pasture and fodder management

Sector Priorities	Strategies
	Strengthening livestock market access
	Diversified livestock production

Sector Programmes and Flagship Projects

Sector Programmes

Table 18: Sector Programmes-Agriculture, Livestock, Fisheries, Climate Change, Blue Economy and Agribusiness

Sub-Programme	Key Output	Key performance Indicators	Linkages to SDG Targets	Baseline	Planned Targets and Indicative Budget (KSh. M)										Total Budget (Ksh. M)
					Year1		Year 2		Year3		Year 4		Year5		
					Target	Cost	Target	Cost	Target	Cost	Target	Cost	Target	Cost	
Programme Name: Agriculture Land Use and Management															
Objective: To Promote Prudent Land Management Practices															
Outcome: Increased Land Acreage Under Agricultural Use															
Agriculture Land Use and Mechanization	Demonstrations on land management held	Number of Farmers reached During Demonstrations	1.5, 2.3, 2.4	59,500	7,000	5	7,000	5	7,000	5	7,000	5	7,000	5	25
	Land ploughed	Number of tractors leased	1.5, 2.3, 2.4	0	25	20	25	20	25	20	25	20	25	20	100
		Number of Acres Ploughed Under crops	1.5, 2.1, 2.3, 2.4	11,051	3,500		3,500		3,500		3,500		3,500		-
	Agriculture Mechanization Station revamped and operationalized	Agriculture Mechanization Station revamped and operational	1.5, 2.1, 2.3, 2.4	1	1	10.0	-	-	-	-	-	-	-	-	10
	Farm implements purchased	Number of disc ploughs purchased	1.5, 2.3, 2.4	21	7	3.4	7	3.4	7	3.4	7	3.4	7	3.4	17

Programme Name: Crop Production and Management															
Objective: To Increase Crop Production and Productivity															
Outcome: Increased Agricultural Productivity (Enhanced Food Security)															
Sub Programme	Key Output	Key performance Indicators	Linkages to SDG Targets	Baseline	Planned Targets and Indicative Budget (KSh. M)										Total Budget (Ksh M)
					Year1		Year 2		Year3		Year 4		Year5		
					Target	Cost	Target	Cost	Target	Cost	Target	Cost	Target	Cost	
Agricultural inputs support services	Subsidized Agricultural inputs procured (edible industrial oil crops & food crops)	Tonnage of Soya Bean seeds procured	1.5, 2.3, 2.4	0	225	62	225	62	225	62	225	62	225	62	310
		Acreage of land under soya beans	1.5, 2.3, 2.4	0	9,375		9,375		9,375		9,375		9,375		0
		Tonnage of Groundnut seeds procured	1.5, 2.1, 2.3, 2.4	0	375	120	375	120	375	120	375	120	375	120	600
		Acreage of land under groundnuts	1.5, 2.3, 2.4	0	12,500		12,500		12,500		12,500		12,500		0
		Tonnage of sesame seeds procured	1.5, 2.3, 2.4	0	16	13	16	13	16	13	16	13	16	13	65
		Acreage of land under sesame	1.5, 2.3, 2.4	0	5000		5000		5000		5000		5000		0
		Tonnage of Sunflower seeds procured	1.5, 2.3, 2.4	0	16	6.5	16	6.5	16	6.5	16	6.5	16	6.5	32.5

		Acreage of land under sunflower	1.5, 2.3, 2.4	0	5000		5000		5000		5000		5000		0
		Tonnage of Hybrid Cotton seeds Procured	1.5, 2.1, 2.3, 2.4	3.3	63	189	63	189	63	189	63	189	63	189	945
		Acreage of land under hybrid cotton production	1.5, 2.1, 2.3, 2.4	423	40,000		42,000		42,000		42,000		42,000		-
		Tonnage of certified Maize seeds procured	1.5, 2.1, 2.3, 2.4	255	547	275	547	275	547	275	547	275	547	275	1,375
		Acreage of land under maize production	1.5, 2.1, 2.3, 2.4		68,460		68,460		68,460		68,460		68,460		0
		Tonnage of Beans procured	1.5, 2.1, 2.3, 2.4		351	120	351	120	351	120	351	120	351	120	600
		Acreage of land under beans production	1.5, 2.1, 2.3, 2.4		17,500		17,500		17,500		17,500		17,500		0
		Tonnage of sorghum seeds procured	1.5, 2.1, 2.3, 2.4		135	55	135	55	135	55	135	55	135	55	275
		Acreage of land under sorghum	1.5, 2.1, 2.3, 2.4		18,750		18,750		18,750		18,750		18,750		0
		Tonnage of Rice seeds procured	1.5, 2.1, 2.3, 2.4		12	10	12	10	12	10	12	10	12	10	50
		Acreage of land under Rice production	1.5, 2.1, 2.3, 2.4		2,125		2,125		2,125		2,125		2,125		0
		Tonnage of finger millet seeds procured	1.5, 2.1, 2.3, 2.4		32	9	32	9	32	9	32	9	32	9	45
		Acreage of land under finger millet production	1.5, 2.1, 2.3, 2.4		3000		3000		3000		3000		3000		0
		Number of 50 Kg Bags of fertilizer Distributed to farmers (Subsidy)	1.5, 2.1, 2.3, 2.4	662	500	30	500	30	500	30	500	30	500	30	150
		No of Farmers benefiting from subsidized fertilizer	1.5, 2.1, 2.3, 2.4	13,250	1,000		1,000		1,000		1,000		1,000		-
		Number of Coffee Seedlings distributed	1.5, 2.1, 2.3, 2.4	303,995	32,000	8	32,000	8	32,000	8	32,000	8	32,000	8	40.0
		Number of Farmers benefiting from coffee seedlings	1.5, 2.1, 2.3, 2.4	2,498	1,280		1,280		1,280		1,280		1,280		-
		Number of Avocado Seedlings Bought and Distributed	1.5, 2.1, 2.3, 2.4	28,380	32,000	8	32,000	8	32,000	8	32,000	8	32,000	8	40.0
		Number of Farmers benefiting from Avocado seedlings	1.5, 2.1, 2.3, 2.4	3,328	1,280		1,280		1,280		1,280		1,280		-
		Number of Mango Seedlings bought and Distributed	1.5, 2.1, 2.3, 2.4	21,555	32,000	8	32,000	8	32,000	8	32,000	8	32,000	8	40
		Number of Farmers benefiting from Mangoes seedlings	1.5, 2.1, 2.3, 2.4	2,323	1,280		1,280		1,280		1,280		1,280		-
		Number of Citrus Fruits Seedlings Bought and Distributed	1.5, 2.1, 2.3, 2.4	12,000	32,000	8	32,000	8	32,000	8	32,000	8	32,000	8	40

		Number of Farmers benefiting from Citrus fruit seedlings	1.5, 2.1, 2.3, 2.4	851	1,280		1,280		1,280		1,280		1,280		-
Crop diversification and development	Soil PH tested	Number of farms sampled and soils Tested for PH	1.5, 2.1, 2.3, 2.4	629	3,500	6	3,500	6	3,500	6	3,500	6	3,500	6	30
		Number of Farmers Benefitting from soil PH testing	1.5, 2.1, 2.3, 2.4	629	3,500		3,500		3,500		3,500		3,500		-
	Lime Purchased and distributed to farmers	Number of 50kg bags of Lime purchased	1.5, 2.1, 2.3, 2.4	22,278	3,060	21	3,060	21	3,060	21	3,060	21	3,060	21	105
		Number of Farmers Benefitting from Lime	1.5, 2.1, 2.3, 2.4	22,278	3,060		3,060		3,060		3,060		3,060		-
	Cassava cuttings bags procured	No of bags of Cassava cuttings distributed to farmers	1.5, 2.1, 2.3, 2.4	22,400	115,000	172	115,000	172	115,000	172	115,000	172	115,000	172	860
		Acreage of land under cassava production	1.5, 2.1, 2.3, 2.4		28,750		28,750		28,750		28,750		28,750		0
	Arrow roots suckers purchased	No of Arrow roots suckers Purchased	1.5, 2.1, 2.3, 2.4		100,000	2	100,000	2	100,000	2	100,000	2	100,000	2	10
		No of Farmers Benefitting from suckers	1.5, 2.1, 2.3, 2.4		1,000		1,000		1,000		1,000		1,000		-
	Vines of sweet potatoes (OVSP) purchased	Number of Bags of Vines of OVSP Purchased	1.5, 2.1, 2.3, 2.4		2,000	2	2,000	2	2,000	2	2,000	2	2,000	2	10
		No of Farmers Benefitting from OVSP vines.	1.5, 2.1, 2.3, 2.4		200		200		200		200		200		-
Agriculture Extension Services	Enhanced efficient and Effective extension service delivery.	Number of Farmers Accessing extension services through ICT Technologies	1.5, 2.1, 2.3, 2.4	59,500	30,000	6	30,000	6	30,000	6	30,000	6	30,000	6	30.0
	Enlightened farming communities	Number of farmers reached with Technologies	1.5, 2.1, 2.3, 2.4	59,500	30,000	6	30,000	6	30,000	6	30,000	6	30,000	6	30.0
		Number of Farmers Reached During Demonstrations	1.5, 2.1, 2.3, 2.4	59,500	26,250		26,250		26,250		26,250		26,250		-
		Number Farmers reached During Field days	1.5, 2.1, 2.3, 2.4	59,500	52,500	15	52,500	15	52,500	15	52,500	15	52,500	15	75.0
Horticulture Promotion and Development	Assorted Vegetable seeds purchased and distributed to farmers	Kgs of Assorted Vegetable seeds purchased and distributed to farmers	SDG 1.5, 2.1, 2.3, 2.4		300	4	300	4	300	4	300	4	300	4	20
		Acreage of land under Horticulture	SDG 1.5, 2.1, 2.3, 2.4		3,000		3,000		3,000		3,000		3,000		-
		Number of farmers benefiting from Assorted vegetable seeds	1.5, 2.1, 2.3, 2.4		12,000		12,000	4	12,000	4	12,000	4	12,000	4	16
Crop protection	Pesticides availed to farmers	Number of liters of pesticides Distributed to Farmers.	1.5, 2.1, 2.3, 2.4	20,300	1400	5	1400	5	1400	5	1400	5	1400	5	25
	Hermetic bags purchased	Number of farmers using subsidized	1.5, 2.1, 2.3, 2.4	10,000	10,000		10,000		10,000		10,000		10,000		-

	and distributed	hermetic bag technology													
		Number of hermetic bags Purchased by the county and Distributed to farmers. (subsidy)	1.5, 2.1, 2.3, 2.4	10,000	21,000	4	21,000	4	21,000	4	21,000	4	21,000	4	20.0
		Number of Crop Storage Facility in the County (1 Store Per Sub County	1.5, 2.1, 2.3, 2.4, 12.3		1	20	2	40	2	40	2	40			140.0
	Crop insurance adopted	Number of farmers undertaking crop insurance	12.3		7,000	5	7,000	5	7,000	5	7,000	5	7,000	5	25.0
	Plant Doctors Services in Place	Number of Farmers advised on diseases and pest at major markets stations.	12.3	20	1,000	1	1,000	1	1,000	1	1,000	1	1,000	1	5.0
Multisectoral nutrition support	Agri-nutrition practices mainstreamed and adopted	Number of ECD Schools with functioning kitchen gardens	1.5, 2.1, 2.3, 2.4		50	5	50	5	50	5	50	5	50	5	25.0
Legal Framework	Policies formulated	Number of Policies Formulated	8.3		2	10	-	-	1	5					15.0
National Agricultural Value Chain Development Programme (NAVDP)	Farmers and Producer groups Capacity built For Climate resilient Stronger Value Chains	Number of Vulnerable and Marginalized Groups Funded to promote Investment in Agriculture in 20 wards	1.5, 2.1, 2.3, 2.4		2,000	50	2,000	100	2,000	100	2,000	100	2,000	100	450
		Number of Common Interest Groups Funded to promote investments in Agriculture in 20 wards	1.5, 2.1, 2.3, 2.4		2,000	50	2,000	100	2,000	100	2,000	100	2,000	100	450
		Number of Agricultural County-level Project Proposals Approved and Funded	1.5, 2.1, 2.3, 2.4		5	50	5	100							150
	Climate smart urban and peri-urban agriculture adopted	Number of farmers supported to practice Climate smart urban and peri-urban agriculture	12.4, 13.1, 13.2		400	5	400	20	400	20	400	20	400	20	85
	Agricultural and climate resilient investments supports	Number of proposals approved and funded	1.5, 2.1, 2.3, 2.4		10	50	10	100	10	100	10	100	10	100	450
	Farmer capacity-building investments and e-voucher support	Number of farmers supported and recruited into the e-voucher system	1.5, 2.1, 2.3, 2.4		5,000	25	5,000	50	500	50	500	50	500	50	225
	Farmer Producer Organization (FPO) level Climate Smart Value Chain Investments	Amount of agricultural credit for farmers and FPOs increased (in millions)	8.3		50	25	50	50	50	50	50	50	50	50	225
	Farmer-Led Irrigation	Area provided with	1.5, 2.1, 2.3, 2.4		500	25.0	500	25.0	500	25.0	500	25.0	500	25.0	125.0

	Development (FLID) supported	new/improve d irrigation/drai nage services (Ha)													
	Agricultural Market access and infrastru ctur e Developed	Number of Markets and aggregation centres upgraded and developed	1.5, 2.1, 2.3, 2.4		20	20.0	20	20.0	10	10.0	0	0.0	0	0.0	50.0
	Leverage on data and di gital technol ogies for productivity, profitability and climate resilience enhanced	Number of farmers accessing productivity services/mark et linkages/credi t services through the partnerships with Agri Tech agencies	1.5, 2.1, 2.3, 2.4		20,00 0	10	20,000	10	20,000	10.0	20,000	10.	20,000	10.	50
Sub Total															8,308.5
Programme: Agribusiness and Agricultural Value Chain Development															
Objective: To Increase the Value and Quality of Agricultural Produce															
Outcome: Increased Value added Agricultural Products															
Sub Programme	Key Output	Key performance Indicators	Linkages to SDG Targets	Base line	Planned Targets and Indicative Budget (KSh. M)										Total Budget (Ksh M)

	Staff equipped with digital data collection equipment	Number of data collection gadgets procured	SDG 1.5	0	35	3.5									3.5
Meat inspection services	Reduced incidence of foodborne diseases	Number of slaughterhouses licensed	SDG 1.5	27	35	-	35	-	35	0.0	35	0.0	35	0.0	-
		Number of sets of meat inspection support equipment purchased	SDG 1.5	14	35	5.0	35	5.0	35	5.0	35	5.0	35	5.0	25.0
		Number of existing County slaughter houses rehabilitated	SDG 1.5	0	1	10.0	1	10.0	1	10.0	0	0.0	0		30.0
		Number of Refrigerated Meat Transport Trucks procured	SDG 1.5	0	-		2	8.0	0		2	8.0	0	0.0	16.0

	Modern Poultry Slaughterhouse established	Number of new poultry slaughterhouse constructed through PPP	SDG 1.5	0	-		1	25.0	0		0		0		25.0
	Modern Pig Slaughterhouse Established	Number of Pig slaughterhouse constructed and operationalized through PPP	SDG 1.5	0	1	5	1	5	1	5	1	5	1	5	25.0
Leather Development	Mini Tannery established	Tonnes of hides and skin processed into leather	SDG 1.5	0	-	-	5,000	70.0	5,000	2.0	5,000	2.0	5,000	0.0	74.0
		Feasibility Study conducted	SDG 1.5	0	1	2.0	0	-	0	0.0	0	0.0	0	0.0	2.0
	Leather product development accelerators (or "leather wealth creation centers") established in all Sub Counties	Number of Leather Products Development Accelerators (Leather wealth creation centres) established	SDG 1.5	0	-	-	1	1.0	3	3.0	2	2.0	1	1.0	7.0
Animal Offtake Project During Droughts	Drought-stricken animals purchased from farmers during drought for slaughter	Number of Drought-stricken animals purchased from farmers during drought for slaughter	SDG 1.5	0	200	2.0	200	2.0	200	2.0	200	2.0	200	2.0	10.0
Ward Centered Dairy & breed Improvement (A.I)	Improved Animal Breeds	Number of Straws of High Quality Bull semen purchased	SDG 1.5, 2.3	3,000	60,000	15	60,000	15	60,000	15	60,000	15	60,000	15	75
		Litres of Liquid Nitrogen purchased	SDG 1.5, 2.3	3,000	60,000	15	60,000	15	60,000	15	60,000	15	60,000	15	75
	A.I Subsidy Program Established	Number of ward based community breeding centres established	SDG 1.5, 2.3	0	7	5	7	5	7	5	7	5	7	5	25
		County Livestock Breeding Program and AI subsidy program policy developed and ratified by County executive Committee	SDG 1.5, 2.3	0	1	5.0	0	-	0	0.0	0	0.0	0	0.0	5.0
		Number of service providers trained and offering the e-voucher system for A.I Subsidy Program	SDG 1.5, 2.3	7	14	2.1	14	2.1	14	2.1	14	2.1	14	2.1	10.5
	Accelerated breeding technology (Fixed Time Artificial Insemination -FTAI technology enhanced	Number of vials for hormones purchased under the heat synchronization	SDG 1.5, 2.3	140	1,000	2.5	1,000	2.5	1,000	2.5	1,000	2.5	1,000	2.5	12.5
	High Capacity Liquid nitrogen storage centre established	Number of nitrogen tanks and A.I Equipment for storage of Liquid nitrogen and semen procured and installed	SDG 1.5, 2.3	1	7	3.5	0		7	3.5	0		0	0.0	7.0

	Liquid Nitrogen production Plant Established	Liquid Nitrogen production Plant Established	SDG 1.5, 2.3	0	-	-	0	-	0	0.0	1	50.0	0	0.0	50.0
	Goat Artificial Insemination Introduced	Number of goats inseminated	SDG 1.5, 2.3	0	-		700	5.0	1,000	0.0	1,400	0.0	2,000	0.0	5.0
		Number of Inseminators trained on goat A.I technology	SDG 1.5, 2.3	0	14	0.5	0	-	0	0.0	0	0.0	0	0.0	0.5
	Pig Artificial Insemination Introduced	Number of pigs inseminated	SDG 1.5, 2.3	0	-		500	2.5	1,000	0.0	1,500	0.0	2,000	0.0	2.5
		Number of Inseminators trained on pig A.I technology	SDG 1.5, 2.3	0	14	0.5	0	-	0	0.0	0	0.0	0	0.0	0.5
Poultry Hatchery biosecurity Management Support	County poultry hatchery established	Number of Poultry hatcheries established and operationalized	SDG 1.5, 2.3	0	0	0	0	0	0	0	1	5	0	0	5.0
		Number of Incubator owners trained on Hatchery Biosafety Management	SDG 1.5, 2.3	0	0	0	0	0	0		0	2	0	0	2.0
County Livestock Registration Bureau	County Breeding Management Recording system Established	One County breeding record management system established	SDG 1.5, 2.3	0			1	3	0	0	0	0	0	0	3.0
Legal framework	Veterinary policies formulated	Number of policies formulated and enacted	SDG 8.3	0			2	16							16
Veterinary Extension Support		Number of new digital technologies used to disseminate extension services	SDG 8.3	0	5	1.5	5	1.5	5	1.5	5	1.5	5	1.5	7.5
		Number of farmers trained	SDG 8.3	1000	3,500	4.5	3,500	4.5	3,500	4.5	3,500	4.5	3,500	4.5	22.5
	Mass Livestock vaccination campaigns conducted	Number of vaccination campaigns undertaken	SDG 8.3	2	4	2.0	4	2.0	4	2.0	4	2.0	4	2.0	10.0
	Youths engaged in productive work	Number of youths trained in mass spraying of animals (60% Male: 40%Female)	SDG 8.3	0	600	3.0	600	3.0	600	3.0	600	3.0	600	3.0	15.0
		Number of youths involved in vaccination campaigns (60% Male: 40%Female)	SDG 8.3		20	0.6	120	0.6	120	0.6	120	0.6	120	0.6	3.0
		Number of youths trained in heat detection and reporting for A.I (50% Male: 50%Female)	SDG 8.3	0	600	1.2	600	1.2	600	1.2	600	1.2	600	1.2	6.0
	Veterinary Staff recruited	Number of veterinary staff recruited	SDG 8.3	26	14	14.0	21	21.0	0	0.0	0	0.0	0	0.0	35.0
	Compliance with Professional Bodies	Number of veterinary professionals attending KVB Continuous Professional Development programs	SDG 8.3	0	40	0.4	40	0.4	40	0.4	40	0.4	40	0.4	2.0

		Number of veterinary professionals subscribing to Kenya Veterinary Board Annually	SDG 8.3	0	40	0.2	40	0.2	40	0.2	40	0.2	40	0.2	1.0
		Number of Veterinary Professionals Subscribing to Kenya Veterinary Association	SDG 8.3	0	40	0.1	40	0.1	40	0.1	40	0.1	40	0.1	0.5
	Animal resource information data collected	Number of animal resource information census conducted	SDG 8.3	0	-	-	1	5.0	0	0.0	0	0.0	0	0.0	5.0
Veterinary Vaccines Cold chain Management	Vaccine grade refrigerators, freezers and cool boxes installed in all Sub Counties	Number of vaccine grade refrigerator s purchased	SDG 8.3	2	-		7	2.1	0	0.0	0	0.0	0	0.0	2.1
		Number of freezers purchased	SDG 8.3	3		-	7	1.4	0	0.0	0	0.0	0	0.0	1.4
		Number of cool boxes purchased	SDG 8.3	35	120	0.6	120	0.6	120	0.6	120	0.6	120	0.6	3.0

Cross-Sectoral Linkages

Table 20: Cross- Sectoral Linkages- Agriculture, Livestock, Fisheries, Climate Change, Blue Economy and Agribusiness

Sub Sector	Linked Sector	Cross-Sector Linkages		Measures to Harness or Mitigate the Effects
		Synergies	Adverse Effects	
Crops	Roads and Energy	<p>~Construction of feeder roads to facilitate transportation of farm produce to markets</p> <p>Promotion of green energy approaches to ameliorate greenhouse gas emission, global warming and adverse effects of climate change on agriculture</p>	<p>~Release of storm water from road drainage to farms leading to land degradation</p> <p>Arbitrary opening up of roads (Under the WDF) creating conflicts with the farming community</p>	<p>~Compliance with Sustainable Land Management (SLM) in road construction</p> <p>~ Continuous engagement with the crops sector and the farming community</p>
	Water and environment	~ Protection of riparian land and ensure compliance	Uncontrolled waste management whereby the	-Promote run off water abstraction (Ponds/Dams/

Sub Sector	Linked Sector	Cross-Sector Linkages		Measures to Harness or Mitigate the Effects
		Synergies	Adverse Effects	
		with river bank protection -Proper waste management and disposal	community dispose wastes in undesignated farmlands Handling of climate Change related issues but losing site of the fact that agriculture is the most negatively affected sector due to climate change	Pans/Water ways) to reduce pressure on underground water and subterranean streams due to uncoordinated bore hole construction -Continuous engagement with the crops sector and the farming community on environment/water related laws/policies/acts Climate Change related issues should be domiciled and supported under the Crops Sub Sector for ease of building synergies and instituting sustainable adaption and mitigation strategies to climate change effects
	Health	- Promotion of healthy living standards and conditions among the farming community	- Lack of continuous engagement between health nutritionists and the crops sub sector	-Incorporate the other sub sector in our routine activities
	Education	-Promotion of healthy living standards and conditions among the school going category (ECDE/TVET)	- Mushrooming of NGOs promoting new agricultural technologies (Greenhouses) without requisite technical capacity - Lack of continuous engagement between health nutritionists and the crops sub sector	- Continuous engagement with the crops sector and the farming community on agricultural technology prioritization (Vegetable gardening, Greenhouse farming, agro-forestry through fruit trees promotion) - Prioritization, development and promotion of fruit tree hubs in TVET centres
	Social services	-Registration and capacity building of producer groups	- Lack of continuous engagement between gender/social development department and the crops sub sector	-Continuous engagement with the crops sector to identify new farmer groups for registration -Collective engagement during farmer groups sensitization on group dynamics
	Trade and cooperatives	-Market linkage for agricultural produce - Promotion of a conducive trade environment to protect the producer folk from undue competition -Oversee the election of producer cooperatives and societies leadership	-Lack of engagement with the crops sector to identify strong and progressing producer cooperatives -Election of cooperatives leadership who do not participate in respective value chains hence do not understand challenges facing individual farmer folk -Lack of enforcing trade environment that protect producers	-Continuous engagement with the crops sector to identify proactive producer cooperatives -Vouch for a fair-trade environment for the producer folk

Sub Sector	Linked Sector	Cross-Sector Linkages		Measures to Harness or Mitigate the Effects
		Synergies	Adverse Effects	
	Treasury	-Disburse funds against approved budgets for sub sector operations	-Delay in funds disbursement for sectoral operations - Undue red tapes, conditionality and bureaucracies before disbursing funds to spending units -: Bureaucracies by the procurement department in speeding up sectoral priorities	-Attitudinal change with a broader objective of making the sector operate smoothly
	Youth, gender, sports, alcoholic drinks	- Youth and marginalized groups empowerment on cross cutting issues	-Poor youth attitude towards agriculture - Lack of continuous engagement to identify areas of possible synergies across the two sub sectors	-Continuous engagement with the crops sector o: Identification, prioritization, promotion and financing of agriculturally palatable agricultural ventures to the youth
	National Agricultural Resource Service (NARS)	-Promotion and dissemination of agricultural information and literature materials	-Lack of continuous engagement since devolution	-Continuous engagement
	Kenya Agricultural and Livestock Research Organization (KALRO)	-Promote and disseminate new agricultural research findings, technologies and weather information	-Weak research-extension-farmer linkage	-Strengthen research-extension-farmer linkage o: Promote bulking of Drought tolerant crops such as Cassava, Beans (KAT B1, KAT B9, KAT X56), green programmes, Sweet potatoes, Sorghum, Finger millet, Oil crops(Ground nuts, Sesame, Soy, Sun flower, Oil palm) in collaboration with the directorate
	Universities	- Promote and disseminate new agricultural research findings, technologies through formal learning	- Silo effect - Universities mostly work in isolation, failing to engage the sector and technology promotion and dissemination	-Strengthen collaboration between Universities and the sector
	Security agencies	-Promote safety of the farmer folk and peaceful co-existence in society	-Rampant insecurity negatively affecting agriculture	-Strengthen collaboration between security agencies and the sector in promoting food sufficiency in promoting agricultural productivity by all as the first line of defense o: Apprehend perpetrators of peaceful of peaceful co-existence
	Meteorological services	-Disseminate region specific agro meteorological information	-Inaccurate weather related information at times	-Install digital weather capture systems in collaboration with the directorate at the ATC o: Take a lead role in disseminating digitally recorded weather data at the ATC
	National Environment Management Authority (NEMA)	-Ensure adherence to environmental laws/regulations and policies	-Silo effect - NEMA mostly works in isolation, failing to engage the sector	- Continuous engagement and strengthened collaboration between NEMA and the sector

Sub Sector	Linked Sector	Cross-Sector Linkages		Measures to Harness or Mitigate the Effects
		Synergies	Adverse Effects	
	Kenya Plant Health Inspectorate Service (KEPHIS)	~Ensure adherence to quality standards of imports and Exports ~ Sensitization of the community on requisite quality standards and Critical Control Points (Hazard Analysis and Critical Control Points - HACCP) ~Certification of cassava seed growers/sweet potato seed growers	~ Influx of "unclean" fresh produce across the border due to porous border points ~Lack of quality checks for pesticide residues (MRLs) in locally produced and consumed agricultural commodities ~ Low level of producer folk engagement/ sensitization on KS standards for agricultural produce	~Continuous engagement and strengthened collaboration between KEPHIS and the sector on areas such sensitization on KS standards/ GAP standards as well as regular checks of produce in the open market and supermarket shelves
	HCD	~Certification of horticultural fruit tree/seedling nurseries/hubs ~Sensitization of the community on requisite quality standards and Critical Control Points (Hazard Analysis and Critical control Points - HACCP)	~ Silo effect - HCD mostly works in isolation, failing to engage the sector	~ Continuous engagement and strengthened collaboration between HCD and the sector on areas such sensitization on KS standards/ GAP standards as well as regular checks of seeds/seedling nurseries and farms
	None Governmental Organizations (NGOs)	~ Promote agricultural activities in collaboration with the sector to spearhead the economic blue print of county leadership	~Silo effect - Most NGOs tend to work in isolation without engaging the field officers once the top leadership of the County grants them access ~Most NGOs have palatable package beyond the reach of the sector thereby making them to by-pass field officers during their routine activities	~ Strengthen the Sectoral Stakeholders Forum (SHF) to avoid duplication of roles and streamline the operations sector related development partners ~Prioritize the outcomes and impacts of activities of from such partners • Create/Decentralize desk offices for NGO/Development partner operations up to the Sub County level
	Faith Based Organizations (FBOs)			
	Community Based Organizations (CBOs)	~Give impetus to food security initiatives through their routine agriculture related activities	~Shying off from the sector's staff once their operations stabilize	~Sensitization of CBOs
Livestock	Lands, Housing and Physical planning	secure land for livestock development	Encroachment of livestock development t land by estate developers	~ensure IEAs are done - Contractual farming
	Water and Environment	Provision of water for livestock	Water pollution	~Control water pollution
Veterinary	Trade and Cooperatives	Provide better markets for Livestock	Environment pollution	Compliance with NEMA standards
	Livestock Production	Production of Livestock feeds and fodder, Housing, partners in extension	Unhealthy industry competition	Improve adopt joint planning and role definition in programs
	Crop	Fodder production, Production of raw material for animal feed industries	Pesticide contamination of water source for livestock, Competition for field space between crops and Pasture	Encourage safe use practices for Pesticide,

Sub Sector	Linked Sector	Cross-Sector Linkages		Measures to Harness or Mitigate the Effects
		Synergies	Adverse Effects	
	Health	Management of diseases transmissible between Livestock and Human, Health certification for food handlers	Clashing roles/mandates in food roles	Harmonization of activities to enhance synergies in execution of roles; Formation and Strengthening of County One Health Unit (COHU)
	Environment	Regulation of Waste Management, Environmental Impact Assessment for Food handling structures/facilities		
	Water	Management of Water Resources used for animals facilities		
	Fisheries	Animal Feed raw materials, Fish Disease Management		Enhance Linkages in management of fish diseases
	Roads and Energy	Maintenance of Roads to facilitate Livestock and other Veterinary supplies	Poor rural access roads hindering rural access to veterinary services	Improvement of rural access roads
Fisheries development	Roads	Construction of feeder roads to facilitate transportation of fish inputs and products	Release of storm water from road drainage to fish farms leading to pollution erosion and siltation of fish ponds	Compliance with Soil and Land Management (SLM) in road construction
	Environment	Issue Environmental Impact Assessment, Social Economic Impact Assessment	Poor assessment can lead to land degradation, pollution, conflicts environmental and health hazards	Projects that require EIA should be conducted prior to commencement of the project
	Meteorological	Weather advisory services	Late advisory can lead to loss of fish stocks, destruction of fish ponds and delayed stocking	Timely weather advisory updates , Create farmer platforms for updates
	Crops	Source of raw materials for fish feed formulation	Poor storage of raw materials can lead to aflatoxins, Lack of raw materials can lead to high cost of feeds	Proper storage of raw materials to prevent aflatoxins, Timely production of raw materials.
	Water and Natural resources	Issue permits for water abstraction, Enforcement of water quality regulations	Fish mortality, pollution	Enforce water quality management regulations
	Research & Learning institutions	Conduct research on breed improvement, fish disease control, training and capacity building of fisheries personnel	Low production, inbreeding, poor extension	Refresher training on professional courses, adoption of new technologies
	Health	Issuance of health, food processing permits, Nutrition training programs	Food poisoning, poor nutrition, food spoilage	Enforce health regulation measures, create awareness on dietary diversity
	Lands	Issuance of land allotment letters, Conduct land survey, Solve land issues	Land related conflicts	issuance of land title deeds, Create community awareness on land related issues
	Administration	Conflict resolution	Failure to comply with the existing laws	Enforcement of laws and regulations to Govern the community

4.1.1 Trade, Industry, Investment and Cooperatives

The sector has four directorates namely, Trade, Co-operatives, industry and investments. The directorate of trade facilitates growth of business enterprises across the county. Trade directorate is crucial in the development and coordination of businesses across the county. Cooperatives directorate helps in the development and progression of cooperatives societies across the county. Industry directorate aims at promotion and creation of industries across the county. The department further exists to promote self-reliance through enhanced business, employment and wealth creation through the Investment’s Directorate. This is achieved through implementation of programmes targeting diversification, innovation, value-addition, information sharing, market linkages and trade infrastructure sSupport.

Vision:

A leading department in the promotion of trade, co-operative movement and investment

Mission:

To foster inclusive and sustainable socio-economic development through promoting investment in trade, entrepreneurship, innovations, value addition and co-operative development.

Sector Goal

To promote growth of business enterprises across the county

Table 21: Sector Priorities and Strategies- Trade, Industry, Investment and Cooperatives

Priorities	Strategies
To increase access to trade and investment	Enhance MSME promotion
	Improve market infrastructure
	promote investment
To strengthen fair trade practices	Improve verification of weighing and measuring equipment
To promote industrialization	Promote and develop industries
To improve access to cooperative services	Increase investment in cooperatives

Table 22:Sector Programmes- Trade, Industry, Investment and Cooperatives

Sub-programme	Key Output	Key performance Indicators	Linkages to SDG targets	Baseline Value (2022)	Planned targets and Indicative budget (Ksh.M)										Total Budget (KSh. M)

		Synergies	Adverse Effects	
Trade Development	Agriculture	Provides markets for agricultural products	Soil degradation	Practice safe farming methods for agricultural products
	Public Works	Infrastructure connection to market centers	Demolition of buildings	Establishment of market centres and parking bays along the roads; Development of a resettlement plan

4.1.2 Education and Vocational Training

The sector comprises of two sub sectors: Early Childhood Development Education and Vocational Training. The Directorate of Early Childhood Development Education is mandated to undertake the following tasks: supervision of ECDE curriculum implementation assess growth, monitoring and development of ECDE children collect data for purposes of equitable distribution of resources, capacity building of ECDE teachers and improving the physical environment of the ECDE children through construction of classes and provision of outdoor play equipment.

The Directorate of Vocational Training is mandated to undertake the Management of Vocational Training Centers through: Development of policy guidelines, rules and regulations, implementation of policies and programmes supported by various development partners, supervision and management of vocational training centers staff; Implementation of Quality Assurance And Standards (QAS) recommendations, Management of instructors and development of the human and Promotion of ICT integration and youth innovation.

The Kenya Vision 2030 and SDGs emphasize need to equip the youth with competitive employable Technical and Vocational Skills to make them and relevant to the job market and to train youth to enable them cope with advances in technology, besides positively molding their character. The main objective of the directorate is to ensure access, quality, relevance and equity in vocational skills acquisition to the Kenyan Youth.

Vision:

A quality education and training for all to transform Busia into an intelligent county in the frontline of global progress and innovation.

Mission:

The department mission is to provide accessible, holistic and quality education and training to all, for the socio-economic and sustainable development of Busia County.

Sector Goal:

Attaining quality education for all and lifelong learning mobilizing science knowledge and policy for sustainable development, addressing emerging social and ethical challenges fostering cultural diversity, intellectual development and a culture of peace in the county.

Table 25: Sector priorities and strategies- Education and Vocational Training

Sector Priorities	Strategies
To increase access to equitable and quality early childhood education	ECDE infrastructure development
	Provision of ECDE learning material
	Provision of tuition subsidy capitation in all Public ECDE Centres
	Strengthen ECD human resource
	Provision of school feeding program
	Strengthen inclusive education for learners with disability
	Enhance digital learning
	Strengthen multi-sectoral coordination to improve ECDE services
To increase access to equitable and quality VTCs training	VTC infrastructure development
	VTC human resource development
	Advocacy and communication
	Provision of education support
	Provision of Child care

Table 28: Cross-Sectoral Impact- Education and Vocational Training

Programme Name	Linked Sector	Cross-Sector linkages		Measures to Harness or Mitigate the Effects
		Synergies	Adverse Effect	
Early childhood development education	Public Works, Transport, Roads and Energy, Water Irrigation and Natural Resource, Finance Economic Planning and ICT, Health and Sanitation, Housing Lands and Urban Development	Designing and developing of ECDE Classes Plans and Standards, Conducting EIAs and Providing Water Services to ECDE centres Funding, Ensuring quality standards on services offered to promote Nutrition, acquisition of land,	Construction of classes that do not meet set Standards, Malnourished learners Inadequate funding of activities, incapacitated staff	Building synergies and partnerships during implementation, Staff Capacity building for efficient service delivery
	Agriculture	Introduction of the ECDE feeding programme will enhance the value chain of the one cow initiative.	Economically unsustainability in the long-run due to low production of milk in the county	Partnership with a donor in establishing a milk processing plant to produce the milk necessary for the programme
Education Support	Finance, Economic plan and ICT	Funding and Facilitation	Increased School dropout cases, High unemployment levels	Funding and facilitating Expanding Education support program

Programme Name	Linked Sector	Cross-Sector linkages		Measures to Harness or Mitigate the Effects
		Synergies	Adverse Effect	
	Health	Supply of highly skilled medical professionals from the County Scholarships and Busia Afya Elimu Scheme		An MOU between the department of Health and department of Education and Vocational Training collaboration.
	Public works, Transport, Roads, and Energy	County scholarships targeting Engineering TVET students as beneficiaries.		Collaboration with Department of Education and Vocational Training on provision of industrial attachments experience for beneficiaries perusing engineering, survey and technical skills courses
Technical/Vocational Training Development	Public works, transport, roads and energy, finance, economic planning and ict	Developing of VTCs and Technical Training Institutes Standards and Designing of their Plans, Funding, curriculum design	Poorly planned VTCs and Technical training institute being constructed due to underfunding	Construction of VTCs and Technical Training institute that are well planned and standardized, providing adequate funds
	Trade, Co-operative and Industry	Establishment of Home craft centres in every market for trainees to display and showcase their handmade products to the public and earn some money		collaboration with trade sector in provision of space in a market area for construction of Home craft centres helps in empowering trainees to be self-reliant
Eco-school (Environment and Socio-economic development)	Water, Irrigation and Natural Resources, Finance, economic planning and ICT, County Assembly, Kenya Forest Service (KFS)	Support school greening programs and rehabilitation through funding at the county level. Provision of tree seedlings to schools and set laws and policy that help in rehabilitating degraded environment	Inadequate allocation of funds towards the forest sector, Lack of the right policies and legal instruments to aid the process of afforestation, Charcoal burning and brick making, which lead to logging, Overexploitation of forests/ trees through increased demand for timber and wood	Support school Greening programs and rehabilitation to increase tree cover in the county
Education Development Primary, Secondary School and Tertiary	National Treasury and Ministry of Planning, Transport, Infrastructure, Housing and Urban Development, Health	Funding, Standardization of Plans of Primary and Secondary schools' classes Approval of Sanitation Standards	Inadequate funding, building of classes that are of Poor Standards, low transition rates, school dropout cases, Poor Standards	Adequate funding, Standardizing Plans, Approving of Sanitation Standards

4.1.3 Finance, ICT and Economic Planning

The sector comprises of Finance, ICT and Economic Planning sections. Finance section consists of directorate of Economic Planning whose mandate is formulation, coordination of implementation, monitoring and evaluation of economic development plans, policies and strategies geared towards achieving county development agenda. It consists of the Monitoring and Evaluation Unit that is responsible for continuous monitoring of County projects during implementation phases as well as mid-term and end term evaluations to assess impact of projects and programmes.

The Directorate of Budget is mandated to prepare county budgets and budget documents. Directorate of Accounting Services is mandate is to undertake payments and production of financial reports while Revenue directorate is responsible for collection of own source local revenue and the Directorate of Supply Chain Management undertakes procurement of goods and services for various county entities. Audit directorate is responsible for carrying out audits of the County projects to ensure value for money is realized. Directorate of ICT provides an enabling environment for all department to offer services and goods efficiently through technology.

Vision

A prosperous county committed to prudent financial management, economic planning and technological innovation.

Mission

To provide high quality financial, economic and advisory services through efficient and effective fiscal planning, resource mobilization, budget administration, coordination, formulation and implementation of policies and programmes for accelerated, equitable and sustainable development for citizens of Busia County through technological innovation.

Sector Goals

- ✓ Establish and Enterprise Resource Planned (ERP) System to automate the county services and processes
- ✓ Improve access and literacy in ICTEs
- ✓ Developing and implementing financial and economic policies in the county.
- ✓ Mobilizing resources for funding budgetary requirements for sustainable development
- ✓ Putting in place mechanisms to raise more own source revenue and financial resources
- ✓ Consolidating annual appropriation accounts and other financial statements.
- ✓ Ensuring safe custody and safeguard of the County Governments assets
- ✓ Prudent management and control of county finances
- ✓ Promote efficient and effective use of county budgetary resources
- ✓ Monitoring the County Government entities for compliance and effective management of funds.
- ✓ Monitoring and evaluating implementation of county projects and programmes.

Table 29:Sector Priorities and Strategies -Finance, ICT and Economic Planning

Sector Priorities	Strategies
To improve financial management in the county	Increase Own Source Revenue collection
	Timely implementation of budget
	Strengthen procurement process
	Strengthen asset management system
	Strengthen internal control systems
To improve Policy formulation and planning	Strengthen linkages between plans and budgets
	Strengthen Monitoring and evaluation systems
	Strengthen county statistical system
To increase access to ICT services	Strengthen ICT infrastructure and connectivity

Table 32:Cross-Sectoral Linkages ~ -Finance, ICT and Economic Planning

Programme Name	Linked Sector(s)	Cross-sector Impact		Measures to Harness or Mitigate the Impact
		Synergies	Adverse impact	
Resource Mobilization and Capacity Strengthening	All sectors	Increased County revenue	Revenue leakages across sector streams/sources	Enhanced enforcement
Economic Policy Formulation and Management	All sectors	-Functional sector working groups -Efficient and effective planning	-Abandoned stalled and non-functional projects -Poor/ Under costing projects	-Participatory planning and implementation of projects -Standardization in project costing -Timely project feasibility and reports -Timely supervision of projects -Adherence to the plans
County information management	All sectors	-Readily available information to the public -Reduced operational cost -Revenue generation through Advertisements	-Degradation of moral standards as a result of social media -Reduce productivity due to long hours spent on social media	-Implementation of County communication policy -Implement security policy and restrict access to social media
Financial management, control and development services	All sectors	-Strong Financial System(IFMIS)and accounting services	Inefficiencies caused by inadequate Accounting and financial policies and legislations	-Prepare and implement relevant policies and regulations

Programme Name	Linked Sector(s)	Cross-sector Impact		Measures to Harness or Mitigate the Impact
		Synergies	Adverse impact	
		-Strategic and sustainable budgeting -Effective, efficient and economical supply chain management		-Train staff on financial management regulations and IFMIs -Plan, Budget, implement according to CIDP priorities -Incorporate sustainability in all the plans -Automate revenue collection systems -Capacity build/train staffs on E-procurement processes
Investment Promotion	All Sectors	-Good will from partners -High number of potential revenue streams	Non-committed development partners	-Promotion of investment initiatives -Avail incentive e.g. land
Project Planning, Monitoring and Evaluation	All sectors	Approved M and E policy framework	Misconceptions around M and E always interpreted as auditing	Operationalization of the approved policy

4.1.4 Sports, Culture and Social Services

The sector has seven directorates: Youth, Sports, Children, Tourism, Culture, Social Services and Alcoholic Drinks and Drug Abuse Control. It is mandated to mobilize Busia Community for sustainable social protection, talent nurturing and creating equal opportunity for youth, women, PLWDs, older persons and other vulnerable groups for the holistic growth and development. The following are the sub-sector and their key roles:

- ✓ **Culture;** To develop, promote and preserve the Cultural Heritage of Busia County
- ✓ **Children;** To Ensure There Is Proper Child Care and Protection in the County
- ✓ **Youth;** To promote, Coordinate and Enhance Youth Participation in Development Initiatives
- ✓ **Sports;** To Create an Enabling Environment for Development and Management of Sporting and Recreational Activities
- ✓ **Tourism;** To Explore Unexploited Local Tourism Potential
- ✓ **Alcoholic Drinks and Drug Abuse Control;** To Control the Production, Distribution, Sale and Consumption of Alcoholic Drinks and Drugs in Busia County
- ✓ **Social Services;** To Self-Sustain Older Persons and PWD’S and Allow them to participate in Economic Development

Vision:

A socially, self-driven and empowered community.

Mission:

To mobilize Busia Communities for sustainable social protection, talent nurturing, heritage preservation and creating equal opportunities for children, youth, women, PLWDs, older persons and other vulnerable groups for a holistic growth and development

Sector Goals

The sector aims at creating equal opportunities for youth, women, PLWDs, older persons and other vulnerable groups in a bid to improve their livelihoods.

Table 33:Sector Priorities and Strategies- Sports, Culture and Social Services

Sector priorities	Strategies
To promote and develop cultural activities	Increase cultural promotion
To enhance access to child care, right and protection	Increase access to rehabilitation and custody services
	Strengthen functional structures
	Enhance child social support services
	Enhance child development and growth.
To increase access to youth empowerment and development services	Promote and Enhance Youth Enterprises
To promote and develop sports	Promote sports and infrastructure development
To increase promotion and Development of Local Tourism in the County To enhance control of Alcoholic Drinks and Drug Abuse	Increase tourism development
	Strengthen business and conference tourism
	Enhance liquor regulation, licensing and infrastructure
To enhance access social Assistance and development to vulnerable	Increase social infrastructure
	Enhance social development
	Strengthen special program
	Improve governance

Programme Name	Sector	Cross-sector Impact		Measures to Harness or Mitigate the Impact
		Synergies	Adverse impact	
Culture Promotion and Development	Transport, Public Works and Energy, Lands, Housing and Urban Development, Trade, Cooperatives and Industry	Infrastructure development, marketing	Infiltration of retrogressive culture, disease arising from tourism, resource conflicts	Legislation, compensations, screening and disease control mechanisms, community sensitization and training
Child Care and Protection	Agriculture and Animal Resources, Education, Health and Sanitation,	Infrastructure development, Nutrition, bursary, ECD development, promoting health services	Child abuse	Establishing more child protection centers, enhancing safety nets and social protection programs
Promotion and Development of Sports	Public Works, Roads and Energy, Lands, Housing and Urban Development, Health and Sanitation	Infrastructure development, training	Life time injuries	Seeking Public Private Partnerships in capital infrastructure development, Establishing more talent/sports centers, exploring and developing water sporting
Promotion and Development of Local Tourism in the County	Public Works, Roads and Energy, Lands, Housing and Urban Development, Trade, Cooperatives and Industry, Governorship	Infrastructure development, promotion of tourism, branding, sensitization and awareness campaigns	Culture erosion, conflicts	Legislation, awareness campaigns and awareness creation
Youth Empowerment and Development	Public Works, Roads and Energy, Lands, Housing and Urban Development, Trade, Cooperatives and Industry, Governorship, Gender	Infrastructure development, Youth Empowerment and innovation, sensitization and awareness campaigns,	Youth unemployment, gender inequality	Establish youth enterprise funds, operationalizing youth policy, carry out sensitization and awareness campaigns, Establish Youth innovation and empowerment centers
Alcoholic Drinks and Drug Abuse Control	Health and Sanitation, Transport, Public Works and Energy, Land, Housing and Urban Development,	Infrastructure development, sensitization and awareness, Research , Information and Education	Addiction of alcohol and drugs	Construct Treatment and Rehabilitation Centres in the County, Liquor regulation and Licensing
Social Assistance and Development to Older Persons and PWD	Health and Sanitation, Public Works, Roads and Energy, Lands, Housing and Urban Development, Education, Governorship	Access to health, mapping of beneficiaries, Education, Infrastructure development, training, provision of equipment, special program	Abuse including rape, marginalization and stigma, Death	Enhanced access health healthcare, developing special education centers, public sensitization on PWDs rights, developing disability friendly infrastructure, Establishment of social program

4.1.5 Transport, Public Works and Energy

The sector has three directorates, namely; Public Works, Roads & Transport and Energy. The directorates are mandated to perform the following key functions:

Public works; Provides technical support role to other departments in execution of their projects within the County, responsible for ensuring standards are adhered to both in public and private development, Construction of storm water management systems in built-up areas,

Roads and Transport; construction and maintenance of roads by opening new roads, upgrading them to gravel and bitumen standards and constructing the relevant drainage structures, Managing and servicing all the vehicles owned by the county government

Energy; Construction of street light, traffic and parking, in collaboration with the national government, do electricity maximization and new connectivity.

Vision:

To develop quality, reliable, sustainable and resilient infrastructure and provide access to safe affordable public transport systems

Mission:

To expand public transport and build infrastructure with special attention on the needs of women, children and people with disability through production of appropriate designs and increase investment

Sector Goal:

Upgrade county infrastructure to levels of resilience through improved road network and increased access to clean energy with aim of expanding transport sector and revitalizing industrialization within the county.

Table 37: Sector Priorities and Strategies~ Transport, Public Works and Energy

Sector Priorities	Strategies
To increase road network	Improving road infrastructure
To increase transport network	Revival of air transport
	Revamping of water ways
	Expansion of railway transport coverage.
To improve Building Infrastructure	Improve working environment
	Enhance standards of building works
To Increase share of renewable energy in total consumption	Establishment of renewable energy sources
	Strengthening policy framework on green energy

Programme Name	Linked sectors	Cross-sector Impact		Measures to Harness or Mitigate the Impact
		Synergies	Adverse effects	
Development and Maintenance of Roads	Lands	rural connectivity	Displacement of families on riparian areas	carry out GIS for all roads reserves, develop a resettlement scheme
	Trade	Connection to market centres	Pulling down of structures on road reserve	Establishment of market centres and parking bays along the roads; Develop a resettlement plan
	Environment and Natural resources	Murram excavation, Opening of new roads	rehabilitated borrow pits, felling of trees	Comply and enforce NEMA guidelines, fence off borrow pits

Programme Name	Linked sectors	Cross-sector Impact		Measures to Harness or Mitigate the Impact
		Synergies	Adverse effects	
Rural electrification	public administration	connecting families to electricity mains	power line accidents	Establish safety measures, compensate affected families
	Health	Connection to health facilities to the mains grid	power line accidents	Establish safety measures
	Education	connection of schools to mains grid	power line accidents	Establish safety measures

4.1.6 Public Service Administration and Gender

The sector is comprised of five divisions namely, Human Resource Management and Development, Payroll Management, Records Management, Administration and Gender affairs. In discharging its functions, the department liaises with the County Public Service Board in coordinating Human Resource and Records Management functions. Specifically, the department is charged with ensuring effective utilization and maximum development of human resources to embrace modern technology and enhance service delivery; creating harmonious working relationships between management and employees; ensuring conformity to relevant laws and regulations; streamlining and automating records management system; ensuring effective administrative services and promoting gender mainstreaming and equality.

Departmental functions in relation to CIDP implementation includes spearheading human resource policy formulation; facilitating records management and payroll administration; benefits administration; employee relations; staff training and development; ensure compliance and advisory on labor legislations; provision of staff welfare activities; human resource administration services; Gender mainstreaming; Enhancing and sustaining gender resilience; Gender equality and Women Empowerment. The proposed programmes are designed to develop and strengthen the County workforce to respond to the emerging needs that promote inclusive and sustainable economic growth, employment and decent work for all.

Vision

To be a benchmark for high performing, dynamic and ethical public service

Mission

To facilitate safe environment for effective and a productive work force that guarantees personal growth and sustainable development.

Sector Goals

The strategic goals, plans, targets and objectives of the department are to provide a conducive environment for an effective and efficient workforce while embracing modern technology for delivery of quality service.

Table 43:Cross-sectoral impacts.- Public Service Administration and Gender

Programme Name	Linked Sector(s)	Synergies*	Adverse impact	Measures to Harness or Mitigate the Impact
Human Resource Planning and Management	All Sectors	Increased efficiency and productivity	Open to abuse	Promote staff trainings Re-deployment of staff to improve productivity. Effect staff promotions. Set up counseling units. Enhance disability and gender.
Records Management	All Sectors	Safe keeping of information for all the County Departments/Agencies		Involving all relevant stakeholders in information harnessing and development to provide a platform of having a regional documentation center. Departments to provide office space to accommodate departmental records.

4.1.7 Lands, Housing and Urban Development

The sector is composed of directorates of Lands & Survey; Physical planning; Housing; Urban development; Administration and Human Resource Management services and the two municipalities-Busia and Malaba. The sector performs its mandates as follows:

- ✓ **Directorate of Lands and survey deals** with management of public land, surveying all public lands and dispute resolution along the boundaries.
- ✓ **Physical planning** deals with preparation of land use plans and development controls.
- ✓ **Housing directorate** provides management and maintenance services of government houses in terms of renovation and refurbishment, giving technical advisory services in county government offices and training members in Appropriate Building Materials and Technology.
- ✓ **Urban development** controls development in urban centres
- ✓ **Administration and Human resource Management services** deals with preparation of departmental organogram and advise on staff planning, staff needs assessment (TNA)and staff training and development; Collating information and development of schemes of service for officers; Coordination and management of functions and Championing performance management in the department and interpretation/implementation of administrative/human resource policies to enhance provision of support services in the department.

The two Municipalities of Busia and Malaba oversee functions within their jurisdictions and undertake other functions as may be delegated by the county government as enshrined in Urban Areas and Cities Act.

Vision

Excellence in land management and provision of affordable and quality housing for sustainable development

Mission

To facilitate improvement of livelihoods of Busia County residents through efficient administration, equitable access, secure tenure, sustainable management of land resource and access to adequate housing.

Table 44: Sector Priorities and Strategies - Lands, Housing and Urban Development

Development priorities	Development strategies
To strengthen physical planning and land use management.	Develop a County physical planning and development framework
	Enhance land use administration and management
To facilitate sustainable development of urban areas	Improve Urban management
	Promote urban infrastructure development and management
To facilitate the provision of Adequate and Affordable housing	Development of public housing
	Management of public housing

Table 46:Flagship Projects - Lands, Housing and Urban Development

Project Name	Location	Objective	Description of Key activities	Key output(s)	Time Frame	Estimated cost (Ksh. Mil)	Source of Funds	Lead Agency
Construction of Busia County Headquarter offices	Burumba Ward	To centralize sectors for easy service delivery	Construction of Busia County Headquarter offices	Improved working conditions for county staff	2023-2027	500	CGB PPP	County government/national/Donor
Construction of affordable housing units	Busia &Malaba municipality	to create a conducive live able environment	construction of low-cost units to accommodate the county residents	Improved working conditions for county staff	2023-2027	825	CGB PPP	County government/national/Donor

Table 47:Cross-Sectoral Impacts - Lands, Housing and Urban Development

Programme name	Linked Sector(s)	Cross-sector Impact		Measures to Harness or Mitigate the Impact
		Synergies	Adverse impact	
land management services	Environment	mapping of ecologically sensitive areas	-demolition of developments on ecologically sensitive areas -Compulsory acquisition of land registered on ecologically sensitive areas	-Development of a spatial plan -Survey of ecologically sensitive areas -Rehabilitation of ecologically sensitive areas
Urban /municipality management services	Water	Provision of wayleave for water infrastructure	Encroachment of road reserve -Displacement of residents	-compensate residents for wayleave acquisition -Expansion of road reserve
	Trade	Provision of bylaws for management and location of trading activities	-disruption of traders’ livelihood	-provision of alternative trading areas -designation of temporary trading areas
	Roads and infrastructure	Reduction of traffic congestion, opening up of residential and commercial areas	-demolition of structures along the road reserves -displacement of residents along the road reserves	-serve them with prior notice -compensate residents for road expansion
	Health	-management of waste -Approval of development	~	~

Programme name	Linked Sector(s)	Cross-sector Impact		Measures to Harness or Mitigate the Impact
		Synergies	Adverse impact	
Housing development and Management	All sectors	-provision of affordable housing to citizens -provide offices for county employees	Reduction of land left for other land users	Construction of high-rise buildings
Municipality development and management services	Infrastructure& public works, water, trade and sports	Reduce congestion, provide space for traders’ amenities for sporting activities	-Demolition of structures -Displacement of traders	-Expansion of road reserve -compensate residents for road expansion

4.1.8 Water, Irrigation and Natural Resources

The sector comprises of 3 sub sector that perform the following functions;

- ✓ **Water and sewerage Services;** to ensure sustainable access to safe water and basic Sewerage services
- ✓ **Environment and Natural Resources;** to ensure clean secure and sustainable environment.
- ✓ **Irrigation and Land Reclamation;** to provide a sound and sustainable irrigation and drainage schemes served with reliable water supply that meets irrigation demand.

Vision

Reliable Access to Clean and Safe Water Secure Environment for Sustainable Development

Mission

To promote conserve and protect the environment and improve access to clean water for sustainable development.

Sector Goal

To improve access to clean and safe water promote conserve and protect Environment and sustainably increase food production through irrigation and Drainage

Table 48:Sector Priorities and Strategies:- Water, Irrigation and Natural Resources

Sector Priorities	Strategies
To increase access to clean and safe water	Strengthen water infrastructure
	Strengthen water governance structures
	Enhance water quality management
	Strengthen operation and maintenance systems
To increase access to sewerage services	Develop sewerage network
To improve environmental conservation and management	Strengthen environmental governance
	Enhance environmental pollution control
	Create environmental awareness
	Improve afforestation & agroforestation
	Improve Catchment & watershed conservation
	Enhance natural resource management
	Promote nature-based livelihoods
To increase access to irrigation water	Enhance resilient to climate Change
	Develop irrigation infrastructure
	Strengthen irrigation governance structures
	Capacity build and enhance extension services to farmers on irrigation

Table 49:Sector Programmes - Water, Irrigation and Natural Resources

Sub Programme	Key Output	Key Performance Indicators	Links to SDG targets	Planned Targets and Indicative Budget (Ksh. M)											Total Budget Ksh. M)

Table 50: Flagship projects- Water, Irrigation and Natural Resources

Name of the project	Project Location	Objective	Description of the project	Key Output (s)	Timeframe	Estimated Cost (Million)	Source of Funds	Lead Agency
Busia town Mt Elgon Water Supply	Busia town	To increase access to clean and safe water	Mt Elgon Busia town water supply Gravity scheme	Increased water production, Enhanced water pipeline network and increased water storage capacity	2023-2027	8,000	NG &CGB	Directorate of water and Sewerage Services
Expansion of Port Victoria – Sisenye- Rwambua Water Supply	Port Victoria	To increase access to clean and safe water	Augmentation of Port Victoria Sisenye and Rwambua water system	Augmented systems, Increased water production, Enhanced water pipeline network and increased water storage capacity, Increased households served with reliable clean and safe water	2023-2027	650	NG &CGB	Directorate of water and Sewerage Services
Construction of Matungu- Butula-	Butula, Bumala, Funyula	To increase access to clean and safe water	Construction of new intakes, laying of new pipelines and	Constructed intakes, Water pipeline network developed,	2023-2027	3,000	NG &CGB	Directorate of water and Sewerage Services

Name of the project	Project Location	Objective	Description of the project	Key Output (s)	Timeframe	Estimated Cost (Million)	Source of Funds	Lead Agency
Funyula water supply			rehabilitation of existing small water supplies	rehabilitated water supplies and increased water production				
Augmentation of Amukura Water supply with proposed Kamnoit Water Project	AMUKURA	To increase access to clean and safe water	Rehabilitation of Kamunoit dam, construction of a new full water treatment plant, rehabilitation of Kocheke storage tank, laying of the rising and distribution mains, installation of intake pumps	Augmented systems, Rehabilitated dam and storage tank, Increased storage capacity and increased supply of water.	2023-2030	550	NG &CGB	Directorate of water and Sewerage Services
Last mile connectivity	Malaba town Busia town	To increase access to clean and safe water	Last mile connectivity to households, institutions and commercial premises	Enhanced household, institutions and commercial premises connectivity	2023-2031	400 Malaba 200Busia	NG &CGB	Directorate of water and Sewerage Services
Expansion of Busia town sewerage system	Busia town	To enhance sewerage connectivity	Expansion of treatment works, development of new trunk lines	Trunk lines developed and increased sewerage connectivity to households and institutions	2023-2027	1,000	NG &CGB	Directorate of water and Sewerage Services
Development of Nambale sewerage system	Nambale	To enhance sewerage connectivity	Development of sewer treatment works, and laying of trunk lines	Trunk lines developed and increased sewerage connectivity to households and institutions	2023-2027	800	NG &CGB	Directorate of water and Sewerage Services
Last mile connectivity	Malaba town and environs	To enhance sewerage connectivity	Malaba water supply: Construction of trunk lines, development of sewer treatment works and connections to households and institutions	Increased sewerage connectivity to households and institutions	2023-2027	500	NG &CGB	Directorate of water and Sewerage Services
Afforestation and bamboo promotion project	Bunyala Hills, Samia Hills, Teso South Hills and Teso North.	To promote Afforestation, Bamboo promotion and conservation of biological diversity	This will be a flagship project for acquisition and resettlement of land owners of the hill slopes and hilltops followed by mass tree planting to establish plantations that will form mini water towers for Busia County Development of Tree Nurseries to support the Mini Water tower initiatives and the presidential Directive of planting trees by the Administrators.	Increased forest/tree cover and conserved biodiversity	2023-2027	100	NG & CGB	Directorate of Environment and Natural Resources

Name of the project	Project Location	Objective	Description of the project	Key Output (s)	Timeframe	Estimated Cost (Million)	Source of Funds	Lead Agency
Sio Dam Project (Sio-Siteko Irrigation project)	Matayos and Samia Sub county	To enhance food security y increasing area of land under sustainable irrigated agriculture	Development of feasibility study reports; Construction of a small dam; Construction of spillway; Construction of irrigation infrastructure; Construction of intake structures; construction and laying out of concrete lined canals; construction of flood control structures; Installation of solar water pumping system Protection/fencing of dam; Conservation environment / afforestation of dam catchment Capacity building of farmers /IWUAs	1) increased area of land under irrigated Agriculture 2) increased food production as a result of irrigation 3) controlled floods 4) increased access to safe clean water for livestock use	23-2027	600	NG & CGB	Directorate of Irrigation and Land Reclamation Services
Ngelechom Irrigation Project	Teso South	To increase area of land under sustainable Irrigation	Development of feasibility study reports; Construction of a small dam; Construction of spillway; Construction of irrigation infrastructure; Construction of intake structures; construction and laying out of concrete lined canals; construction of flood control structures; Installation of solar water pumping system Protection/fencing of dam; Conservation environment / afforestation of dam catchment Capacity building of farmers /IWUAs	1) increased food security 2) increased land under sustainable irrigated agriculture 3) reduced flooding of land 4) increased cooperation and trade between border communities	2023-2027	700	NG,CGB & PPP	Directorate of Irrigation and Land Reclamation Services
Angololo Multipurpose Transboundary Dam Project	Teso North Sub county	1)To enhance food security through sustainable irrigated agriculture (2) To supply clean safe drinking water to	Angololo Multipurpose Transboundary Dam Project (Uganda and Kenya) involves: Development and Validation of Prefeasibility study report; Development and validation of	1) increased land under sustainable irrigation 2) increased access to safe clean drinking water 3) increased access to clean/green energy 4)	2023-2027	12,685	NG,CGB & PPP	Directorate of Irrigation and Land Reclamation Services

Name of the project	Project Location	Objective	Description of the project	Key Output (s)	Timeframe	Estimated Cost (Million)	Source of Funds	Lead Agency
		270,000 people (3) To increase access to clean safe (green) energy 4) to promote aquaculture (5) To control floods in the project affected area	Feasibility study report; Technical Design and Validation and validation of the Designs; Construction of a small dam; construction of spill way, construction and laying of irrigation infrastructure: intake, conveyance, distribution and application structures; construction of water treatment plant and water supply system; Conservation of catchment area around the dam; construction of flood control structures	increased cooperation and trade between border communities 5) controlled floods and related epidemics 6) increased cooperation and trade between border communities				
Augmentation of Bunyala Irrigation under Lower Nzoia Irrigation Project	Bunyala Sub county	To increase enhance food security through irrigation and reclaiming 6000Ha of Bunyala swamp	The Projects is intended to convert Bunyala Irrigation scheme from a Pumping to a gravity scheme; Development of Prefeasibility and Feasibility study reports; Development and validation of the Technical Designs; Construction of concrete lined main canal from Siaya to connect with main canal in Bunyala Irrigation scheme; extension/construction irrigation infrastructure- conveyance, distribution and control structures; construction of flood control structures; construction/ improvement of road network	1) increased area of land under Bunyala irrigation Scheme 2) increased land productivity 3) increased food security 4) More land reclaimed from flood for irrigated agriculture 5) reduced cost of supplying irrigation water by adoption of gravity flow	2023-2027	3,384	NG,CGB & PPP	Directorate of Irrigation and Land Reclamation Services
Kocholya Dam Irrigation Project	Teso North Sub County	To enhance food security and increase access to clean safe drinking water	Development and Validation of feasibility study report; Development and Validation of Technical Designs, Rehabilitation/ construction of dam; construction of spill way; excavation works; Protection and conservation of area around the dam; construction and laying out of irrigation infrastructure: intake, water control,	1) increased land production through sustainable irrigation 2) increased access to clean safe drinking water 3) increased access to drinking water by livestock and increased aquaculture production	2023-2027	5.076	NG,CGB	Directorate of Irrigation and Land Reclamation Services

Name of the project	Project Location	Objective	Description of the project	Key Output (s)	Timeframe	Estimated Cost (Million)	Source of Funds	Lead Agency
			conveyance and distribution system; construction of water supply system,					
Alupe Dam (Irrigation) Project	Teso South sub county	To enhance food security by increasing land production through irrigated Agriculture	Development and Validation of feasibility study report; Development and Validation of Technical Designs, Rehabilitation/ construction of dam; construction of spill way; excavation works; Protection and conservation of area around the dam; construction and laying out of irrigation infrastructure: intake, water control, conveyance and distribution system; construction of water supply system	1)increased area under irrigated Agriculture 2) increased land production due to irrigation 3) increased access to clean safe drinking water 4) increased access to drinking water by livestock and increased aquaculture production, 5)increased research and development	2023-2027	520	NG,CGB & PPP	Directorate of Irrigation and Land Reclamation Services
Yala/Bunyala Swamp Irrigation Project	Bunyala Sub county	To increase/ enhance food security through irrigation and reclaiming 3500Ha of Yala Swamp in Bunyala	Development and Validation of feasibility study report; Development and Validation of Technical Designs, Dredging of the swamp Rehabilitation/ construction of dam; construction of spill way; excavation works; Protection and conservation of area around the dam; Extension/ construction and laying out of irrigation infrastructure: intake, water control, conveyance and distribution system;	1) increased area of land under Bunyala irrigation Scheme 2) increased land productivity 3) increased food security 4) More land reclaimed from flood for irrigated agriculture 5) reduced cost of supplying irrigation water by adoption of gravity flow	2022-2027	1,149	NG,CGB & PPP	Directorate of Irrigation and Land Reclamation Services

Table 51: Cross sector Linkages-- Water, Irrigation and Natural Resources

Programme Name	Linked Sector	Cross-sector linkages		Measures to Harness or Mitigate the Impact
		Synergies	Adverse Impact	
Water and Sewerage Services	Health Services	Improved access to clean and safe water for domestic use reduces incidences of waterborne, water based and	Water pollution	Increase access to clean and safe water to households and health care facilities and Control water pollution

Programme Name	Linked Sector	Cross-sector linkages		Measures to Harness or Mitigate the Impact
		Synergies	Adverse Impact	
		water washed diseases		
	Education, Agriculture, Livestock, Fisheries Cooperatives, Trade, Industrialization and Tourism	Provision of clean and safe water to learning institutions & markets provides conducive environment for learning and traders while production of adequate water increases agricultural and industrial activities	Inadequate water leads to low levels in sanitation, crop failure and Water pollution	Invest in more sustainable water projects for industrial and institutional consumption Control water pollution
Environmental Management and Protection	All Sectors	A sustainably managed environment supports life, avails resources to the economy and acts as a sink for emissions and waste to spur economic development	Enforcement of policies and regulations	Strong enforcement unit to be established to conduct Environmental Impact Assessment for every projects before take-off and Develop environment management plan to ensure a clean and healthy environment is maintained Reduce incidences of air and noise pollution to manageable levels and Comply and enforce NEMA guidelines
Natural Resource Management	Lands, Housing and Urban Development; Agriculture and Animal Resources; Governorship; Health and Sanitation; Public Works, Transport, Roads and Energy	Planning and exploitation	Degraded and depletion of natural resources	Protection of natural resources and Enforcement of natural resource policies
Irrigation and Land reclamation services	Agriculture, Fisheries and Animal	Mapping, implementation and marketing	Climate Changeups and disease,	Increase Land under irrigated agriculture and increase access to markets

Programme Name	Linked Sector	Cross-sector linkages		Measures to Harness or Mitigate the Impact
		Synergies	Adverse Impact	
	Resources, Trade cooperatives & Industry and Lands	& sale of products and Process surplus farm produce	infestation, Inadequate markets for farm produce, Insufficient storage and Land demarcation	for the agricultural produce

4.1.9 Health and Sanitation

The sector is mandated to coordinate and oversee the overall health sector delivery systems by all health services players within the county, with an overall goal of attaining the highest attainable standards of health for all. The department of Health and Sanitation is therefore committed to undertake its roles as enshrined in the 4th Schedule of the Constitution 2010 as read together with the Bill of Rights that recognizes health as an economic and social right. The sector will align its planning with the aspirations the Social Pillar under the Kenya Vision 2030 and the Kenya Health Policy 2014-2030.

The sector consists of three directorates namely; Curative Health Services mandated with Provision of Primary Health care, provision of clinical services, management of health facilities and pharmacies, diagnostic services including radiology and laboratory services, provision of nursing services, provision of rehabilitative services among others; Preventive and Promotive Health Services mandated to undertake health promotion and education activities, provide technical advice on Promotive and preventive health, campaign and creation of awareness on diseases of public interest, provision of community health services through community strategy, disease surveillance and investigation, Inspection of premises, institutions and finally Universal Health Coverage mandated with ensuring access to health services activities by all residents, improving quality of services and ensuring affordability of health services.

Vision

A healthy, productive, and internationally competitive county

Mission

To build a progressive, sustainable, technologically driven, evidence-based, and client centered health system with the highest attainable standards of health at all levels of care in Busia County.

Sector Goal

The sector will endeavor to implement its mandate by focusing on preventive and promotive interventions as mitigation to disease burden while at the same time focusing on curative and rehabilitate health services. The key goals for the sector include to;

- 1. Eliminate communicable conditions
- 2. Halt and reverse rising burden of non-communicable conditions
- 3. Reduce the burden of violence and injuries
- 4. Provide essential health services

- 5. Minimize exposure to health risk factors
- 6. Strengthen collaboration with health related sectors

Table 52: Sector Priorities and Strategies- Health and Sanitation

Sector Priorities	Strategies
To increase access and quality of curative and rehabilitative services	Strengthen ambulance, emergency and referral services
	Enhance Rehabilitative and palliative services (horse piece, physiotherapy and occupational therapy units)
	Strengthen diagnostic, imaging, lab and pathology services in health centers and hospitals
	strengthen mental health services at referral hospitals
	Strengthen human resource capacity and equipment on specialized services(renal, radiology and imaging, pathology, lab, dental, eye, orthopedic)
	Strengthen accident and emergency services in hospitals
	Strengthen all hospitals to meet national standards of quality
	Rehabilitation, refurbishment, completion and expansion of existing hospital and primary care facilities
To increase access and utilization of preventive and Promotive health services	Strengthen sanitation and hygiene at all healthcare facilities, communities, public places and institutions.
	Strengthen prevention, control, care and treatment of HIV, TB, Malaria, and other infectious diseases
	strengthen capacity for environmental health, food safety, vector and vermin control, disease surveillance, Health promotion, Jigger control, school health, NTDs and water safety services
	Increase access to and utilization of immunization and vaccination services (routine childhood vaccines, HPV vaccine for girls, maternal vaccinations and adult/emergency vaccinations - C19)
	Enhance integration, linkages and functionality of community health services
	strengthen PHC through primary health care networks
	Enhance capacity to engage with other sectors on social, environmental, economic and political determinants of health(Strengthen Multisectoral linkages collaboration and coordination)
	Scale up the coverage and access to high impact nutrition interventions and initiatives
	Improve the quality of maternal and reproductive health services (supervision, OJT, mentorship and feedback), Strengthen and maintain heightened focus on Newborn Health services at health facility and community levels (strengthen evidence-based newborn health packages - ENAP) and Strengthen implementation of adolescent and youth health services
	Scale up the coverage and quality of integrated child health interventions (iCCM, IMNCI, ETAT+)
To enhance administration and support services for health service delivery	Rehabilitation, refurbishment, completion and expansion of existing hospital and primary care facilities
	Strengthen HRH management and development (recruitment, training & skills enhancement, rationalization/re-distribution, performance monitoring and motivation)
	Advocate for financial and procurement autonomy of the County referral hospital and the 12 sub county hospitals
	Develop and implement county level policies, legal frameworks/ regulations, manuals and SOPs to support healthcare delivery and

Sector Priorities	Strategies
	Strengthen evidence-based health sector planning and budgeting (support development of strategic and sectoral plans, investment cases, annual work plans)
	Digitalization and upgrade of medical and health records system to EMR for inpatient and outpatient services and Strengthen HMIS and Monitoring and Evaluation unit
	Plan, procure, distribute, monitor and report on health products and technologies needed for essential health services
	Promote health insurance uptake and support social health insurance for vulnerable populations
	Establish satellite blood transfusion services
	Strengthen transport and logistics capacity biomedical engineering units)

Table 53: Sector Programmes - Health and Sanitation

Sub Program me	Key Output	Key Performance Indicators	Links to SDG targets	Planned Targets and Indicative Budget (Ksh. M)										Total Budget (Ksh. M)
				Year 1		Year 2		Year 3		Year 4		Year 5		
				Target	Cost	Target	Cost	Target	Cost	Target	Cost	Target	Cost	
Programme: Curative and Rehabilitative services														
Programme Objective: To Increase Access to Quality Curative and Rehabilitative Services														
Programme Outcome: Increased Access to Quality Curative and Rehabilitative Services														
Ambula nce and referral services	Enhanced capacity of Emergency and Referral Services	No of ambulances procured and maintained	3.1, 3.2, 3.3, 3.4, 3.6, 3.7, 3.8		0	2	24	3	36	3	36	2	24	120
		Number of functional call centres established	3.1, 3.2, 3.3, 3.4, 3.6, 3.7, 3.8			1	20							20
Rehabilit ative and palliativ e services	Enhanced Rehabilitat ive and Palliative services	Number of facilities with functional corrective therapy clinics (Physiothera py, occupationa l therapy)	3.1, 3.2, 3.3, 3.4, 3.6, 3.7, 3.8		0		0	1	8	1	8	1	8	24
		Number of functional palliative care unit	3.1, 3.2, 3.3, 3.4, 3.6, 3.7, 3.8			2	10	2	10	2	10			30
Diagnost ic services in Higher level facilities	Strengthen ed diagnostic services	Number of Radiology equipment procured and functional	3.4, 3.6, 3.8		0	2	30	2	30	2	30		0	90
		No of hospital laboratories accredited	3.1, 3.2, 3.3, 3.8	1	15	1	15	2	30	2	30	1	15	105
		No of assorted laboratory equipment procured	3.1, 3.2, 3.3, 3.4, 3.6, 3.7, 3.8	25	34	25	27	25	31	25	34	25	22	148

Mental Health services	strengthened mental health services	Number of mental health units established and operationalized	3.4, 3.8		0		0	1	52.2		0		0	52.2
		Number of facilities offering psychiatric services	3.4, 3.8, 3.5	2	19.2	2	19.2	1	9.6					48
Specialized medical services	Increased access to specialized services	Number of health facilities offering specialized services	3.4, 3.6, 3.8					4	80	2	40			120
		Number of skilled personnel recruited to offer specialized services	3.4, 3.6, 3.8	4	10.2	6	15.1			9	19.41	2	7.2	51.91
Accident and Emergency services	Strengthened accident and emergency management	Number of A and E units equipped and working	3.4, 3.6, 3.8			1	85							85
Quality Improvement	Improved Quality of services	Number of Health facilities with functional QITs/WITs	3.1, 3.2, 3.3, 3.4, 3.8	94	1.5	94	1.5	110	2	110	2	110	2	9
Infrastructure development at Tier 3 facilities countywide	Improved infrastructure for service delivery (Tier 3 HFs)	A fully functional Level 5 Hospital established (as per national KEPH guidelines; norms and standards)	3.1, 3.2, 3.3, 3.4, 3.5, 3.6, 3.7, 3.8, 3.9			1	880.5							880.5
		Number of Ultra-modern Integrated Medical Complex established at Level 4 hospitals	3.1, 3.2, 3.3, 3.4, 3.5, 3.6, 3.7, 3.8, 3.9			1	180	2	360	1	180			720
		Number of Level 4 hospitals established and functional as per national infrastructure norms and standards and KEPH guidelines	3.1, 3.2, 3.3, 3.4, 3.5, 3.6, 3.7, 3.8, 3.9	1	25	2	104	2	102	1	47			278

		Number of facilities with installed and functional piped oxygen	3.1, 3.2, 3.3, 3.4,3.5 3.6, 3.7, 3.8,3.9			1	12	1	12			1	12	36
		Number of Sickle cell Hospitals Constructed	3.8			1	45							45
		Number of Theatres constructed and operationali zed	3.1, 3.2, 3.4,3.5 3.6, 3.7, 3.8,3.9	1	9.6	2	41.2	2	41.2	1	20.6			112.6
		Number of facilities with completed masonry wall and security surveillance systems	3.8			2	24	2	24	2	24			72
		Number of facilities with equipped and functional laundry Machine with squeezer & Drier	3.8	2	6	5	15	5	15	4	12			48
		Number of facilities with equipped and functional satellite eye units	3.8	1	11.5			2	23	1	11.5			46
		Number of Optical Workshop Operationali zed	3.8			1	3.1							3.1
		Number of ophthalmolo gy theatre established	3.8			1	30							30
		Number of facilities with functional dental units	3.8			1	9.8	1	9.8	1	9.8			29.4
		Number of completed MRI units operationali zed	3.8					1	130					130
		No. of health facilities with operational backup power supplies, by type (green)	3.8	2	4.4	3	6.6	2	4.4	1	2.2			17.6

		Number of completed KMTC block	3.8			1	100							100
		No. of A&E units established and functional	3.8			1	85							85
		Number of hospitals with functional maternity and Newborn Units	3.8			2	26.2	2	26.2	2	26.2			78.6
		Number of specialized maternal hospital that are functional	3.8			1	69.4							69.4
		Proportion of health facilities with reliable water source	3.8	60		67		70		75		80		0
		Number of functional private wing established	3.8			1	60			1	60			120
		No. of HFs with upgraded parking spaces and walkways (concrete paving, bitumen standards and greening)	3.8			3	47	4	72	2	36	1	11	166
		No. of health facilities with gender-sensitive and disability inclusive sanitation blocks	3.8	1	5	2	10	2	10	3	15			40
		Number of modern kitchen block constructed ,renovated and equipped (Gas technology)	3.8	1	20	1	9	1	9	2	18			56
		Number of facilities with Functional incineration unit	3.8	1	20	2	40	1	20					80
		Number of strategic renovations undertaken at hospitals	3.8			1	18	1	18	1	18			54

		Number of Hospitals Refurbished.	3.8	1	12.6	2	25.2	3	37.8	1	12.6			88.2
		Number of facilities with stand by generators	3.8	1	4.5	7	31.5	5	22.5	4	18	1	4.5	81
		Number of isolation centre/ infectious disease hospital established per 500,000 population	3.8					1	300					300
		Number of Public mortuaries constructed and equipped meeting population needs.	3.8			1	100							100
		Number of hospital mortuaries constructed and expanded	3.8			1	14.5	2	29	1	14.5			58
		Number of County and sub-county KEPI stores constructed and equipped	3.1, 3.2, 3.3			1	45							45

Table 55: Cross-Sectoral Impacts - Health and Sanitation

Programme Name	Linked Sector(s)	Cross-sector Impact		Measures to Harness or Mitigate the Impact
		Synergies	Adverse impact	
Preventive and Promotive Health Services	Environment	Removal of asbestos roofing	Environment pollution	Compliance and enforcement of NEMA guidelines on disposal mechanisms
Preventive and Promotive Health Services	Environment	Establishment of incinerators	Environmental pollution due to poor disposal of hospital waste	Construction of incinerators for proper disposal of hospital waste
Preventive and Promotive Health Services	Water	-Treatment of water sources to manage waterborne diseases	Contaminated and un maintained water sources like springs, boreholes	Provision of water treatment supplies/chlorine to households

Programme Name	Linked Sector(s)	Cross-sector Impact		Measures to Harness or Mitigate the Impact
		Synergies	Adverse impact	
		-Sewerage services	Poor sewerage system at health facilities	Establishment of proper sewerage systems at health facilities
Preventive and Promotive Health Services	Veterinary	Joint zoonotic disease Surveillance and early warning systems	Zoonotic disease outbreaks e.g rabies,	Provision of anti-rabies vaccines in our health facilities Mass dog vaccination programs.
Preventive and Promotive Health Services	Education	Menstrual hygiene education Deworming programs	Poor menstrual hygiene among adolescents and school going children Poor health condition among school going children due to worms' infestation	Sensitization/menstrual hygiene education Deworming programs at schools
Preventive and Promotive Health Services	Agriculture	Nutrition and food security	Malnutrition i.e Stunting Underweight Wasting	Provision of nutritional supplements like vitamin A for infants and iron folates for pregnant women Procurement of food supplements and rations to identified vulnerable households Sensitization on balance diet consumption and healthy feeding habits
General Health Sector Support Services	ICT	Automation and connectivity of all County health facilities.	Poor management of health data/records Inefficiency of the manual record system Poor network connectivity	Digitalization of health facilities through EMR Provision of reliable network connectivity

4.1.10 County Public Service Board

The County Public Service Board is mandated to promote good governance, establish and abolish offices, provide competent human resource, ensure efficiency and effectiveness in provision of services in the public service, appoint and confirm persons to offices and exercise disciplinary measures.

Vision

A beacon of professionalism, integrity, equity and dedication to quality public service.

Mission

Provide efficient and effective professional services for the realization of Busia County and national development goals through competitive recruitment, planning, developing and managing human capital.

Development Needs, Priorities and Strategies

The table below highlights key priority programmes which will be implemented by the County Public Service Board. The proposed programmes are designed to reduce inequality within the county through fair employment and placements by developing policies that pay attention to the needs of the disadvantaged and marginalized populations.

Table 56: Sector Priorities and Strategies- County Public Service Board

Sector Priorities	Strategies
Improve ICT infrastructure of the Board	➤ Development of the Busia County public service board website, systems maintenance, security audit, patching and upgrade
	➤ Establishment of the board data centre
Promotion of good governance in the county	➤ Carry out countywide sensitization on values and principles of good governance; operationalize anti-corruption policies
Empowerment of the County Human Resource	➤ Recruitment of the relevant county human resource skills,
	➤ Provide leadership in the implementation of the county performance contracts
	➤ Seek partnership with training institutions like the Kenya School of Government, NITA so that they give training to county staff

4.1.11 Governorship

- The sector comprises of the following sub-sectors; Public Service, Administration and Gender, Disaster Management, Security and Enforcement, Service Delivery and Communication and publicity.
- ✓ **Public Administration;** the mandate of the sub sector is to spearhead policy formulation, promotion of rule of law, to enhance order, resource mobilization, co-ordination and supervision of effective and efficient public service delivery, swift response to critical community needs during disaster occurrences, publicity, branding and public participation.
 - ✓ The sub-sector key roles include; Spearhead policy formulation, promotion of the rule of law to enhance order, resource mobilization, coordination and supervision of effective and efficient public service delivery, response to critical community needs during disaster occurrences and publicity, branding and public participation
 - ✓ The sub-sector mandate is to provide strategic leadership and guidance to the public service. The sub-sector roles are to promote the values and principles of public service, facilitating development of coherent, integrated human resource planning and budgeting for personnel emoluments, advise the county on human resource management and development, establish a highly professional and competent public service and develop a programme for improving skills and competency- capacity building.
 - ✓ **Disaster Management;** The directorate is mandated to carry out disaster risk reduction strategies, firefighting, rescue operations, safety training, fire investigations and emergency ambulance services.
 - ✓ The sub-sector role is to focus on disaster risk reduction, enhance public safety and emergency responses and enhance public awareness and disaster response.
 - ✓ **Security and Enforcement;** The Sub-sector mandate is to enforce and ensure compliance of county laws and other relevant laws, provide security services to County properties, VIP protection and installations and investigate crimes related to the County.
 - ✓ **Communication and Publicity;** The Sub sector mandate is to disseminate County related information to the public. Its key roles include; coordination of media during events covering, editing and sharing of county events, management of the official county communication avenues (website and social media handles) and production of county magazine/newspaper and related documentaries.
 - ✓ **Service Delivery Unit;** The mandate of the sub sector is identification of projects and programmes to ensure that public services are delivered in a manner that takes into account prudent, economic, efficient, efficient and sustainable use of viable resources. The major roles include; coordinate, monitor and evaluate projects in various departments, define targets for all implementing agencies and track progress, giving recommendations to the county for timely fulfillment of development priorities and analyze and communicate on key results/outcomes of the County initiatives.

Vision

To be a benchmark for high performing, dynamic and ethical public service

Mission

To facilitate a safe environment for effective and productive work force that guarantees personal growth and sustainable development.

Sector Goal

To spearhead policy formulation; promotion of rule of law to enhance order; resource mobilization; coordination and supervision of effective and efficient public service delivery; provide strategic leadership and guidance to public service, facilitate development of human resource, enhance and sustain gender resilience, swift response to critical community needs during disaster occurrences; publicity, branding and public participation.

Table 58: Sector Priorities and Strategies- Governorship

Sector Priorities	Strategies
To improve access to public service	Strengthen coordination and supervision of service delivery
	Improve infrastructure development up to the ward levels
To strengthen disaster preparedness, mitigation and response.	Strengthen disaster risk management and preparedness
To strengthen information dissemination and publicity	Strengthen communication channels and engagement with the public
Strengthen enforcement	Strengthen enforcement of public laws/policies

Disaster Risk Management	All sectors	Compliance in designing and construction, acquisition and supply of material and equipment, funding and compensation	Delayed response, coordination challenges, inadequate funding, Loss of lives and property	Instituting coordination mechanisms, Seeking increased funding, building synergies

4.1.12 The County Assembly

The County Assembly’s core functions are to develop legislation; perform oversight and representation.

Vision

A modern County Assembly that fulfills its constitutional mandate and effectively serves the people of Busia County

Mission

To build an effective County Assembly that is responsive to the needs of the people and that is driven by ideals of realizing a better quality of life for the people of Busia County.

Goal

Strengthen legislation, representation and oversight functions responsive to the needs of the people and driven by ideals of realizing good governance and accountability.

Table 61: Sector Priorities and Strategies- County Assembly

Sector Priority	Strategies
To strengthen legislation, representation and oversight	Strengthen the capacity of Members and technical staff to exercise their mandate of legislation, oversight and representation
	Create and strengthen mechanisms of stakeholder linkages and engagements
	Improve county assembly infrastructure

4.2 CIDP Linkages with National Development Agenda, Regional and International Development Frameworks

This section indicates how Busia CIDP 2023-2027 is linked with and is contributing towards achievement of the following (among others): The Kenya Vision 2030 and the Medium Term Plans, the National Spatial Plan 2015–2045, Sustainable Development Goals etc. The chapter further captures how Economic Planning at county level links policy, planning and budgets and

how emerging international obligations and development concepts that are meant to spur inclusive socio-economic growth and development are embraced during this planning period.

4.2.1 Linkage of CIDP with Kenya Vision 2030 and Medium Term Plans

The Kenya Vision 2030 is Kenya’s long term development blue print aiming to transform Kenya into a modern, globally competitive, middle income country providing a high quality of life to its citizens by 2030. It is anchored on three key pillars: economic, social and political pillars. The Economic Pillar aims to achieve an average Gross Domestic Product (GDP) growth rate of 10 percent per annum and sustain the same till 2030. The Social Pillar seeks to build a just and cohesive society with social equity in a clean and secure environment. The Political Pillar aims at realizing a democratic political system founded on issue based politics that respects the rule of law and protects fundamental rights and freedoms of every individual in Kenyan society.

The programmes to be implemented under the MTP IV have been incorporated into the CIDP and are aimed at reducing proportion of people living in poverty, promoting equity and social inclusiveness for all through implementation of the national value policy, improved democratic and participatory governance. CIDP 2023-2027 provides essential platforms for facilitating implementation of Kenya Vision 2030 flagship projects as well as other middle level projects and programmes to benefit the county residents.

During this planning period, the County Government will be implementing development priorities that were captured in 2023-2027 CIDP during consultative forums. In particular, the focus will be on supporting implementation of Kenya Vision 2030 flagship projects domiciled in or traversing Busia County. In addition, the county will seek to build synergies and partnerships in implementing priority projects and programmes and related national development initiatives. To realize the Kenya Vision 2030 objectives, the County recognizes need for:

- A stable macroeconomic environment;
- Continued reforms in governance;
- Adequate infrastructure and affordable energy;
- Science, Technology and innovation;
- Human resource development; and,
- Security and need for enhanced equity and wealth creation opportunities for the poor.

Targeted investments will be implemented with specific focus on creating enabling environments to spur inclusive socio-economic growth and development.

4.2.2 Linkage CIDP with ‘The Big Four’ Agenda

In 2023-2027 planning period the national government development priorities in MTP IV are tailored towards completion of unfinished business of ‘The Big Four’ Agenda encompassing targeted investment in manufacturing, food security, affordable housing and health care. ‘The Big Four’ agendas are not only aiming at alleviating poverty, hunger, disease but also creating wealth and employment opportunities.

Pillar 1: Manufacturing. The aim is to increase exports by harnessing potential that comes with the blue economy, extractive industries, agro-processing, local leather and textile industry, value addition on tea, coffee, meat, fruits and vegetable, cutting the cost of energy, protecting intellectual property rights as well as stopping the proliferation of counterfeit products. The county government will has establish special economic zones to promote value addition and to transform Busia into a transport and exports logistics hub.

Pillar 2: Enhance Food Security; the government focus is to continue to encompass increased investments in livestock insurance, putting at least to 1.2 million acres under irrigation, implementing fertilizer subsidy programme and pursuing targeted taxation to put idle arable

land to use. The county government will put in place measures to increase area under agriculture through irrigation, provision of certified and affordable agricultural inputs and transfer of modern technologies to farmers.

Pillar 3: Affordable Housing. To achieve this, the government intends to construct up to 500,000 housing units across the country as well as to reduce the cost of mortgages and building material to enhance access to affordable housing by a majority of Kenyans. The county government has plans to develop Appropriate Building Materials and Technology (ABMT) centers that will lower the cost of building materials. The county will also put in place measures to attract investors to construct affordable housing units in Busia Town and its environs through PPPs.

Pillar 4: Affordable Health Care. To provide universal healthcare for all, the government intends to undertake major policy and administrative reforms in medical sector, to pursue and facilitate synergies and collaboration between NHIF and the private sector to provide health services as well as instituting systems and mechanisms that will help reduce the cost of health care. The county government will promote and provide universal health coverage to its residents through uptake of health insurance, putting up and upgrading the existing health infrastructure and human resource development in health care sectors.

4.2.3 Linkage CIDP with EAC Cross Border Trade & EAC Vision 2050

The East African Community Bloc comprising Kenya, Uganda, Tanzania, Rwanda, South Sudan, Burundi and DR Congo has signed a number of protocols. Among them, is establishment of One Stop Border Posts (OSBPs) to facilitate the movement of people and goods across the borders. This led to establishment of two border posts at Busia and Malaba towns. The County Government however lost considerable revenue from operationalization of One Stop Border Posts. This has caused trade imbalances favoring Uganda. The County Government will seek avenues with National Government to be compensated on revenue losses and will set up special economic zones to attract offshore investments.

4.2.4 Linkage of CIDP to African Continental Free Trade Area

African countries have signed a protocol to establish the African Continental Free Trade Area (ACFTA) that allows for free movement of goods and people. In the development of the Busia CIDP 2023-2027, the geographical positioning of the county as a unique gateway to Eastern and Central African regions with two border posts and two immigration points gives the County comparative advantage to be a transport and export logistics hub for the regions.

4.2.5 CIDP Linkage with Sustainable Development Goals

The Millennium Declaration in 2000 led to adoption of eight (8) time bound Millennium Development Goals (MDGs) that were meant to measure progress towards poverty alleviation. Kenya was among 189 UN member states that adopted the Millennium Declaration. The MDGs were a global commitment meant to uphold principles of human dignity, equality and equity and free the world from extreme poverty by creating an environment conducive to development.

MDGs were implemented for fifteen years between 2000 and 2015. During the period, remarkable achievements included enhanced global development cooperation, increased mutual accountability and mobilized support from all development actors and practitioners. In addition, the world witnessed greatest reduction in poverty in modern history coupled with the great promise and opportunity to address human welfare and development in developing world. The realization of the MDGs however varied from country to country and region to region with some countries and regions doing better on some MDGs, while others having lagged behind on most of the MDGs goals and targets.

In recognition of mixed success of the MDGs implementation and the fact that a new development agenda was needed beyond 2015, an Open Working Group to develop a set of Sustainable Development Goals (SDGs) was established by UN member countries in 2012 at Rio+20 UN Conference on Sustainable Development. The Open Working Group was mandated

to advance the development framework beyond 2015. In the report titled “A New Global Partnership: Eradicate Poverty and Transform Economies through Sustainable Development”, the group recommended carrying forward the spirit of the Millennium Declaration emphasizing that the post 2015 development agenda should leave no one behind. In the rallying call, the report underscored need for keeping sustainable development at core, transforming economies for jobs and inclusive growth, building peace and effective, open and accountable institutions for all and finally forging new global partnerships. This informed the development of the Post 2015 Development Agenda comprising 17 SDGs and 169 targets and subsequent adoption of the SDGs at the UNGA Sustainable Development Summit in 2015.

The new goals and targets came into effect on 1st January 2016 and guide decisions the UN member states take over towards the year 2030. To implement the SDGs, the National Government developed and launched an implementation strategy namely, the “Roadmap to Sustainable Development Goals (SDGs): Kenya’s Transition Strategy”. The indicators and targets were customized into Kenyan contexts by Kenya National Bureau of Statistics (KNBS). Therefore, in development of Busia CIDP for 2023-2027, the proposed programmes and projects integrate 17 SDGs objectives. Specifically, respective departments identified SDGs relevant to them and aligned them in respective of the objectives and indicators for in programmes and outcomes and initiatives (KPIs).

At the core of proposed projects and programs are three critical planks of sustainable development namely: eradication of poverty; reducing inequalities within and among the sub counties; and ensuring sustainability of planet earth and its life support systems. Besides, in its planning, the County Government identified immediate deliverables on a number of SDGs including establishing partnerships, accelerating implementation of relevant actions as well as carrying out capacity building among stakeholders. This is consistent with national strategy – “Roadmap to Sustainable Development Goals (SDGs): Kenya’s Transition Strategy” guiding implementation of SDGs and the recently launched SDGs Acceleration Strategy and Recovery Framework towards the year 2030.

To enhance effectiveness of SDGs in implementation, the county has mapped out SDGs consistent with departmental functions/mandates and will continue to put in place mechanisms to track and report on SDGs indicators as customized to Kenyan contexts. This will be done in accordance with the National and International tracking and reporting frameworks to measure achievements and progress from implementation of the SDGs.

4.2.6 CIDP Linkage with Sendai Framework for Disaster Risk Reduction 2015 to 2030

The Sendai Framework for Disaster Risk Reduction 2015-2030 was adopted at the Third UN World Conference in Sendai, Japan, on March 18, 2015. The Sendai Framework is successor instrument to the Hyogo Framework for Action (HFA) 2005-2015 that sought building resilience of nations and communities to disasters. The Sendai Framework is built on elements aimed at ensuring continuity with the work done by states and other stakeholders under the HFA and introduced a number of innovations emphasizing on disaster risk management as opposed to the conventional disaster management.

Taking into account the experience gained through the implementation of the Hyogo Framework for Action, the Sendai framework for Disaster Risk Reduction focuses on actions within and across sectors by states at local, national, regional and global levels in four priority areas namely:

- Priority 1: Understanding disaster risks;
- Priority 2: Strengthening disaster risk governance to manage disaster risks;
- Priority 3: Investing in disaster risk reduction for resilience; and,
- Priority 4: Enhancing disaster preparedness for effective response and “Building Back Better” in terms of recovery, rehabilitation and reconstruction.

Historically, Busia County is prone to a number of disasters including floods arising from erratic weather patterns, fire accidents involving heavy commercial oil trucks and lightening. Inadequate capacity for disaster preparedness, management and inertia in disaster responses continue exposing local people to various socio-economic impacts. The development of CIDP 2023-2027 has been informed by the four priority areas in the Sendai Framework for DRR. Specifically, initiatives and interventions will be developed to ensure enhanced understanding of disasters, adequate preparedness, timely responses and effective management of disasters.

4.2.7 CIDP Linkage with AU’s Agenda 2063

Realization of the past continental achievements and challenges led to development of the Pan African vision by Africa’s political leadership. The African Union’s Agenda 2063 envisions an “integrated, prosperous and peaceful Africa, driven by its own citizens and representing a dynamic force in international arena”. The Agenda seeks to strategically exploit existing opportunities available so as to ensure positive socio-economic transformation of the continent. It consists of seven aspirations namely:

- A prosperous Africa based on inclusive growth and sustainable development;
- An integrated continent, politically united and based on ideals of Pan-Africanism and vision of Africa’s Renaissance;
- An Africa of good governance, democracy, respect for human rights, justice and rule of law;
- A peaceful and secure Africa;
- An Africa with a strong cultural identity, common heritage, shared values and ethics;
- An Africa whose development is people driven, relying on potential of African people, especially its women and youth, and caring for children; and,
- Africa as a strong, united, resilient and influential global player and partner.

Implementation of AU’s Agenda 2063 has been systematic with the collective responsibility at Continental, Regional, National and Sub national levels of governance. The first Ten Year Medium Term Plan (2013-2023) was adopted by the Summit in June 2015. Kenya is among African member states that ascribe to AU’s Agenda 2063 aspirations. In Kenya, various planning documents have been providing platforms for mainstreaming and implementing Agenda 2063. Among the planning documents at National level include Kenya Vision 2030 and successive Medium Term Plans (MTPs), Sector Plans, MDAs Strategic Plans as well as Annual Performance Contracts and Work Plans. At the County level, Agenda 2063 is implemented through the County Integrated Development Plans. Busia County Integrated Development Plan 2023-2027, departmental visions and missions are intuitively inspired by the same aspirations. The CIDP has developed systems for financing, monitoring and evaluation and reporting progress to ensure achievement of related development aspirations of AU’s Agenda 2063.

Africa’s Agenda 2063	Goal 2: World class infrastructure crisscrosses Africa.	<ul style="list-style-type: none"> • Road improvement
	Goal 14: Blue/Ocean economy for accelerated economic growth	<ul style="list-style-type: none"> • Sustainable exploitation of resources in the oceans, rivers and lakes • Conservation of water bodies and wetlands
EAC 2050 Vision	The East African Community has signed a number of protocols. Among them, is establishment of the One Stop Border Posts (OSBPs) to facilitate movement of people and goods across borders. This led to establishment of the two border posts at Busia and Malaba Towns. The County Government lost considerable revenue from operationalization of One Stop Border Posts (OSBPs) that caused trade imbalances favoring Uganda.	County to seek avenues with National Government to be compensated on revenue losses and setting up special economic zones to attract investments and cross border trade.
Sendai Framework for Disaster Risk Reduction 2015 – 2030.	Disaster Risk Reduction focusing on actions within and across sectors in priority areas including floods arising from erratic weather patterns, fire accidents involving heavy commercial oil trucks and lightening. Inadequate capacity for disaster preparedness, management and inertia in disaster response exposing local people to various socio-economic impacts.	<ul style="list-style-type: none"> • Understanding disaster risks; • Strengthening disaster risk governance to manage disaster risks; • Investing in disaster risk reduction for resilience; and, • Enhancing disaster preparedness for effective response and “building back better” in terms of recovery, rehabilitation and reconstruction.

		county sectors from adverse effects of climate change
ICPD25 Kenya Commitments	Busia County is likely to witness a substantively high population growth that will yield more pressure on available resources in the county.	The county government needs to put in place sufficient mitigating measures that include carrying out advocacy on teenage pregnancy and investing more in birth control mechanisms for all women in child bearing ages. Further, the government has to proactively pursue girl-child empowerment specifically through education.

CHAPTER FIVE: IMPLEMENTATION FRAMEWORK

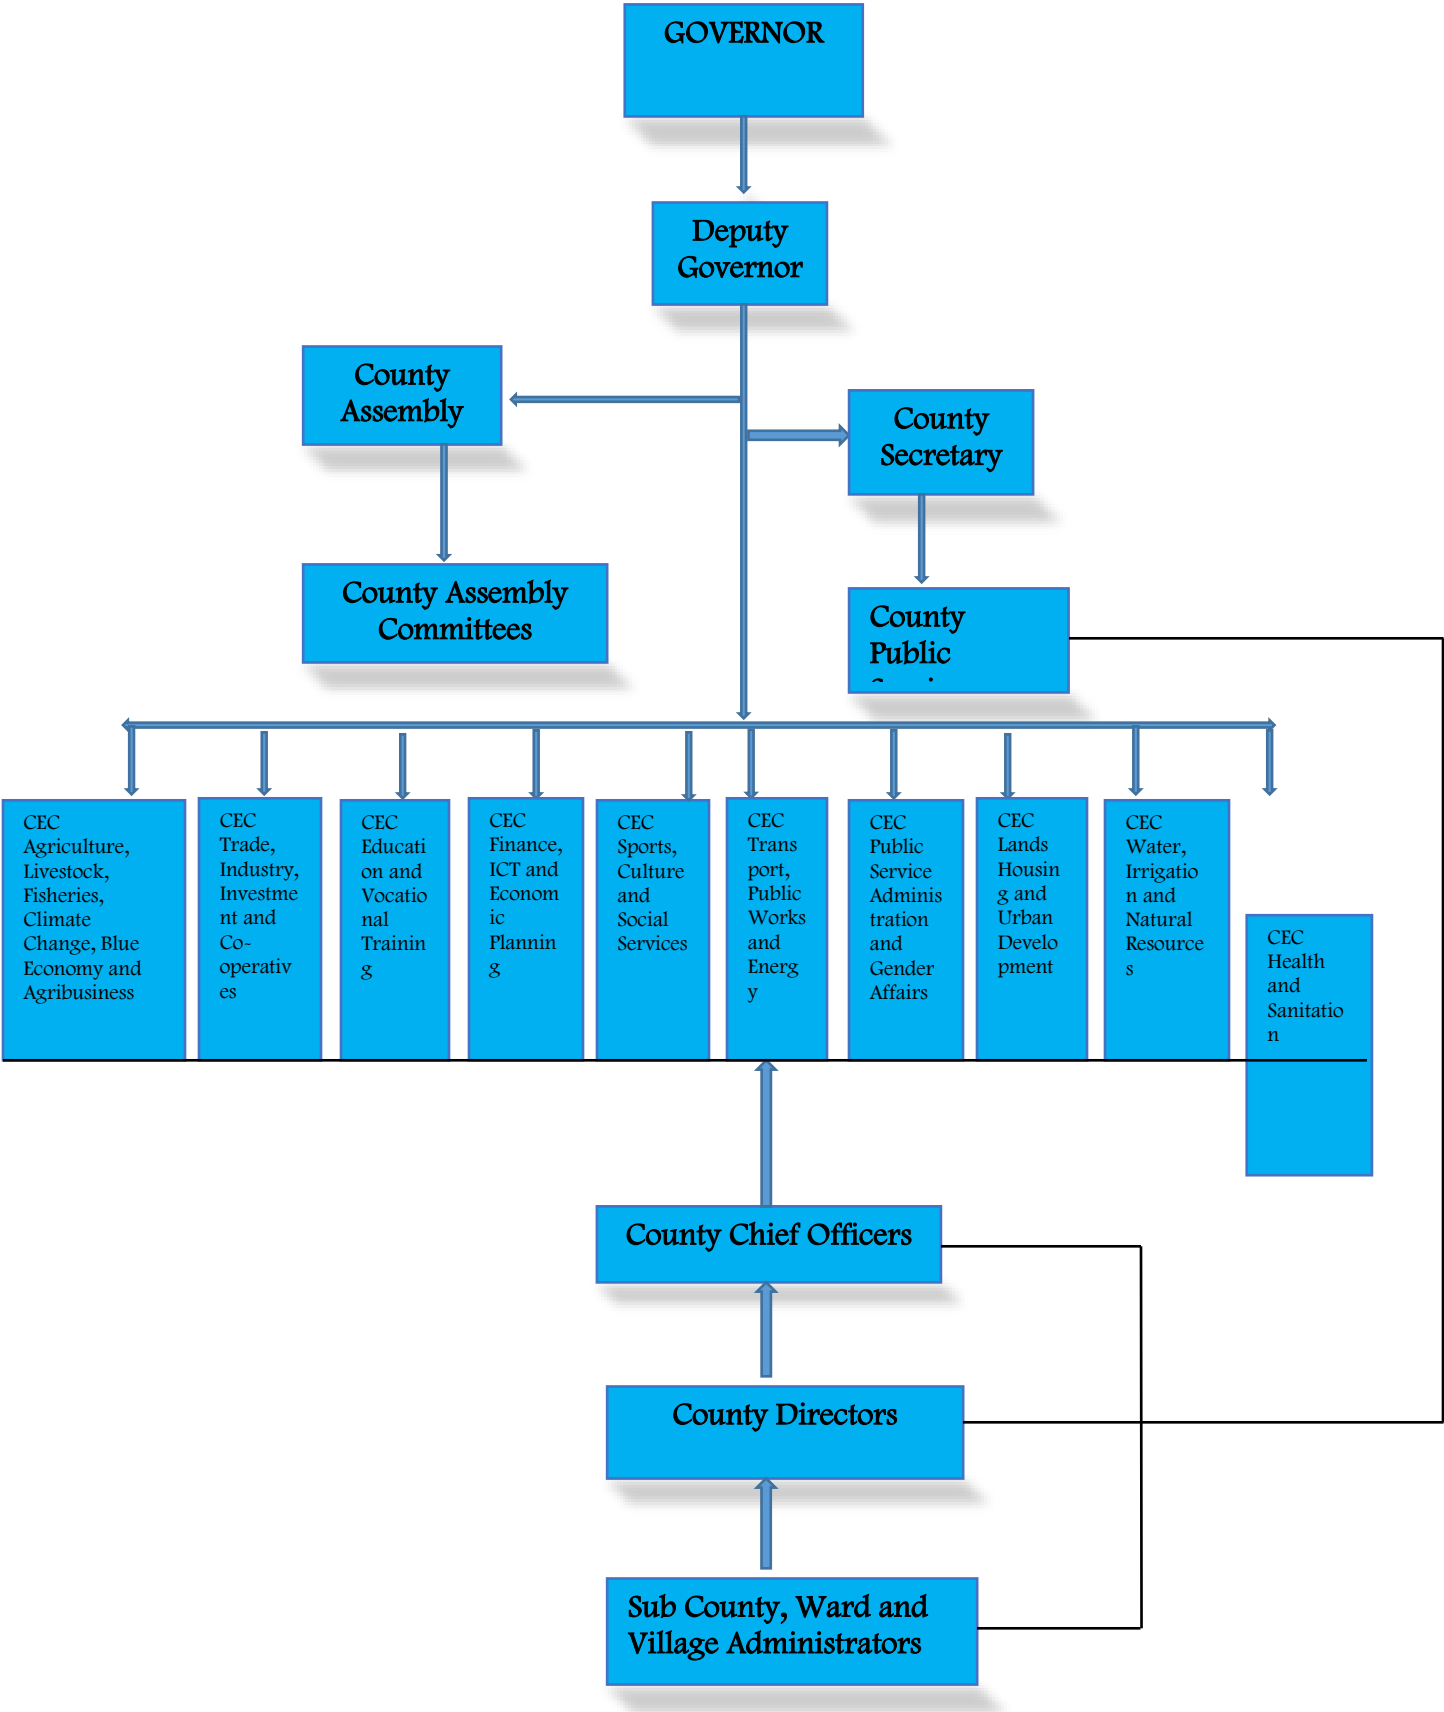

5 Overview

This chapter gives framework through which Busia County Integrated Development Plan (CIDP) 2023-2027 will be implemented. It discusses institutions responsible for actualization of the plan, the resource requirements, resource mobilization strategies, resource gaps and measures that the county will put in place to address human and financial resources gaps. The chapter outlines the institutional framework allocating functions and responsibilities to respective actors as guided by Articles 183,185,187,189(2) and 235 of the Constitution 2010 and County Government Act Number17 of 2012 that collectively prescribes structures of the County Governments. The implementation framework presents four categories of stakeholders and distinct roles they play in the county development process.

5.2 Institutional Framework

To implement the CIDP 2023-2027, various actors will be involved. The actors range from County Government departments, the County Assembly, the National Government Ministries, development partners and donors, Non-Governmental Organizations, civil society as well as Busia County citizens. An elaborate organizational structure with clear roles and responsibilities is in place to guide and co-ordinate implementing partners. This will help harness the potentials of every partner in the county development process thereby guaranteeing efficiency and effectiveness in service delivery.

COUNTY GOVERNMENT OF BUSIA ORGANIZATION STRUCTURE
 Figure 7: Busia Organization Structure

5.2.1 Administration and County CIDP Implementation

In line with the provisions of the Constitution 2010 and the County Government Act 2012, Busia County Government is organized into ten (10) functional departments headed by the County

Executive Committee Members (CECMs) with the County Chief Officers (COs) as accounting officers. The Departments include Agriculture, Livestock, Fisheries, Climate Change, Blue Economy and Agribusiness; Trade, Cooperatives and Industry; Education and Vocational Training; Finance, ICT & Economic Planning; Sports, Culture and Social Services; Transport, Public Works and Energy; Public Service Administration and Management; Lands, Housing and urban Development; Water, Irrigation and Natural Resources; Health and Sanitation; and Governorship. Under various departments are directorates headed by the directors. Linking the respective directorates to the citizenry administratively are the Sub - County, Ward and Village Administrators respectively.

5.2.1.1 County Executive Committee

This comprises the Governor, Deputy Governor and ten (10) County Executive Committee Members. The Executive Committee Members are appointed by the Governor and approved by the County Assembly. The roles and responsibilities of this arm of the County Government is as prescribed in Section 36 of the County Government Act 2012.

H.E. the Governor

The Governor is the Chief Executive of the county and provides overall leadership in the county’s economic, social and political governance and development; provide leadership to the County Executive Committee and administration based on county policies and plans; promote democracy, good governance, unity and cohesion; promote peace and order; promotes the competitiveness of the county; is accountable for management and use of the county resources while promoting and facilitating citizens participation in development of policies plans, and delivery of services.

H.E The Deputy Governor

The Deputy Governor is the Deputy Chief Executive of the county and shall deputize the governor in the execution of executive functions. The Deputy Governor may be assigned any other duties and responsibilities by the Governor as a member of the County Executive Committee.

County Secretary

The County Secretary is the head of the County Public Service; and is responsible for arranging the business, and keeping minutes of the County Executive Committee subject to the directions of the Executive Committee; conveys the decisions of the County Executive Committee to appropriate persons or authorities and performs any other duties and functions as may be directed by the County Executive Committee.

County Executive Committee Members

The County Executive Committee is comprised of 10 executive members appointed by the Governor and approved by the County Assembly. Each Executive member is responsible for the respective department. The roles and responsibilities of this arm of the County Government are prescribed in Section 36 of the County Government Act, 2012.

County Chief Officer

The Chief Officer will be the Accounting and Authorized Officer for the Department assigned and will be responsible to the respective County Executive Member for the following: General administration and coordination of respective County Department; Initiation, development and implementation of policies and sector plans; Development and implementation of strategic plans; Promotion of National values and principles of governance in the county public service; Overseeing implementation and monitoring of performance management systems and any other duties as may be assigned by the Executive Committee Member and or the County Secretary.

Directors

They deputize the Chief Officers in executing their functions in the county departments and directorates.

Sub-County Administrators:

The Sub-County Administrators are responsible to the County Executive Committee Member in charge of County Public Service, Administration and Gender Affairs for the following: Coordinating, managing and supervising the general administrative functions in the Sub County Unit; Developing policies and Plans; Ensuring effective service delivery; Coordinating developmental activities to empower the community; Facilitating and coordinating citizen participation in the development of policies and delivery of Services; Exercising any functions and powers delegated by the County Executive Committee Member in charge of County Public Service, Administration and Gender Affairs or any other county authority.

Ward Administrators

The Ward Administrator shall be responsible to the Sub-County Administrator for the following: Coordinating, managing and supervising the general administrative functions in the ward unit; Developing policies and Plans; Ensuring effective Service delivery; Establishing, implementing, and monitoring performance management systems; Coordinating developmental activities to empower the community; Facilitating and coordinating citizen participation in the development of policies and delivery of services; Exercising any functions and powers delegated by the County Executive Committee Member in charge of County Public Service, Administration and Gender Affairs or any other county authority.

Village Administrators:

A village administrator shall coordinate, manage and supervise the general administrative functions in the village including: Ensuring and coordinating the participation of the village unit in governance; Assisting the village unit to develop the administrative capacity for the effective exercise of the functions and powers; Participation in governance at the local level and exercise any function and powers delegated by the County Executive Committee Member in charge of County Public Service, Administration and Gender Affairs.

The County Public Service Board (CPSB)

The functions of the County Public Service Board shall be, on behalf of the county government: to establish and abolish offices; appoint persons to hold or act in offices; confirm appointments; exercise disciplinary control over, and remove, persons holding or acting in those offices as provided for under the County Government Act, 2012; prepare regular reports for submission to the County Assembly on the execution of the functions of the Board; promote in the county public service the values and principles referred to in Articles 10 and 232 of the Constitution 2010; evaluate and report to the County Assembly on the extent to which the values and principles referred to in Articles 10 and 232 of the Constitution are complied with in the county public service; facilitate the development of coherent, integrated human resource planning and budgeting for personnel emoluments in the county; advise the county government on human resource management and development; advise the county government on implementation and monitoring of the national performance management system; make recommendations to the Salaries and Remuneration Commission, on behalf of the county government, on remuneration, pensions and gratuities for the county public service employees.

5.2.1.2 The County Assembly

This category consists of elected and nominated members of the County Assembly, Hon, Speaker, Clerk and the County Assembly Public Service Board. The County Assembly is responsible for enacting appropriate laws and policies, approving and review of plans and budgets, promoting

investments through public investment committee, ensuring value for public resources, checking excesses of the executive and promoting peace and stability in the CIDP implementation process.

Speaker

The Speaker is the head of the Legislative arm of the county government. The functions of the Speaker are: Presiding at any sitting of the County Assembly; Enforcing the Standing Orders; maintaining order in the House and chairing some committees and ensuring integrity, independence and impartiality of the County Assembly.

Clerk of the County Assembly

The Clerk is the Accounting Officer of the County Assembly and plays the role of the administrative head of the County Assembly. The Clerk is the secretary to the County Assembly Service Board.

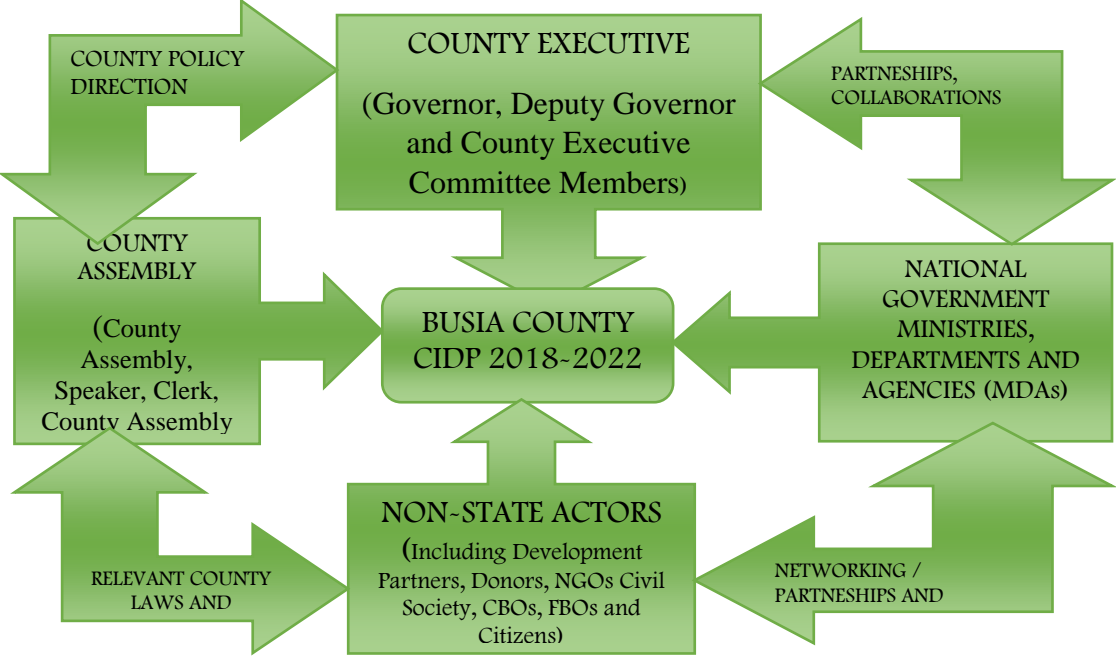

Member of the County Assembly

A member of a county assembly is responsible for maintaining close contact with the electorate and consults them on issues before or under discussion in the county assembly; presenting the views, opinions and proposals of the electorate to the County Assembly; attending sessions of the County Assembly and its committees; providing linkage between the County Assembly and electorate on public service delivery; and extending professional knowledge, experience or specialized knowledge to any issue for discussion in the County Assembly.

County Assembly Service Board (CASB)

The board is responsible for providing services and facilities to ensure efficient and effective functioning of the County Assembly; constituting offices in the county assembly service and appointing and supervising office holders; preparing annual estimates of expenditure of the county assembly service and submitting them to the county assembly for approval, and exercising budgetary controls over the service; undertaking, singly or jointly with other relevant organizations, programmes to promote ideals of the county democracy; and performing other functions necessary for the well-being of the members and staff of the county assembly; or prescribed by national legislation.

Figure 8: Institutional Framework

The Figure above presents the institutional framework that will guide the 2023-2027 CIDP implementation. The implementation framework presents four categories of stakeholders and distinct roles they play in the county development process.

5.2.1.3 National Government Ministries, Departments and Agencies (MDAs)

According to the Fourth Schedule of the Constitution 2010, thirty-five (35) functions were retained at the National Government and fourteen (14) were devolved. Critical functions affecting the citizens including matters of Youth Development, Education, Social Services, Children, Security among other falls under the National Government Ministries, Departments and Agencies (MDAs). In this planning period, necessary systems and structures will be put in place to enhance partnerships, collaborations and synergies with the national government MDAs at the county level.

Non-state Actors

Non-state actors include the Bilateral and Multilateral agencies operating in Busia County. Multilateral agencies comprise of International NGOs, UN agencies (UNDP, UNICEF); Bilateral Agencies (SIDA, USAID, DFID and NORAD); multilateral agencies (UNHCR, Red Cross and AMREF) and International Faith Based Organizations (Catholic Relief Services). These organizations will be encouraged to invest in the governance and development sectors of choice especially on capacity building of the county governance structures and communities they work with. They will play critical roles in supporting policy formulation processes, financing projects and programmes, providing civic education to the citizenry, providing watchdog roles, conducting or supporting surveys and researches and development as well as supporting resource mobilization activities.

Legally established committees and county CIDP implementation organs

The Kenyan legislative framework establishes various bodies to co-ordinate and support the CIDP implementation process. Key among them is the County Economic and Budget Forum (CBEF) bringing together the County Executive Committee; community representatives from women youth, persons living with disability, civil society, elderly persons and the private sector and professional associations. During the implementation period, CBEF will continue to provide

advisory on development priorities in budgets, preparation of budget statements, advising the County Executive on strategic investments and representing the community aspirations.

Busia County Citizens

Besides being beneficiaries of the CIDP Programmes, Projects and Initiatives (PPIs), Busia County citizenry will be involved in CIDP implementation process. Formal channels including use of community representatives, community based organizations, private sector, professional bodies, farmers, business community, community groups, civil society organizations and the citizenry will drive the county development process either directly or indirectly. Through public participation forums, the residents will play a role in decision making processes, participate in monitoring and evaluation, and demand for accountability from leaders and duty bearers and issue score cards for service delivery and performance. The citizenry development issues and priorities will be cascaded through developing County Annual Development Plans (CADPs) that will implement the CIDP.

County CIDP Implementation Support Organs & Oversight Committee

The CIDP committee membership comprises of the Governor, Senator, Members of Parliament, the County Women Representative, Members of County Assembly, representatives from community women/men, youth, persons with disability, civil society, national government, County Government and professional associations. The committee is charged with the responsibility of receiving project reports, ensuring value for public resources, conducting rapid assessments, providing policy advice, recommending investigations and disciplinary measures on errand officials and providing feedback to the community.

The county CIDP implementing level

The unit is comprised of membership drawn from County departments, National Government Ministries, Departments and Agencies (MDAs) and representatives from the Civil Society, community and Private Sector. These levels will be providing technical backstopping services during implementation, conducting assessments and giving feedback on project progress, coordinating implementation processes to minimize duplication, advising on project design, selection, budgeting, implementation, evaluations as well as advising on sustainability aspects.

Sub-County/Ward Implementing Levels

This level comprises of all the Sub – County departmental officers, ward officers, Sub - County and ward development committees. The officers at this level will be involved in project identification, supervise implementation, support M&E, generate reports, and ensure value for public money.

Monitoring and Evaluation Section

In accordance with the County Integrated Monitoring and Evaluation (CIMES) guidelines, the section will be generating information for project/programme improvement, reviewing and documenting best practices as well as developing indicators to track project and programme performance.

Table 64: Institutional Arrangement

S/No	Institution	Role in Implementation of the CIDP
1	County Executive Committee	Policy formulation and implementation of CIDP.
2	County Assembly	Legislation, budget allocation and oversight
3	County Government Departments	Provision of technical support during preparation and implementation of CIDP

S/No	Institution	Role in Implementation of the CIDP
4	County Planning Unit	Preparation of plans and budget
5	Office of the County Commissioner	Coordinating national government functions at the county level.
6	National Planning Office at the county	Issuance of guidelines and technical support for preparation of CIDP
7	Other National Government Departments and Agencies at the county	providing technical backstopping services during implementation, conducting assessments and giving feedback on project(s) progress
8	Development Partners	Funding and technical support
9	Civil Society Organizations	Participate and contribute in development activities of the county advocacy and awareness creation.
10	Private Sector	Partners in service provision; Employment creation; Promotion of private enterprises and competition and supplement government efforts through PPPs.
11	Management Committees of Devolved Funds.	Complementing funding of various projects.
12	FBOs (Roman Catholic, PCEA, ACK, etc.)	Participate and contribute in the development activities of the county.
13	Community	Provision of skilled/unskilled labour; Participate in decision making on issues affecting them; Community policing, collaboration with the security agents; Active participation in prioritization of projects, implementation and provide information and utilization of infrastructural facilities.
14	Development Committees	Provide leadership in development and mainstreaming cross cutting issues in projects and programmes.
15	Donors	Inject new resources in form of credit, grants material support and technical assistance/capacity building
16	Farmers' Organizations	Extension services and community mobilization.
17	Finance Institutions	Avail credit, create awareness and train community on financial management.
18	Regulatory Boards	Regulation of processing and marketing of the produce
19	Kenya National Bureau of Statistics (KNBS)	Collection and dissemination of consumable data and information/statistics for planning purposes
20	National Aids Control Council (NACC)	Provide policy guidance on halting and the reversing the spread of HIV/AIDS; Support OVC's and People Living with HIV/AIDS.
21	National Council for Persons with Disability	Enhance capacity of disabled person's organizations, institutions and individuals; Support educational institutions for physically challenged
22	NEMA	Enforcement of EMCA.
23	Legislature	Deliberation and approve sector laws & policies and provision of conducive legal environment.
24	Red Cross	Support disaster response and implementation of development projects; capacity building on disaster management; Research on development.
25	Research Institutions	Carrying out research and development to assist in decision making
25	The National Government	Policy guidance, formulation of conducive laws and training on management skills, enforcement of laws, dispensation of justice, conducting of elections.

S/No	Institution	Role in Implementation of the CIDP
26	Transport Service Providers	Provide public transport services to all stakeholders Enhance economic growth by provision of access to markets by people and goods
27	Commissions	Constitutional mandate implementation
28	County Public Service	Human resource management.
29	County Budget and Economic Forum (CBEF),	Coordination and collection of views from the public during planning process
30	Lake Region Economic Bloc(LREB)	Developing and implementing plans for the region

5.3 Resource Mobilization and Management Framework

According to the Constitution 2010, there exist two distinct sources of revenue for the county: the external equitable share from the National Government and the locally generated revenue. Further, according to the County Government Act, 2012 the counties are required to put in place additional strategies to enable them meet the CIDP financing resource gaps. The resource generation options at the county disposal include revenues generated from internal sources, county investments and debt financing guaranteed by the national government.

Due to limited resources, elaborate resource mobilization frameworks are required. This calls for strategies leveraging on existing sources of revenue both locally and external to implement the CIDP. Existing county Resource Mobilization Strategy (RMS) and underlying assumptions are discussed in subsequent sections:

5.3.1 Resource Requirements by Sector

This section indicates projected financial resources required for each sector during the plan period. The section also includes percentages of the total budget for each sector as presented as in Table 22.

Table 65: Summary of Sector Financial Resource Requirements

Sector/Department Name	Resource Requirement (Ksh. Million)							
	FY 2023/24	FY 2024/25	FY 2025/26	FY 2026/27	FY 2027/28	Proposed PPP projects (Kshs. In Millions)	Total (Kshs. In Millions)	% of total budget requirements
Agriculture, Livestock, Fisheries, Climate Change & Blue Economy	3,764.00	3,176.80	2,792.40	2,571.50	2,106.90		14,411.60	16.38
Trade, Industry, Investment & Cooperative	392	654.5	749.7	1,395.00	1,067.00		4,258.20	4.84

*1-2% of the total CIDP budget should be allocated to County Climate Change Fund to enhance county resilience and mitigation to climate change (Climate Change Act, 2016)

5.3.3 Estimated Resource Gap

This section highlights the County resource gap in terms of the estimated resource needs against the projected revenues as in Table 24.

Table 67:Resource Gaps

FY	Requirement (Ksh. Mil)	Requirement (Ksh. Mil)~ PPP	Total Requirement (Ksh. Mil)	Estimated shared (Ksh. Mil)	Variance (Ksh. Mil)
2023/24	16,998.81	1,000	17,998.81	8,814.34	-9,184.47
2024/25	19,394.40	2,000	21,394.40	9,695.77	-11,698.63
2025/26	18,635.35	~	18,635.35	10,665.35	-7,970.00
2026/27	16,736.83	~	16,736.83	11,731.88	-5,004.95
2027/28	13,224.26	~	13,224.26	12,905.07	-319.19
Total	84,989.65	3,000.00	87,989.65	53,812.41	-34,177.24

5.3.4 Resource Mobilization and Management Strategies

This section identifies feasible resource mobilization and management strategies to address the huge resource gap. The section includes capital financing strategies, operational financing strategies and other strategies that will enhance cost effectiveness.

5.4 Asset Management

The county will ensure proper inventory management systems are put in place. This will entail surveys and regular updates of the county asset inventory database in accordance with the safety and operational manuals for management and use of the assets. The County Asset Management Committee will guide and advice on all sustainable utilization of available assets. Public Private Partnerships will be sought on capital intensive and risky assets to reduce related burden of risks on the County Government. Besides, the county will leverage on both current and capital assets such as material stocks, work in progress, and cash at bank, debtors, real estates, plant and equipment to generate adequate resources for CIDP implementation.

5.5 Risk Management

This section provides key anticipated risks that may hinder implementation of 2023-2027 CIDP, potential risk implications and proposed mitigation measures to enhance sustainable development.

Table 68: Risk, Implication, Level and Mitigation Measures

Risk Category	Risk	Risk Implication	Risk Level (Low, Medium, High)	Mitigation measures
Financial	Inadequate financial resources	Stalled projects	Medium	Resource mobilization Strategies
Technological	Cyber security Risk	Breach of valuable information	High	Investment in cyber security risk management
Climate Change	Drought	Loss of livestock and reduced crop productivity	High	Climate smart agriculture practices
Organizational	Inadequate Human Resource Capacity	Inefficiency in service delivery	Medium	Timely recruitment

5.6 Key Sources of Revenue

5.6.1 Transfers from National Government

As provided for in Article 209 of the Constitution 2010, the National Government transfers revenue in form of equitable share, conditional grants raised nationally and other targeted funding from donors to the County Governments. The amount transferred under this category is usually determined through a formula recommended by the Commission for Revenue Allocation (CRA) and approved by Parliament. In Busia County, the National Government transfers accounts for over 95% of all total revenue used to finance both the recurrent and capital development expenditures. The amount is consolidation of all funds received in form of equitable share and conditional grants from the various development partners. In the current implementation period, the allocation parameters to be used by CRA are likely to change and Busia County is expecting significant changes in the flow of funds under this category.

5.6.2 Locally Generated Revenue

This is revenue derived by or on behalf of the County Government from levies, rates, fees, charges or any other sources as per Article 209 (3) of the Constitution of Kenya 2010. In the previous CIDP period, Busia County relied mostly on property rates, entertainment taxes, and charges for its services as local sources of revenue that constituted 5% of the total funding of CIDP. This has continued to stagnate around Kshs. 270 Million annually. There was upward trend in locally generated revenue between 2013 and 2016 above Kshs 300 Million followed by a drop to Kshs. 250 Million in the Year 2017 and the trend has been sustained at around Kshs 250 Million every fiscal period.

5.7 Strategies for Revenue Collection

To enhance revenue generation for 2023-2027 CIDP implementation period, the County Government will pursue a number of strategies that include:

5.7.1 Automation of Revenue Collection Processes

To minimize loss of revenue, the County Government embarked on automating its revenue collection processes. In this implementation period, the county will continue to complete and attain 100% automation especially on payment and monitoring systems for levies collected on rates and property, entertainment taxes, and charges for services.

5.7.2 Expanding Own Source Revenue Generation Mechanisms

The internal measures include; taxes, fees, fines, rates, accruals, and Appropriations in Aid (AIA).

5.7.2.1 Taxes

Busia County will develop appropriate legislation to guide taxation regimes. This will be guided by provisions as prescribed in PFM Act 2012 and in the County Finance Act that mandates the County Assembly to legislate and guide on how the County Government can broaden the tax base and administer taxes.

5.7.2.2 Fees

The County will seek to enhance collection of fees on services, goods and works done. This will be through continued automation of revenue collection especially on levies that will be collected on business licenses, parking services, refuse collection, entertainment joints, use of public grounds and stadia, access to certain information and approval of physical plans. Incentives will

be given to encourage investment in ventures that attract higher rates such as investment in Central Business Districts (CBDs), industrial zones and high cost residential estates.

5.7.2.3 Fines

Non-compliance with existing county laws, rules and regulations especially on urban areas, towns and municipalities will attract fines from offenders. They comprise of fines imposed for non-payment of rates, wrong parking, causing public nuisances, breaking the county laws, rules and regulations. To ensure this, mechanisms will be put in place to increase surveillance for offenders and appropriate actions taken.

5.7.2.4 Rates

To increase revenue collection under property rates, the county will give waivers to attract ratable land owners to pay accrued land rates. The valuation roll will be adopted and updated continuously to maximize on collection of rates.

5.7.2.5 Accruals

Accruals for the county will arise from interests charged on car loans and mortgages and any other funds as may be approved by the County Assembly.

5.7.2.6 Cess

The County will improve collection of cess for movement of goods. This particular strategy has potential for generating additional revenue for implementing proposed priority programmes and projects.

5.7.2.7 Disposal of Government Property

The county will utilize funds from sale of official property, assets and investment. Income from auctioning of serviceable and un-serviceable items and other authorized measures will be appropriately invested back to develop systems for increased own revenue generation.

5.7.2.8 Royalties

The County Government will generate revenues from corporations and companies utilizing natural resources within the county boundaries.

5.7.2.9 Annual Events

Targeted revenue generation events will be scheduled including; peace walks, marathons, bicycle rides, exhibitions and agricultural shows and trade fairs to generate revenue for county operations

5.7.2.10 Cross Border Trade

Busia and Malaba towns are among Kenya’s gateways to Eastern and Central African markets. Cumbersome cross-border trade procedures and rampant informal cross border trade have continuously been experienced occasioning loss of revenue. In this planning period, the county will seek to institutionalize and operationalize various initiatives to ensure proper management of cross border trade with the aim of improving revenue collection.

5.7.3 Formulation of Relevant Policies and Laws

The county will focus on formulation of relevant policies, laws and regulations to enhance both generation and effective utilization of existing resources. Special Investment Taxes (SITs) will be used as incentives to attract private investments to peripheral areas of the county by charging little or no taxes for setting up premises, plant and equipment on such areas designated by the County Government. Besides, this will create enabling business environments for trade and economic integration increasing the county's revenue resource base.

5.7.4 Mainstreaming Resource Mobilization Across the County Departments

The county departments provide basic units for the revenue streams. Busia County has been utilizing the departments to collect revenues from levies, rates, fees, charges or any other source as authorized by law. Being platforms for revenue collection and having mapped out all the revenue streams falling under each department, the county will continue building capacities and providing necessary support to departmental heads to expand and fully exploit respective revenue generation potentials.

5.7.5 Expanding External Sources of Revenue

External sources of funding will be explored as vital components for funding proposed development initiatives. These external sources of revenue include Foreign Direct Investments (FDIs), Foundations and philanthropies, Corporate Social Responsibility (CSR), external civil society groups, Bilateral/Multilateral funding and funding from the United Nations system in Kenya. These will be pursued to reduce financing gaps.

5.7.5.1 Development of Special Economic Zones (SEZs)

To generate additional income for implementation of CIDP, more efforts will be geared towards establishing Special Economic Zones with modern public amenities. This will expand resources generation by attracting more investors into the county.

5.7.5.2 Foreign Direct Investments (FDI)

The County will seek to improve business environment to attract Foreign Investments. Having held successful Investors' Conference in 2015, the county government will seek to leverage on gains made by providing the enabling infrastructure, entering into beneficial Public Private Partnerships (PPPs) and developing MOUs on targeted transformative investments.

5.7.5.3 International Civil Society Organizations

The County Government will continue to seek support from International civil society groups such as Action Aid, World Vision, KIWASH, CABDA, Mission International, Maji Milele, AMPHAT, Fred Hollows, Save the Children, Global Initiative, and Care International among others in funding proposed development programmes and projects. This will be achieved by building close working relationships. Besides, interactive forums for information sharing and generating feedback on development aspirations as well as related conditions for partnerships engagements will be developed.

5.7.5.4 United Nations Agencies

Busia County will explore ways and possibilities of partnering with the United Nations Agencies in Kenya as part of the resource mobilization strategy. The envisaged agencies include Food and Agriculture Organization (FAO), the World Bank (WB), International Fund for Agricultural Development (IFAD), United Nations Development Programme (UNDP), United Nations Population Fund (UNFPA), World Food Programme (WFP), World Health Organization, (WHO),

UNICEF, UN Women among others. This will be done within the confines of United Nations Development Assistance Framework (UNDAF) that guides collaborative responses of the UN system in Kenya’s priority development needs while maintaining individual agency mandates.

5.7.5.5 Strategies for Financial Management

The county leadership, through the established county systems will enhance mechanisms to minimize revenue leakages. Public Finance Management Act, 2012 and the relevant County Finance Acts will guide processes. Various government operatives including the National Treasury, Controller of Budget, Office of the Auditor General, the County Treasury, County Budget and Economic Forum and the public will continue to play more nuanced supervisory & advisory roles of ensuring that available finances are managed in line with stipulated provisions in law.

Through these institutions, regular reviews on utilization of finances will be carried out and advice given on best practices to ensure efficiency and effectiveness in resource mobilization and utilization. The various executive committees and institutions will continue controlling and approving all financial processes to curb individuals’ discretion and promote principles of shared responsibility.

5.7.5.6 Strategies for Capital Financing

Capital financing avenues both for equity and debt will be sought as a supplement to existing financial streams. This will comprise of internal accruals, securities, term loans, working capital advances, venture capital, bonds, debentures and miscellaneous sources.

5.7.5.7 National Government Budgetary Allocations

Traditionally, National Government funding is channeled through various line Ministries, Departments and Agencies. Public Finance Management Act Regulations govern the utilization of these funds. The National Government, through various Acts also established various funds such as National Government Constituencies Development Fund, Women Enterprise Development Fund (WEDF; Youth Enterprise Development Fund (YEDF; UWEZO Fund, Secondary School Bursary Funds; Joint Trade Board Development Loans; SME Funds, HIV/AIDS fund and micro financial institutions. Although these funds are administered by various National Government agencies, the County Government will put in place appropriate mechanisms to enhance access and utilization of the funds in supporting the targeted development initiatives especially among the youth, women and PLWDs.

5.7.5.8 Public Private Partnerships (PPPs)

CIDP 2023-2027 envisages implementing major infrastructure projects that are capital intensive through models under Public Private Partnerships through pursuit of strategic financing approaches and collaborative arrangements.

5.8 Measures to Address Resources Gaps

The projected county resource deficit is projected to be over Kshs 34.629 Billion. To fill this gap, the County Government will seek to implement revenue generation strategies as proposed in the Resource Mobilization Framework. Among significant approaches envisaged include:

- Pursuing Public Private Partnerships for major infrastructural projects;
- Seeking capital funding including equity and debt financing;
- Leveraging on mainstream national government financing funded through the MDAs;
- Expanding own-source revenue generation mechanisms;

- Maintaining and strengthening strong relations with donors and development partners for continued programme/project funding;
- Dormant revenue stream like sand and quarry cess will be rejuvenated;
- Undertake public awareness programmes to reduce delays and resistance in payment of taxes;
- Construct trailer parks to enhance payment of parking fees.

The county will leverage on contributions from the development partners through:

- ✓ Mapping of more development partners/donors;
- ✓ Maintaining and strengthening strong relationships with development Partners and donors;
- ✓ Continued search for additional funding streams with new partners;
- ✓ Seeking alternative funding including grants and donations;
- ✓ Attracting and utilizing Charity Organizations/Foundations and Philanthropies;
- ✓ Embracing Corporate Social Responsibility initiatives; and,
- ✓ Leveraging on support from the Civil Society Organizations through signing MOUs.

6.1 Overview

This chapter outlines how Busia CIDP 2023-2027 will be monitored and evaluated during and after its implementation. The M&E processes, methods and tools are guided by Section 232 of the Constitution 2010 and all other legal provisions that provide for M&E, Busia County M&E Policy in line with National M&E Policy, CIMES Guidelines, Kenya Norms and Standards for M&E and the Kenya Evaluation Guidelines. The chapter highlights: proposed M&E structure; data collection, analysis, reporting and learning; M&E outcome indicators tracking; and dissemination and feedback mechanism.

The chapter contains monitoring and evaluation framework that will be used at county level to track progress on implementation of CIDP 2023-2027. It shows the proposed monitoring and evaluation structures to be used in detailing projects and programmes and implementation agencies as well as selected county monitoring tools and indicators.

Monitoring is systematic and routine collection of information from projects and programmes. It involves checking projects/programmes progress against plans and information gathered is used for evaluation. Results, processes and experiences are documented and used as basis for steering decision making to review processes. Monitoring serves the following purposes:

- Learning from experience and practices so as to ensure improvement in future;
- Accountability for resources used in a project/programme and results obtained;
- Providing implementers of project/programme the ability to make informed decisions in future; and,
- Promoting empowerment of beneficiaries.

Evaluation is a practice of assessing completed project and programmes in terms of effectiveness, efficiency, impact and sustainability. A policy is a statement on the course of action considered as prudent to be adapted to fulfill a certain need. Policies are clear, simple statements of how government or a department intends to conduct its services, actions or businesses to realize set objectives. It provides a set of guiding principles to help with decision making.

Previously, before the devolved system of government, M&E in Busia County was conducted under the umbrella of the National Integrated M&E System (NIMES). This was a system that coordinated M&E activities both at National and District levels across the country. The then Busia District like all other districts in the country, conducted monitoring and evaluation through District Monitoring and Evaluation Committees (DMEC) chaired by District Commissioner as required by NIMES. However, DMEC was not able to discharge M&E functions due to weaknesses emanating from:

- Inadequate financing;
- Lack of a legal framework and M&E policy,
- Weak M&E culture; and,
- Inadequate human resource capacity.

During transition period, tracking of implementation of government programmes and projects suffered un-coordinated tracking and reporting as M&E structures collapsed with old system. However, uncoordinated M&E from various agencies continued to exist at all levels within the county but M&E reports were still not harmonized nor effectively shared with stakeholders to inform planning and budgeting. The previous system also focused more on activities and or outputs monitoring. The proposed Busia County M&E Policy advocates for change in this kind of monitoring to focus much more on results i.e. Result Based Monitoring and Evaluation.

6.2 County Monitoring and Evaluation Structure

In the Year 2003, the National Integrated Monitoring and Evaluation System (NIMES) was conceptualized as the mechanism for the Government of Kenya to monitor implementation of public policies, programmes and projects. With the establishment of the counties, it became necessary counties to establish their County Integrated M&E Systems (CIMES) which are interlinked to NIMES. The proposed Busia County M&E policy will enable development and implementation of CIMES in order to track development results at county level. MEU is a unit in the Economic Planning Directorate in the Department of Finance, ICT and Economic Planning. MEU in collaboration with designated Officers for M&E from the National Government at county level, shall be responsible for all monitoring and evaluation activities and M&E reports generated through CIMES.

6.3 M&E Capacity

All the officers tasked to oversee M&E at all levels are all equipped with the skills and capacities to perform their roles. The introduction of E-CIME enables the officers to be trained on ICT and this has increased efficiency in uploading and data analysis for continuous updating of projects database and increase in use of M&E information over the period.

6.4 M&E Outcome Indicators

This section presents programme outcome indicators by sector as captured in Table(s) 17 of the sector programmes.

Table 69: Outcome Indicator Reporting

Programme	Outcome	Outcome Indicators	Baseline		Mid Term Target	End Term Target	Reporting Responsibility
			Value	Year			
Agriculture, Livestock, Fisheries and Blue Economy							
Agriculture Land Use and Management	Increased Land Acreage Under Agricultural Use	Acreage of land under food crop	146,562.00	2021	177,340.00	236,040.00	Department of ALFBC
		Acreage of land under cash crop	34,656.00	2021	41,934.00	55,813.00	Department of ALFBC
Crop Production and Management	Increased Agricultural Productivity	Increase in Yield Tonnage of Major crops					
		Maize	67,137.00	2021	81,236.00	108,125.00	Department of ALFBC
		Beans	11,195.00	2021	12,342.00	14,289.00	Department of ALFBC
		Sorghum	7,354.00	2021	8,108.00	9,386.00	Department of ALFBC
		Millet	3,310.00	2021	3,650.00	4,224.00	Department of ALFBC
		Cassava	150,694.00	2021	182,340.00	242,695.00	Department of ALFBC
		Sweet potatoes	72,122.00	2021	79,515.00	92,048.00	Department of ALFBC
	Reduction in Post-harvest losses	% reduction in post-harvest losses	77	2021	80	85	Department of ALFBC
Agribusiness and Agricultural Value Chain Development	Increased Value-added Agricultural Produce	Increase in Annual Tonnage of cassava Value added	-	2022	100,000.00	169,887.00	Department of ALFBC
	Increased Uptake of Credit by Farmers	% increase in farmers accessing credit	1.3	2022	6	25	Department of ALFBC

Programme	Outcome	Outcome Indicators	Baseline		Mid Term Target	End Term Target	Reporting Responsibility
			Value	Year			
		Increase in percentage of debts recovered	22.6	2022	75	85	Department of ALFBC
Agricultural Training	Enhanced Adoption of New Farming Technologies	Number of technologies promoted	7	2022	5	5	Department of ALFBC
Fisheries and Blue Economy Development	Increased Fish Production	Increase in Tonnage of annual volume of fish produced from Aquaculture	33.2	2021	640	840	Department of ALFBC
Livestock Production	Improved Dairy Production	Increase in Annual Litres of Milk Produced (Litres in Million)	30.4	2021	35.5	40.5	Department of ALFBC
	Increased value added milk products	Increase in Annual Litres of Milk Value added to;					
		Fresh packed milk (Litres in Million)	-	2022	24.5	24.3	Department of ALFBC
		Fermented (Mala) packed milk (Litres in Million)	-	2022	3.5	6	Department of ALFBC
		Yoghurt (Litres in Million)	-	2022	7.5	10.2	Department of ALFBC
	Improved livestock production	Increase in Annual tonnage of livestock products;					
		Beef	3,352	2021	3,696	4,278	Department of ALFBC
		Poultry meat	1,900	2021	2,299	3,060	Department of ALFBC
		Chevron	177	2021	195	226	Department of ALFBC
		Mutton	101	2021	112	129	Department of ALFBC
		Pork	2,310	2021	2,547	2,948	Department of ALFBC
		Honey	70	2021	85	113	Department of ALFBC
		Rabbit meat	4.4	2021	4.6	4.9	Department of ALFBC
		Increase in Trays of Eggs (in Millions)	1.4	2021	1.7	2.3	Department of ALFBC
	Increased quantity of feeds produced	Increase in Tonnage of Annual Livestock feeds Produced	-	2022	14.5	43.5	Department of ALFBC
Veterinary Services	Reduction in Vector Borne diseases	Number of Vector Borne diseases cases reported	94,000	2021	47,000	20,000	Department of ALFBC
		Number of livestock infectious diseases cases reported	36,000	2021	18,000	10,000	Department of ALFBC

Programme	Outcome	Outcome Indicators	Baseline		Mid Term Target	End Term Target	Reporting Responsibility
			Value	Year			
	Wholesome and safe Meat and other livestock products for human consumption	The proportion of Slaughter facilities that meet Meat safety standards (%)	17	2021	50	80	Department of ALFBC
	Increased access to AI services	% increase in access to AI services	40	2021	60	80	Department of ALFBC
	Improved Veterinary Infrastructure and staff capacity	Reduction in Veterinary Extension Officer to Farmer Ration	2:125	2022	1:083	0.736	Department of ALFBC
		% Reduction in Vaccine Spoilage	70	2022	80	95	Department of ALFBC
Climate Change	Enhanced Local Community Resilience to Climate Change	% of households using renewable energy,		2022	30	40	Department of ALFBC
Locally Led Climate Action programme (LLOCAs)	Strengthened community resilience to Climate change and Climate variability	% of households using biogas for cooking,		2022	10	15	Department of ALFBC
		% of households using energy saving jikos,		2022	15	20	Department of ALFBC
		% of households using solar for lightening		2022	30	50	Department of ALFBC
		% of tree growth that survived for at least one year	60	2022	80	90	Department of ALFBC
Trade, Investment, Industrialization and Cooperatives							
Programme	Outcome	Outcome Indicators	Baseline		Mid-Term target	End Term Target (2027)	Reporting Responsibility
			Value	Year			
Trade Development and Investment	Increased access to trade and investment	Proportion of MSMEs benefitting from grants	3.30%	2022	6.70%	33.30%	Department of Trade, Investment, Industries and Co-operatives
		Proportion in the number of traders benefitting from the grants	0	2022	40%	100%	Department of Trade, Investment, Industries and Co-operatives
		The proportion change in the number of groups accessing the revolving fund	30.67%	2022	50%	66.70%	Department of Trade, Investment, Industries and Co-operatives
		Proportion of markets constructed and operational	42.80%	2022	71.40%	100%	Department of Trade, Investment, Industries and Co-operatives

Programme	Outcome	Outcome Indicators	Baseline		Mid Term Target	End Term Target	Reporting Responsibility
			Value	Year			
		Proportion of investment projects set up	0	2022	50%	100%	Department of Trade, Investment, Industries and Co-operatives
Fair Trade Practices	strengthened fair trade practices	proportion of machines examined/calibrated	11.40%	2022	10%	8%	Department of Trade, Investment, Industries and Co-operatives
Industrialization	Promoted Industrialization	Industrial Park operational	0	2022	0	100%	Department of Trade, Investment, Industries and Co-operatives
		Percentage of industrial clusters identified	0	2022	20%	60%	Department of Trade, Investment, Industries and Co-operatives
Cooperative Business Development	Improved access to cooperative services	percentage increase in public members sensitized	0	2022	15%	70%	Department of Trade, Investment, Industries and Co-operatives
		Proportion of cooperative members trained	0	2022	20	100%	Department of Trade, Investment, Industries and Co-operatives
Educational and Vocational Training							
Programme	Key Outcome	Outcome indicators	Baseline		Mid-term Target	End-term target	Reporting Responsibility
			Value	Year			
Early Childhood Development Education	Increased Access to equitable and quality Early Childhood Development Education	Gross Enrollment rate	77.50%	2022	82%	87%	Education and Vocational Training
		Transition rate	93.64%	2022	95%	100%	Education and vocational

6.5 Data Collection, Analysis and Reporting

This section provides the main methods and tools that will be used for data collection, archiving, analysis and reporting arrangements in line with the National M&E Norms and Standards. These include development of CIDP Indicator Handbook, standard reporting templates based on the County Annual Progress Report Guidelines. The County Government will continue to integrate technology in M&E through use of e-CIMES. In monitoring, policy, programme and project implementers will be expected to systematically collect qualitative and quantitative data on progress of implementation against planned targets. The data will provide implementers and other stakeholders indications on the extent of progress made towards achieving the set objectives.

Monitoring processes will be guided by the following:

- Indicators identification;
- Targets set;
- Data sources;
- Frequency of data collection;
- Responsibility for data collection;
- Data analysis and use; and,
- Information products, Reporting and Dissemination.

Monitoring will be conducted for policies, programmes and projects at all administrative levels at national and county levels. At the project level, monitoring will focus on inputs, processes, outputs and progress toward achieving the desired objectives and results. At the programme

level, monitoring will focus on assessing effects of various interventions against set objectives. Consequently, monitoring within the county will focus on assessment of progress made towards achieving sectoral development outcomes. It will also focus on systematic checking conditions/sets of vulnerable and/or special identified groups as per the CIDP.

Policy monitoring will involve gathering evidence on the implementation and outputs of policies during implementation and use findings to influence the future causes of actions and decisions. The State and Non-state actors within Busia County will be required to submit timely and accurate progress reports of policies, programmes and projects in line with approved reporting standards, formats and frequency.

The MEU shall collaborate with departments, agencies and non-state actors to design formats for data collection, analysis and reporting. MEU shall, therefore as a priority, determine the reporting requirements for production of departmental M&E Reports on Annual Work Plans of CIDP and the County Annual Monitoring and Evaluation Reports and any other relevant impact reports as may be necessary. For effective monitoring and evaluation, systems will be developed for real time reporting and information sharing through web-based interactive programmes and portals. All quarterly reports will be considered provisional, except for the quarter ending June every year when all information will be treated as final. The fourth quarter reports shall include information from all preceding 3 quarters and shall include all revisions of the information deemed provisional in earlier quarters. The Annual Progress Report of the CIDP reports shall be deliberated by the County Stakeholders Forum as appropriate.

6.6 Dissemination, Feedback Mechanism, Citizen Engagement and Learning

The County Government will disseminate, get feedback, engage citizens in the M&E process as well as reporting and learning. Specific means of communicating M&E information based on unique needs of various stakeholders will be identified. Horizontal reporting within the county, shall involve heads of departments, Agencies and Non-state actors. These officials shall present quarterly reports on programmes and projects under implementation to COMEC. Non-State actors who include Civil Society Organizations, Private Sector Organizations, philanthropies & or Foundations, Faith Based and Community Based Organizations shall report through their respective sectors.

The Sub - County M&E Reports shall be forwarded to MEU for consolidation into the county reports. Consequently, the consolidated county reports shall be shared with the stakeholders. MEU will advise on actions to be taken, including evaluations of projects and programmes to ascertain if they are meeting the intended objectives. The COMEC shall send consolidated reports to the County Intergovernmental Forum and share them with MED within the State Department for Economic Planning.

6.7 Evaluation Plan

This section identifies key policy, programmes for evaluations during or after the plan period. This will include rapid evaluations, impact evaluations, CIDP midterm/end term Reviews or any other type of evaluations that may be preferred. The evaluations proposed will be programme or sector level based. Due to the high cost implications of evaluations, the proposals will be limited to key priority programmes and or policy areas based on agreed selection *criteria for selecting programmes as provided for in the Kenya Evaluation Guidelines, 2020.*

Table 70: Busia CIDP 2023 -2027 Evaluation Plan

Policy/Pr ogramm e Project	Evaluation Tittle	Outcome	Use of evaluation findings	Commission ing Agency/Par tners	Anticipa ted Evaluati on Start date	Anticip ated Evaluati on End date	Evaluati on Budget (Kshs Million)	Source of Funding
CIDP	Mid tern review of the 3 rd Generation CIDP	Improved implementat ion of the CIDP programmes	Improve implementation of the CIDP programmes and effective planning based on informed decisions	Department of Finance, ICT and Economic Planning	June 2025	Septem ber 2025	50	GoK/Donor

Resolution of IBEC Meeting of November 2019. The State Department for Planning to review and give comments within two weeks of receipt of the draft CIDP.

ANNEX 3: INTEGRATION OF POPULATION ISSUES INTO CIDP

Globally, UN Member Governments (Kenya included) agreed to integrate population issues in all development planning at all levels and in relevant sectors. Consequently, it was agreed that “people are at the centre of sustainable development, hence a fuller integration of population dynamics into development planning and review processes will assist countries in achieving the Sustainable Development Goals and targets by 2030”.

Planning and managing effectively the needs of current and future generations require knowledge about population dynamics (size, age-structure, distribution, characteristics and growth rate) today, and in future including their nature of change over time. To *‘leave no one behind’*, it is essential that data for planning, implementation and monitoring goes beyond national averages and progress to disaggregated data to differentiate levels of achievement that includes hidden population groups. To ensure that population issues have been integrated into the CIDP, each sector should outline the following: Rationale; programme intervention areas; and integration issues.

Rationale: The rationale should provide the important role the sector plays in the broader context of human development and hence the justification for its inclusion in the CIDP. The justification should be explicit in identifying specific areas or goals, be they at global or national level, that the sector will contribute to. To lend credence to such justifications, it helps to cite relevant protocols, policies, or legal frameworks (such as a national constitution).

Programme intervention areas: It is important for each sector to be focused – hence the need to identify specific intervention areas that will be addressed during the plan period. In so doing, there is clarity in terms of data requirements.

Integration issues: The gist of the integration process revolves around three areas: determination of eligible population, determination of specific needs of this eligible population, and target setting.

- **Determination of eligible population:** All development programmes worldwide aim to satisfy people’s needs and desires. However, such needs and desires vary by two key characteristics – age and sex. Consequently, need arises to determine eligible population by age and sex in each sector. Eligible populations should be obtained from population projections.
- **Determination of specific needs of eligible population:** It is not always that the interventions planned will reach or be demanded by the totality of the eligible population. Determination of specific needs of the eligible population requires knowledge about past and present social, economic, and demographic trends. Judgment statements concerning the future assist in this effort. For example, while population projections will provide figures on women in reproductive age, neither will all such women require maternal health care services, nor will the health care system be able to handle maternal health care needs of all pregnant women. Sectoral policies and norms (through forecasts) guide determination of specific needs of the eligible population.
- **Target setting:** Targets that are set should be realistic and commensurate with responsibilities and resources available. Realistic targets enable service delivery to be focused and measured, leading to continuous improvement.

To illustrate how population issues should be integrated into the CIDP, the following examples in five sectoral areas are offered.

I. Health Rationale

The goal of development is human dignity and well-being, in which health is an essential ingredient. Progress in sustainable social development is manifested in the health status of the population, and "health for all" must become one of the guiding principles within the larger framework of sustainable development. In order to achieve SDG 3, the UN member countries are obliged to *“Ensure healthy lives and promote well-being for all at all ages”*. As well, the

right to health is a fundamental human right guaranteed in the Constitution of Kenya. Article 43 (1) (a) of this Constitution provides that ‘every person has the right to the highest attainable standard of health. Similar rights are also contained in regional human rights instruments, such as the African Charter on Human and People’s Rights, of which Kenya has ratified. The Kenya Health Policy, 2014–2030, gives guidelines that ensure significant improvement in overall status of health in Kenya in line with the Constitution of Kenya, the Kenya Vision 2030 and global commitments. It is noteworthy that health services were devolved to the county level as of August 2013. Indeed, a healthy population is more productive, hence contributing to higher levels of economic growth for a country.

Programme intervention areas

A country’s health status is closely intertwined with its demographic development. Improved access to healthcare reduces mortality and the birth rate, while life expectancy rises. This calls for a life cycle approach to health. The life cycle approach is a concept that emphasizes on prevention and early intervention at every stage of life; i.e., intrauterine period, early childhood, adolescence, youth, middle age and old age. An outcome at one point in the life cycle might be a determinant for health elsewhere further in the cycle. This resonates well with SDG 3.

A healthy transition to adulthood lays the groundwork for a healthy adult population - critical to realizing a demographic dividend. Starting with infants and children, programmes that promote good health and prevent disease and infection will help them grow and develop physically and intellectually. Health programmes that provide immunizations and prevent and treat infectious diseases ensure that children are healthy and stay in school. Good nutrition, especially during the first 1,000 days of life, promotes physical, mental, and emotional growth and development among infants and young children.

Determination of eligible population

Determination of the eligible population for health will adopt the life cycle approach which disaggregates population by broad age groups. The requisite population figures should be sourced from the population projections based on the 2019 Kenya Population and Housing Census. Two examples are used to illustrate the process of integration – the number of nurses required over the Plan period (to represent the supply component of the health care system), and the number of children under 5 who will require immunization services (to represent the demand component of the health care system). The Norms and Standards for Health Service Delivery (Republic of Kenya, 2006) outline the expected population sizes and the attendant number of nurses by level of health facility as shown below.

Type of facility	Population to be served	No. of nurses per facility
Level 2	10,000	2
Level 3	25,000	14
Level 4	100,000	68
Level 5	1,000,000	212

Let us assume that the projected total population and the population age 0-4 for County Z are as shown below.

Population by age	2022	2023	2024	2025	2026	2027
Total population	2,039,518	2,073,374	2,107,229	2,141,085	2,172,953	2,204,821
Population age 0-4 years	253,971	255,307	256,644	257,980	256,819	255,657

Determination of specific needs of eligible population

To determine the number of nurses required over the Plan period by County Z, we apply the norms given above to the projected total population by year.

Type of facility	2022 (Pop. = 2,039,518)		2023 (Pop. = 2,073,374)		2024 (Pop. = 2,107,229)		2025 (Pop. = 2,141,085)		2026 (Pop. = 2,172,953)		2027 (Pop. = 2,204,821)	
	Facilities	Nurses	Facilities	Nurses	Facilities	Nurses	Facilities	Nurses	Facilities	Nurses	Facilities	Nurses
Level 2	203.95	408	207.34	415	210.72	421	214.11	428	217.30	435	220.48	441
Level 3	81.58	1142	82.93	1161	84.29	1180	85.64	1199	86.92	1217	88.19	1235
Level 4	20.40	1387	20.73	1410	21.07	1433	21.41	1456	21.73	1478	22.05	1499
Level 5	2.04	432	2.07	440	2.11	447	2.14	454	2.17	461	2.20	467
	Total	3369		3425		3481		3537		3590		3642

Target setting

If it is assumed that County Z has 2,800 nurses in place by 2022, then the deficit – hence the number to be hired – is obtained by subtracting the number in place from the number required. It, therefore, follows that the targets for nurse employment will be as shown below.

Aspect of nurses	2022	2023	2024	2025	2026	2027
Number of required nurses	3369	3425	3481	3537	3590	3642
Number of nurses in place	2800	2800	2800	2800	2800	2800
Number of nurses to hire	569	625	681	737	790	842

If circumstances dictate that County Z is only able to meet 90% of the immunization requirements, then the appropriate population to plan for is presented below.

Population by age	2022	2023	2024	2025	2026	2027
Population age 0-4	253,971	255,307	256,644	257,980	256,819	255,657
Target (90%)	228,574	229,776	230,980	232,182	231,137	230,091

Key Indicators – Outcome level

- a. Proportion of children fully immunized
- b. Incidence/Prevalence of vaccine-preventable diseases
- c. Malnutrition among children under 5
- d. Proportion of adolescents accessing sexual and reproductive health services (SRHS)
- e. Proportion of births occurring to adolescents
- f. Pregnancy rates among adolescent females
- g. Percentage of youth accessing SRHS services
- h. Percentage of youth receiving comprehensive sexuality education
- i. Percentage of youth accessing FP commodities
- j. Percentage of births attended by skilled providers
- k. Percentage of mothers giving birth in a health facility
- l. Percentage of women attending at least 4 ANC visits
- m. Percentage of women attending postnatal care clinics

Suggested sources of data

- 1. The 2019 Kenya Population and Housing Census Reports
- 2. MOH Reports
- 3. Kenya Demographic and Health Survey (KDHS) Reports
- 4. Republic of Kenya (2006), Norms and Standards for Health Service Delivery

II. Education

Rationale

Provision of quality education, training and skills development is critical in building a just and cohesive society that enjoys inclusive and equitable socio-economic development. This is reinforced by Goal 4 of Sustainable Development Goals that seeks to ensure inclusive and equitable quality education and promote lifelong learning opportunities for all. Regionally, Kenya is a signatory to AU Agenda 2063 that outlines the significance of investing in education and training as a strategic framework for socio-economic transformation. Kenya Vision 2030 aims at creating a comprehensive, equitable and just society based on democratic ideals and education and training is expected to be the principal catalyst towards realization of this vision.

The Constitution of Kenya recognizes education as one of the basic rights of every child. This is captured in Article 53 which outlines fundamental rights of the child and Article 54 that guarantees the right to access educational institutions and facilities for all children with disability. Early childhood development is guided by the Basic Education Act, 2013, which makes provisions for the promotion and regulation of free compulsory basic education, and provides for the accreditation, registration, governance and management of institutions of basic education.

The Technical and Vocational Education and Training (TVET) Act, 2013, guides the technical and vocational education and training in the country while the Kenya Institute of Curriculum Development (KICD) Act, 2012, empowers the Institute to vet and approve, for utilization in Kenya and to analyses any local and foreign curriculum and support materials to ensure that they conform to the Kenyan standards and values. Tertiary education is guided by the Universities Act, 2012, and provides for the promotion of university education, including the establishment, accreditation and governance of universities.

Programme intervention areas

The main areas of focus in the education sector include: pre-school education (early childhood development education), primary education, secondary education, tertiary education, adult and continuing education, technical, vocational education and training. Early childhood development is a fully devolved county function.

Integration issues

Population variables and development are interdependent since any type of development requires accurate population data. Effective integration of population issues into education and skills sector will require determination of eligible population, their specific needs and setting of targets for various programme interventions. Data will be required on the number of children eligible for early childhood development, primary and secondary education and the projected population numbers for these groups in the next five years. These population statistics will be highlighted in this section.

Determination of eligible population

Eligible population for early childhood development (ECD) will be children age 4-5 years as per the guidelines of the education sector. For instance, to determine eligible children for ECD (4-5 years) in County Z, one would need the projected population by single years for 2022. The projections would be based on the 2019 population and housing census data. The projected population of children age 4-5 years would be the eligible population for ECD in County Z. The population age 4-5 years is 103,631 based on projected figures for 2022 in this County.

Determination of specific needs for eligible population

Due to challenges of achieving 100 percent transition and availability of resources, then inevitably planning has to take into account specific needs of children who are already enrolled

for ECD and not necessarily all those who are eligible. Much as the Ministry of Education aspires to achieve 100 percent transition to ECD, this is sometimes not possible due to a variety of reasons. If we assume a net enrollment rate of 78% in County Z, then those who are supposed to be enrolled in ECD in 2022 will be 80,832 ($0.78 \times 103,631$). For example, the norms and standards for ECD require that one teacher takes care of 25 children. Thus, the number of teachers required for ECD in County Z will be 3,233 ($80,832/25$).

Target setting

If we assume that the number of ECD teachers in County Z is 2,500, then the County will be experiencing a deficit of 733 teachers – hence the need to plan on how to employ the 733 teachers required. In addition, the County will also need to plan for other needs such as classrooms, teaching materials, playing spaces, toilets and nutritional requirements for ECD. The specific targets set for number of teachers required, classrooms, teaching materials, playing spaces, toilets and nutritional requirements will be based on budgetary projections in the Education Sector and can be spread over the five-year planning cycle. The eligible children, their specific needs and targets can also be obtained similarly for those in primary and secondary schools.

Indicators - outcome level

There are various indicators that are used to measure success at various levels of education. Some of these indicators include: gross enrollment rates, net enrollment rates, teacher to pupil/- student ratios, transition rates, completion rates, retention rates, enrollment for special needs education and mobile education centres for pastoral communities.

Suggested sources of data

Some of these sources of data include: Ministry of Education reports, Teachers Service Commission reports, census reports, Economic Survey reports, and Kenya Demographic and Health Survey reports.

III. Agriculture

Rationale

An important aspect which is related to the first four of the five pillars (of the demographic potential) relates to food, which is essential to human survival (i.e. food is necessary for the achievement of the SDGs such as education, health, employment, etc., and is affected by SDG1 - poverty). Food systems also employ millions of people worldwide (including in Kenya). They include not only food production but also all food-related activities. Food security exists when all people, at all times, have physical, social and economic access to sufficient, safe and nutritious food that meets their dietary needs and food preferences for an active and healthy life. The four pillars of food security are availability, access, utilization and stability.

In the SDG framework, food and food systems are anchored on SDG 2 - *End hunger, achieve food security and improved nutrition and promote sustainable agriculture*. Ensuring sustainable access to nutritious food universally will require sustainable food production and agricultural practices. Six key questions guide the incorporation of SDG 2 in plans: How severe? How many? When? Where? Who and Why? Essentially, the purpose is to identify and plan for populations in need of different strategic actions (e.g. acute food insecurity, etc.).

Programme intervention areas (at both household and population levels)

In planning for the future, it is expected that we foster key activities around nutrition-sensitive agriculture at the household level to increase the availability, access, and utilization of nutritious foods. Assessing future food security requires: forecasting, projecting, predicting and exploring the future. Given the environmental and health impacts of current food systems, feeding people by 2030 sustainably and nutritiously will require food systems to transform at an unprecedented speed and scale. This will entail:

- Estimating the aggregate number of people in different phases of food insecurity experience, including the number of people or households that are in need of urgent action;
- Estimating the number of people facing acute food insecurity and in need of urgent further action, and for which period or how long;
- Identifying the most affected areas and the characteristics of the most affected populations;
- Highlighting the main factors driving the current and projected food insecurity situation; and,
- Developing a summary population for the current and projected classifications according to food insecurity scenarios.

Note: for planning based on household projections, most indicators will be derived from the KNBS household projections. For purposes of monitoring and evaluation, it will be critical to identify:

- The key risk factors that would trigger the need to update an analysis (e.g. conflict and rainfall) which inform the key assumptions (this will also go to risks and assumptions in the implementation chapter and also in the M&E section); and,
- Recommendations for data collection and information systems, i.e. timing, coverage and indicators that are relevant to fill data quality gaps and inadequacies that may emerge during the analysis (for the M&E and actions on CIDP).

Determination of eligible population

If we focus on food insecurity at household level, then the projected population is converted into households by multiplying the former by the average household size. Consequently, the ‘eligible population’ – but in terms of households – will be computed from the population projections based on the 2019 population and housing census. For illustration, let us assume that the average household size for County Z is 3.8. Then the resultant number of households by year are as shown below.

Population by age/ households	2022	2023	2024	2025	2026	2027
Total population	2,039,518	2,073,374	2,107,229	2,141,085	2,172,953	2,204,821
Number of households	77,502	78,788	80,075	81,361	82,572	83,783

Determination of specific needs of eligible population

To determine the eligible population with specific needs, we tease out those households experiencing food insecurity. For example, suppose that 15.4% of households in County Z are food insecure, then the required number of households to be planned for is obtained by applying this percentage to the total number of households – as shown in the last row of the table below.

Pop. Characteristic of interest	2022	2023	2024	2025	2026	2027
Total population	2,039,518	2,073,374	2,107,229	2,141,085	2,172,953	2,204,821
Number of households	77,502	78,788	80,075	81,361	82,572	83,783
Proportion that are food insecure (15.4%)	11,935	12,133	12,332	12,530	12,716	12,903

Target setting

Given the sensitivity of food insecurity, County Z is determined to address this issue amongst all the households affected. In this regard, then the targets will be as shown below.

Pop. Characteristic of interest	2022	2023	2024	2025	2026	2027
Total population	2,039,518	2,073,374	2,107,229	2,141,085	2,172,953	2,204,821
Number of households	77,502	78,788	80,075	81,361	82,572	83,783
Proportion that are food insecure (15.4%)	11,935	12,133	12,332	12,530	12,716	12,903
Target (100%)	11,935	12,133	12,332	12,530	12,716	12,903

Key indicators ~ outcome level

In selecting outcome indicators on food security, focus should be on those that can be generated with ease or available from the national statistical system. Examples may include:

- **Food Consumption Score (FCS):** The FCS is a composite score based on self-reported information on nine consumed food groups and food frequency (number of days food groups were consumed during the past seven days), weighted by the ascribed relative nutritional importance of different food groups. Based on standard thresholds, households are classified into one of three food consumption groups: poor, borderline, or acceptable, with scores of ≤ 21 , 28 and 35, respectively;
- **Household Hunger Scale (HHS):** It assesses whether households have experienced problems of food access in the preceding 30 days, as reported by the households themselves. The HHS assesses the food consumption strategies adopted by households facing a lack of access to food;
- **Reduced Coping Strategies Index (rCSI)** (most useful in humanitarian situations): developed by CARE International, it is an experience-based indicator collecting information on household use and the frequency of five different food-based coping strategies over the past 7 days. It is thought to be most useful in early onset crises when households change their food consumption patterns to respond to shocks, but not in protracted emergencies when households are likely to have already exhausted some coping mechanisms;
- **Acute malnutrition:** Global acute malnutrition based on weight-for-height Z-score (GAM based on WHZ) is defined as the percentage of children under five who are below -2 standard deviations of the median of weight for height (< -2 WHZ) or in the presence of oedema. Cut-offs are derived from WHO guidance. Only DHS has such data – therefore baseline indicator to be derived from the 2022 KDHS; currently as at 2016, (a) prevalence of malnutrition (weight for height < -2 standard deviation from the median of the WHO Child Growth Standards) among children under 5 years, by type (wasting): 6.7 (total); 7.2 (male); 6.1 (female); (b) prevalence of stunting (height for age < -2 standard deviation from the median of the World Health Organization (WHO) Child Growth Standards) among children under 5 years: 29.9 (total); 32.8 (male); 26.9 (female);
- Prevalence of moderate or severe food insecurity in the population, based on the Food Insecurity Experience Scale (FIES): baseline (year) 2016, 56.5 (moderate or severe), while 19.1 (severe) - this is for only 20 out of 47 counties; and

Mortality: Under Five Mortality Rate (U5M)

Most of the indicators or proxies will come from the 2019 Kenya Population and Housing Census Analytical Report on Agriculture and the KDHS.

IV. Water and Sanitation Rationale

Water Sanitation and Hygiene (WASH) are anchored on Sustainable Development Goal (SDG) 6 – *‘Ensure availability and sustainable management of water and sanitation for all’*. Sustainable management of water resources and access to safe water and sanitation are not only essential for unlocking economic growth and productivity, but also provide significant leverage for existing investments in health and education. However, it faces a greater challenge - ensuring that new and existing WASH systems are resilient to climate change over time, including the growing threat of water scarcity.

Programme intervention areas

It is imperative to determine the status of access to water, sanitation and hygiene in households. A key indicator is the proportion of households: that lack access to safe sanitation, has safely managed water services, and do not have a hand-washing facility with soap and water in their

homes. Note that there are other indicators such as: degree of integrated water resources management; and change in the extent of water-related ecosystems over time, but these are at global level although they have an impact on population.

The Intergovernmental Panel on Climate Change (IPCC) showed that climate change is already affecting all regions across the globe and that some impacts are likely to be irreversible. It is therefore important to determine which segments of the population, spatial areas that are likely to be affected or adversely affected and therefore planning needs to take into account these groups first. Planning for this sector within the demographic potential objectives requires that county planning teams take into cognizance the following four pillars: 1) safe and affordable drinking-water services; 2) climate-resilient WASH services and communities; 3) prevention of water scarcity crises through early action; and 4) water cooperation for peace and stability (note that without peace stability and good governance the demographic dividend cannot be achieved).

Determination of eligible population

Since access to safe water is assessed at household level, then the projected population is converted into households by multiplying the former by the average household size. Consequently, the ‘eligible population’ – but in terms of households – will be computed from the population projections based on the 2019 population and housing census. For illustration, let us assume that the average household size for County Z is 3.8. Then the resultant number of households by year are as shown below.

Population by age	2022	2023	2024	2025	2026	2027
Total population	2,039,518	2,073,374	2,107,229	2,141,085	2,172,953	2,204,821
Number of households	77,502	78,788	80,075	81,361	82,572	83,783

Determination of specific needs of eligible population

To determination the eligible population with specific needs, we need to focus on those households without access to safe water. By supposing that 30% of households in County Z have no access to safe water, then the required number of households to be planned for is obtained by applying this percentage to the total number of households – as shown in the last row of the table below.

Characteristic of interest	2022	2023	2024	2025	2026	2027
Total population	2,039,518	2,073,374	2,107,229	2,141,085	2,172,953	2,204,821
Number of households	77,502	78,788	80,075	81,361	82,572	83,783
Proportion without access to safe water (30%)	23,251	23,636	24,022	24,408	24,772	25,135

Target setting

It transpires that the current socio-economic circumstances of County Z will permit the county to reach 80% of the affected households. In this regard, then the targets for enabling households access safe water will be as shown below.

Characteristic of interest	2022	2023	2024	2025	2026	2027
Total population	2,039,518	2,073,374	2,107,229	2,141,085	2,172,953	2,204,821
Number of households	77,502	78,788	80,075	81,361	82,572	83,783
Proportion without access to safe water (30%)	23,251	23,636	24,022	24,408	24,772	25,135
Target (80%)	18,600	18,909	19,218	19,527	19,817	20,108

In a similar manner, targets for households without access to improved sanitation may be obtained.

Suggested sources of data

1. UNICEF's Water Game Plan: Universal safe and sustainable water services for all by 2030, UNICEF, New York, 2020, www.unicef.org/media/73146/file/UNICEF-Water-Game-Plan.pdf
2. The 2019 Kenya Population and Housing Census Vol. IV: Distribution of Population by Socioeconomic Characteristics

V. Employment Rationale

Globally, creation of productive and sustainable employment opportunities is part and parcel of basic policies on economic growth, poverty reduction and development. This is summarized in Sustainable Development Goal 8: *“Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all”*. The labour market is an important link between population change and economic and social development since employment constitutes the primary means of addressing household poverty.

Kenya aspires to become a globally competitive country offering high quality of life to all her citizens by the year 2030. Indeed, the social, economic and political pillars of the Kenya Vision 2030 are anchored on existence of a skillful, productive, competitive and adaptive human resource base. Further, the Constitution of Kenya reaffirms the government's commitment to employment issues. Article 41 of this Constitution grants all persons the right to fair labour practices. It also guarantees every worker the right to: fair remuneration; reasonable working conditions; form, join or participate in trade union activities and programmes; and undertake strike action.

Article 43 of the Constitution provides for economic and social rights, which includes the right to social security. The Constitution also provides for equality in access to employment opportunities. The Constitution, therefore, advocates for decent work, where freely chosen productive employment is promoted simultaneously with fundamental rights at work, adequate income from work, representation and the security of social protection. Sessional Paper No. 4 of 2013 on Employment Policy and Strategy for Kenya aspires to promote full employment as a priority in national, economic and social policy and to enable the economically active population to attain and secure sustainable livelihood through productive and freely chosen employment by the year 2030.

Programme intervention areas

Unemployment, underemployment and the working poor have been identified as one of Kenya's most difficult and persistent problems. Unemployment in this context is taken to mean a situation where a person of a working age who is able, willing and ready to work at the prevailing wage rate is searching for work but is not able to get one. Along the same lines, underemployment refers to employment at less than desired or normal working hours while the working poor are those who work but earn wages that cannot accord them a bare minimum standard of living as measured by the poverty line. It is therefore important for the counties to track the proportion of youth not engaged in education, employment or training (NEET) – since a high proportion of NEET is highly associated with potential civil unrest. Yet another important area of programme intervention concerns child labour.

Integration issues

The working age population is key in driving the country's demographic dividend agenda and reducing the dependency levels. An essentially young population with relevant job skills could be a great asset to the country and it puts Kenya in a competitive position to attract capital by taking advantage of the labour pool. The result would be “the demographic dividend” contributing to high economic growth, through rising savings as a result of a low dependency ratio.

Determination of eligible population

The eligible population for employment will adopt the global definition of the working-age population - often defined as all persons aged between 15 and 64 years. In order to facilitate computation of the various employment-related indicators, other broad age-group populations are important. Such populations groups include: population below 15, population age 65+, youth population, and population below the legal working age. The requisite population figures should be sourced from the population projections based on the 2019 population census.

For illustration, let us assume that the projected populations age 15-64 and 15-29 for County Z are as shown below.

Population by age	2022	2023	2024	2025	2026	2027
Population age 15-64	1,213,369	1,241,079	1,268,790	1,296,500	1,325,287	1,354,075
Population age 15-29	606,976	616,371	625,766	635,160	642,758	650,355

Determination of specific needs of eligible population

It is not always that the totality of the eligible population who have specific needs to be planned for. The existing policies and/or norms should be used to guide on such specific needs. For example, if the policy is to create employment opportunities for all those that are unemployed, then the totality of the eligible population will have specific needs that should be planned for.

Population by age	2022	2023	2024	2025	2026	2027
Population age 15-64	1,213,369	1,241,079	1,268,790	1,296,500	1,325,287	1,354,075
Proportion unemployed (7.3%)	88,576	90,599	92,622	94,645	96,746	98,847
Population age 15-29	606,976	616,371	625,766	635,160	642,758	650,355
Proportion unemployed youth (9%)	5,463	5,547	5,632	5,716	5,785	5,853

Target setting

Based on specific needs of the population that should be planned for, realistic targets should be set guided by the prevailing social, economic and demographic circumstances. Let us assume that the current socio-economic circumstances of County Z may only be able to create job opportunities for 60% of the unemployed youth. In this regard, then the targets for youth employment will be as shown below.

Population by age	2022	2023	2024	2025	2026	2027
Population age 15-29	606,976	616,371	625,766	635,160	642,758	650,355
Proportion unemployed youth (9%)	5,463	5,547	5,632	5,716	5,785	5,853
Target (60%)	3,278	3,328	3,379	3,430	3,471	3,512

Key indicators ~ outcome level

- The key indicators should include:
- a. Dependency ratio
 - b. Employment ratio
 - c. Unemployment rate
 - d. Youth unemployment
 - e. Underemployment
 - f. Child labour
 - g. Percentage of youth not in education, and not in employment or training (NEET)

Sources of data: The 2019 Kenya Population and Housing Census

ANNEX 4: DRM MAINSTREAMING IN 2023-2027 COUNTY INTEGRATED DEVELOPMENT PLAN

- Disaster management Act 2015 exists
- The County has a Directorate of Disaster Management that has 8 staff (Disaster management officers and firemen with 3 fire engines
- Construction of Disaster Operations Centre is ongoing situated at the Public Works Compound
- The directorate has constructed 6 high mast lightning arrestors (at Chamasir, Korisai, Kakapel, Khunyangu, BCRH and Katakwa).
- Due to the availability of fire engines the county machines operate beyond the county i.e Siaya, Bungoma and Uganda
- The county offers relief services and rescue services during flooding in Bunyala, Teso North and Teso South sub counties
- The County DRM committee is in existence but needs funding to enhance its operations. The County DRM committee is always available whenever a situation arises i.e during Covid- 19 Pandemic and Ebola with a standby team at Alupe University and isolation centre at Alupe. Screening centers at entry points (Malaba and Busia OSBPs)
- Hazard mapping report is available
- EOC at BCRH
- Collaboration with Met. Department avails timely bulletins and weather projected situation to inform timely data & information to spur actions.
- Ward climate change committee takes care of the PWD interests

County risks and Areas they affect

Risk	Areas affected	Who is affected	Segregated Data
Flooding	Bunyala Maduwa, Bukhuma, Mabinju & Rugunga	Entire population in the affected area	993 HH – 2021 (2979 children, 1000 women & 900 men), 318 HH – 2022 (954 Children, 400 women 350 men)
	Teso North Malakisi, Komiriai, Omaembei, Kamolo & Atiaket		
	Teso South Akiriamas, Amukurat & Parater		
Lightning strikes	Teso North; Chamasir, Kolanya, Katakwa, Aedomoru, Kakapel, Korisai and Koruruma Teso South; Parater, Machakus, Amukura Butula; Murumba, Kingandole Samia; Samia hills	School going children and members of the public	
Highway Accidents	Along Kisumu – Busia road, Korinda – Nambale road, Malaba – Bungoma highway	Boda boda operators, pedestrians and children	
Disease outbreaks	Across the county	Entire Population	
Army wars	Teso North and Teso South	Women, elderly, PWD and children	

Risk	Areas affected	Who is affected	Segregated Data
Hailstones	Teso South (Amase, Asinge	Women, elderly, PWD and children	
Fires	Across the county	Entire population	
Crop Failure	Samia and Bunyala	Women, elderly, PWD and children	
Dry Spell	Samia and Bunyala	Women, elderly, PWD and children	
Land degradation	Teso South, Teso North, Samia and Bunyala	Entire population in affected areas	
Porous borders	Along Kenya Uganda border	Women, elderly, PWD and children	

What has been done to address risks

Type of Risks	What has been done to address the risks
Flooding	<ul style="list-style-type: none"> - Construction of climate resilient infrastructure i.e. dykes - Sensitization on flood risk - Purchase of search and rescue equipment’s e.g. boats - Flood monitoring and timely early warning
Lightning strikes	<ul style="list-style-type: none"> - Installation of lightning arrestors - Sensitization of public on how to keep safe during rains
Highway Accidents	<ul style="list-style-type: none"> - Road safety campaigns - Providing road signs - Erection of bumps in hotspots
Disease outbreaks	<ul style="list-style-type: none"> - Disease surveillance - Screening - Health infrastructure improvement and more staffing
Army warms	<ul style="list-style-type: none"> - Providing farmers with pesticides
Hailstones	<ul style="list-style-type: none"> - Reforestation
Fires	<ul style="list-style-type: none"> - Purchase of fire engines - Public awareness - Drills - Fire compliance inspections
Crop Failure	<ul style="list-style-type: none"> - Small scale irrigation
Dry Spell	<ul style="list-style-type: none"> - Sinking of boreholes
Land degradation	<ul style="list-style-type: none"> - Reforestation
Porous borders	<ul style="list-style-type: none"> - Intense patrols - Collaboration with Uganda authorities - Arrests and prosecution

Key Challenges in addressing risks

- ✓ Financial constraints
- ✓ Poor coordination amongst stakeholders
- ✓ Understaffing
- ✓ Inadequate equipment’s
- ✓ Resistance from those affected
- ✓ Lack of County DRM policy.

Departments required to address risks

Risk	Relevant department	Roles
Flooding	DRM	<ul style="list-style-type: none">- Lead operations- Provide finances- Provide necessary equipment
	Education	<ul style="list-style-type: none">- Provide shelter for victims- Ensure the affected access education
	Health	<ul style="list-style-type: none">- Offer psycho social support,- Sanitation- Treating the affected
	KPLC	<ul style="list-style-type: none">- Relocate power lines
	Water	<ul style="list-style-type: none">- Offer clean water
	Public Administration	<ul style="list-style-type: none">- Sensitization and security
	Kenya Police Service	<ul style="list-style-type: none">- Security
	Meteriological Department	<ul style="list-style-type: none">- Early warning
	County Assembly	<ul style="list-style-type: none">- Provide finances for DRM
	Climate change Directorate	<ul style="list-style-type: none">- Offer climate smart alternatives to victims and build adaptive capacity
	Interior	<ul style="list-style-type: none">- Coordination
	Irrigation	<ul style="list-style-type: none">- Opening channels
	Culture, youth	<ul style="list-style-type: none">- Social economic empowerment for women, youth and PWD sensitization, social safety nets/protection, social security
	Roads and public works	<ul style="list-style-type: none">- Build climate resilient structures and reconstruction
	National council for PWD	<ul style="list-style-type: none">- Sensitization
Lightning strikes	DRM	<ul style="list-style-type: none">- Install lightning arresters- Public awareness- Provide finances
Highway Accidents	KURA, KeRRA, County Roads	<ul style="list-style-type: none">- Road safety campaigns- Providing road signs- Erection of bumps in hotspots
Disease outbreaks	Health	<ul style="list-style-type: none">- Disease surveillance- Screening- Health infrastructure improvement and more staffing- Sanitation- Treating the affected
Army warms	Agriculture	<ul style="list-style-type: none">- Providing farmers with pesticides- Public awareness
Hailstones	Forestry	<ul style="list-style-type: none">- Provide tree seedlings
Fires	DRM	<ul style="list-style-type: none">- Purchase of fire engines- Public awareness- Drills- Fire compliance inspections
Crop Failure	Agriculture	<ul style="list-style-type: none">- Provide seeds (fast maturing crops)
Dry Spell	Met.	<ul style="list-style-type: none">- Early warning information
Land degradation	NEMA	<ul style="list-style-type: none">- Protect fragile ecosystems

Risk	Relevant department	Roles
Porous borders	NPS, Interior	<ul style="list-style-type: none">- Intense patrols- Collaboration with Uganda authorities- Arrests and prosecution

Priority Actions

- Decongesting Busia town (Dualling of Korinda OSBP road, trailer park)
- Construction of climate resilient infrastructure dykes, roads
- Activation of disaster management kitty
- Resettlement of the most affected persons

ANNEX 5: INTEGRATION OF H.E. THE GOVERNOR’S MANIFESTO INTO CIDP

It was considered prudent to integrate H.E the Governor’s Manifesto into the county development planning for 2023-2027. The focus is on inclusive economic development, social empowerment and politics of inclusivity; need to exercise tolerance based on responsive, transparent and servant leadership guided by accountability, equity and rule of law. There is need for the county government to reflect on the diversity of its people such that development agenda relies wholly on sustainable management of the county’s abundant natural and human resources, favourable climate and weather conditions that are conducive for business agriculture.

There is equally need to take advantage of the county’s strategic location as an important gateway to Uganda and Eastern/Central African regions that offer unique business opportunities, stable transport and communication structures, availability of financial institutions and other business support infrastructure, institutions, agencies and markets for finished products. The bright future of Busia largely depends on how best to plan to transform the county during the 3rd Generation CIDP for 2023-2027 as the development pillars of the county must be aligned with the Kenya Vision 2030 and MTP-IV.

The CIDP is expected to provide a harmonized framework for documenting development aspirations of both county and national government entities as well as those of other development partners and public benefit organizations as a policy blue print for guiding development of the county. Indeed, the intentions of H.E. the Governor’s Manifesto were to anchor the county’s 3rd generation CIDP to the Kenya Vision 2030, and the successive MTP-IV by focusing on the following;

1. Development of policies and creating enabling environments that are geared towards inclusive socio-economic growth and development, attracting investors, and creating conducive trade regimes and engagements;
2. Robust private sector engagements and investment(s),
3. Expansion of markets for products.
4. Strengthening of the policy and legal frameworks on the county resource mobilization and management particularly for enhancing the county’s own resource revenue generation and taxes.
5. Creating a culture that promotes cohesion, peace and stability that are conducive for realization of the county’s development aspirations.
6. Introduction of talent centers and rehabilitation of sports facilities.
7. Up-scaling of education bursary fund and students’ exchange programmes.
8. Pursuance of a stable political system that encourages inclusivity, spatial equity, public participation on decision making and public service delivery to the people of Busia: and,
9. Enhancing Public Participation on governance and decision making.

The focus of the Governor’s Manifesto as the people’s development blue print in the Medium Term (2023-2027) is on the following priority areas and actions;

Human Resource Capital Development

1. Auditing impacts of 5-10 years into devolution and evaluating the interventions that have been implemented
2. Initiation of programmes and county flagship projects towards enabling the implementation of Public Private Partnerships.
3. Rehabilitations and equipping of tertiary institutions and vocational training facilities.
4. Streamlining bursaries and students’ grants systems to ensure that students from needy backgrounds are assisted to complete education and training.
5. Expanding the schools and training facilities for people with special needs;
6. Establishment and equipping of multi-faceted referral hospital(s) to handle complex medical cases.
7. Equipment and maintenance of the current level 4 health facilities in the county.

- 8. Strengthening institutional and technical capacities for provision of effective health care services delivery.
- 9. Introduction of WASH facilities through construction of latrines with running water in public facilities including schools and market centers.

Infrastructure Development

- 1. Increase Investment in infrastructure to improve road networks, ICT, water supply infrastructure, and power connections.
- 2. Conduct baselines on investment opportunities and the potential of the county with a view to attracting more investors;
- 3. Invest in building markets stalls, Jua Kali parks for allocation to grocers and artisanal traders (Mama mboga)
- 4. Carpet and maintain the road networks in the county and assess and work to decongest Busia Town
- 5. Assess viability of rehabilitating Busia Airstrip or propose its alternative land for use
- 6. Light up public facilities and the market centers.
- 7. Through PPPs, produce a blue print on establishing I-Hubs and business centers, and provision of free Wi-Fi for urban areas.

Revitalization of Productive Sectors

- 1. Revive agricultural extension service delivery system to reduce use of poor agricultural practices that chock production in the county
- 2. Allocate more resources to widen the scale of cash crops farming including traditional and orphaned crops like sorghum, cotton, cassava, fruit and oil crops, etc.
- 3. Invest in and expand fish farming for commercial purposes.
- 4. Expand training for residents on irrigation farming, technologies and financial lobbying to realize the full benefits of irrigation schemes,
- 5. Prepare the county to attract both domestic and international tourists, including Kakapel National Monument in Teso North, rocky hills of Kisoko, and Lake Victoria viewpoints.
